

**Filestage is the platform  
to review and approve  
content efficiently.**

# THE CHALLENGE

Companies  
produce and review  
**more content** than  
ever before.

Regulations  
and  
compliance  
rules are being  
tightened.

Teams, clients  
and vendors  
**collaborate**  
remotely.

**Bad Communication  
processes cost  
companies \$26,041  
per worker a year.**

(Holmes Report)

## Companies still rely on email and to share, review and approve content. With all its downsides.

### Fuzzy Feedback

Giving precise feedback on audiovisual content via email is impossible.

Example:

*"In the video at minute 2:19 the logo should be in the left bottom corner, not upper right."*

### Information Lost in Silos

Feedback stuck in silos creates non-transparency, delays projects and causes critical roadblocks for audits.

Example:

*"Has somebody access to the files of Brian? I'm afraid he's sick, but we need this content to be ready before the conference."*

### No Traceable Process

Unstructured content approvals lead to inefficiency and compliance issues.

Example:

*"Has the legal team checked the content yet or do we still need to wait for the product team?"*

## OUR SOLUTION

For teams  
that prefer  
**user-friendly**  
solutions

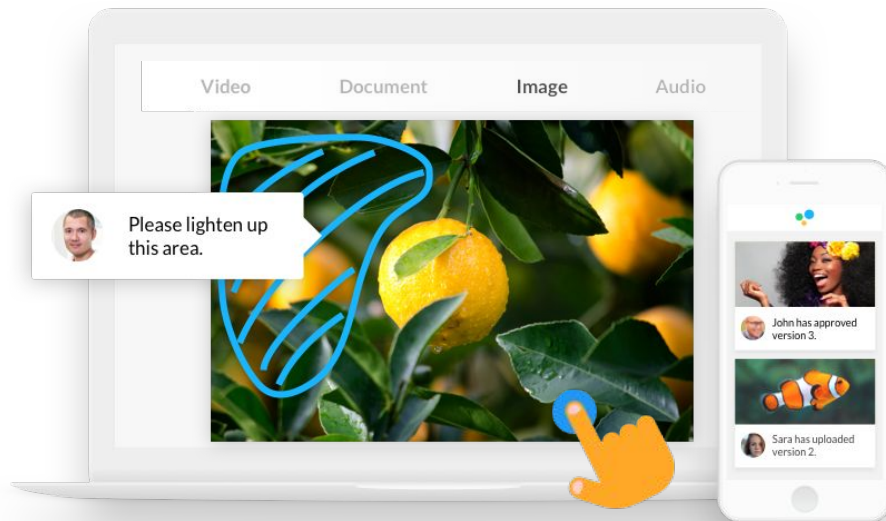

For companies  
that want to review  
all content in **one**  
single platform

For managers  
that use analytics to  
**allocate resources** and  
**optimize processes**

For users  
that wish to **give**  
and get **timely**  
**feedback** despite  
high workload.

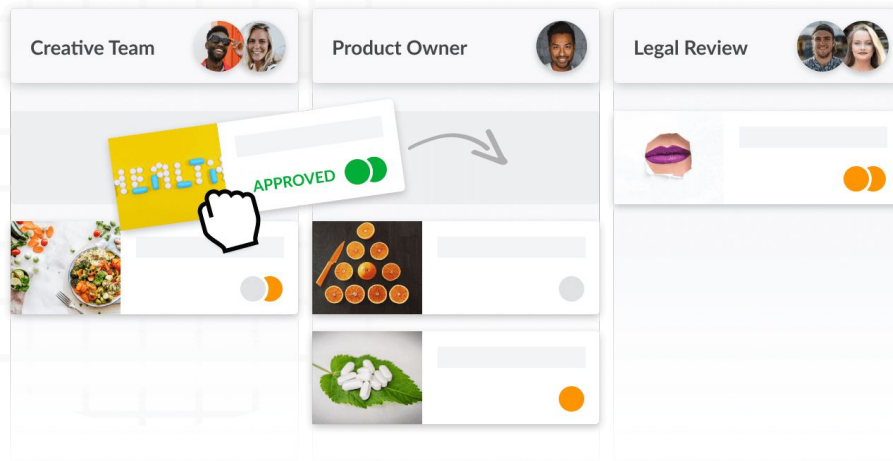

# Easy content review & proofing for your team.
