

**Access Your Desktop,  
Applications & Data  
From All Your Devices...**

**Cloud Workspace® For Azure** is our Workspace as a Service solution ties directly to your Office 365 identity, enabling you to work with your files and applications the same as you would with the computer you use today. The difference? **Everything you need with one login, in one place.**

## Single Sign-On with Office 365

- Quickly and easily attach Cloud Workspaces to your Office 365 identity, enabling Single Sign-On and MFA
- Easy access to Cloud Workspaces via in Office.com, or use a simple preconfigured Windows app

## Simplifies IT Management

- Includes Azure Active Directory Domain Services, RDP/HTML5 Gateways and Session Hosts for End User sessions
- Similar look and feel to Admins familiar with managing Azure
- Insight into the End User experience – finally!

## Enhances Data Security & Business Continuity

- Your applications, files and desktops reside in Microsoft Azure and all of the associated Security and Compliance benefits Azure provides
- Supports company disaster recovery plans by keeping all data secure and available, including options for multiple regions

## The Cloud Workspace Solution

**Your Desktop in the Cloud** | It's your desktop in the cloud, accessible from all your devices. From your Cloud Workspace, you get access to all of your files and applications – all with one login.

**Convenient AND Secure** | CloudJumper automatically configures your network, sets AV in place and streamlines backup for Business Continuity and DR. Best of all, this is invisible to Users getting a Single Sign-On experience.

**Microsoft Office 365** | Desktop versions of your Office 365 Applications will be available and activated automatically. Again – one login, one identity across the board.

**JumpStart** | Automated migration of data, group memberships and folder permissions to your folder structure in your Cloud Workspace deployment – a dream come true!
