

i2x Integration Solution for Dynamics 365 Business Central

Available on Microsoft AppSource

Streamline your ticket to invoice to payment process with full customer portal integration.

i2x Integration Solution enables easy, fast, secure electronic invoice submission and processing for both operators and suppliers. Using i2x, vendors can upload invoices and field tickets from their accounting/ERP system with 1-Click™ and securely transmit them directly to the customer portal.

The i2x Integration Solution app is linked to the Jobs Costing module in Microsoft Dynamics 365 Business Central. The built-in supplier portal integration means it can rapidly be configured to link to OpenInvoice, Cortex, Chevron, ConocoPhillips, Noble Energy, OXY, SAP Ariba, Oracle iSupplier, and others. Get it now to leave the process headaches and redundancies behind you.

Main features and benefits

- Works with invoices, credit memos, purchase orders, and field tickets
- Creates A/R invoices from field tickets
- Integrates with most major Operator portals
- Automatically identifies the portal being used
- Simultaneous submission to multiple portals
- Connects seamlessly with all accounting/ERP and field ticket systems
- Includes your backup documents for each invoice, field ticket, and credit
- Easy and flexible to use, with training and support included

Benefits for Invoice Transmission & Processing

- Replaces manual, redundant data entry with an electronic process
- Reduces overhead and staffing costs
- Eliminates paper invoices and associated cost for printing and mailing
- Improves security and eliminates data-entry errors and inconsistencies
- Accelerates field ticket approval and shortens accounts receivable cycle
- Simplifies the process of handling disputes

The functionality you need at a price you can afford

A major challenge for small to mid-sized service organizations is the need for advanced functionality but at an affordable price. Microsoft Dynamics 365 Business Central offers powerful service solutions to small and mid-sized companies with a price point that works for almost anyone. The release of Dynamics 365 Business Central offers a much improved user interface when compared to its predecessor, Microsoft Dynamics NAV. It has been simplified by Microsoft and offers deployment options for SaaS (Software as a Service), in-house, and hybrid installations while being quicker to learn, easier to use, and less expensive to implement. Business Central offers an outstanding value proposition, especially for SaaS implementations where the system is automatically upgraded by Microsoft on a semi-annual basis. Our ODT Advanced Payables app for Dynamics 365 Business Central offers the unique capability and key functionality you need for your business's payables requirements. Choose Microsoft Dynamics 365 Business Central and the ODT AP app for a cost-effective yet powerful option for your business.
