◆ SYLLABUS ◆

Module 1: Introduction to Office 365 ProPlus

This module provides an overview about Office 365 ProPlus, including licensing and activation details, Servicing model and the Click-to-Run install technology. Subsequent modules will provide more detailed information.

Module 2: Office 365 ProPlus Assessment and Requirements

In this module, we examine the requirements to enterprises making the transition to Office 365 ProPlus. Evaluation of VBA macros and third-party add-ins using the Readiness Toolkit.

Module 3: Packaging and Deploying Office 365 ProPlus

This module is a deep-dive discussion on managing deployment and best practices. In detail, we'll cover Configuration Manager packaging

and deployment, Office Deployment Tool, 32-bit/64-bit, and the latest tools to accelerate adoption. Also how to install Language Packs, Proofing Tools, and additional products like Project and Visio.

Module 4: Office 365 ProPlus Activation and Authentication

This module covers authentication types, activation flow, Single Sign On, and network configuration guidance.

Module 5: Office 365 ProPlus Servicing

This module explores the different options when it comes to Office 365 ProPlus updates. We'll cover cloud managed, enterprise managed, and locally managed servicing scenarios.

Module 6: Office 365 ProPlus Modern Management

This module explains the new Group Policy settings for Office as well as providing an overview of some of our newest tools such as the Office Cloud Policy Service. In addition, we'll cover Office 365 ProPlus deployment in a Windows 10 "Modern Workplace" scenario.

Module 7: Troubleshooting Office 365 ProPlus

We'll dive into troubleshooting this new technology. Verbose install/update logging, activation logging, and the top tools used by our customers and Premier support.
