

Risk Command

A Product by PwC

The proactive risk and compliance platform that helps you respond and remediate – wherever you are.

The challenge

69%

of organizations are failing to use proactive detection in their control environment

Source: PwC, Global Economic Crime and Fraud Survey, 2018

Our solution

What if risk and compliance became your competitive advantage?

More than monitoring and identifying potential threats, Risk Command also helps respond and assists in remediation, enabling you to take preventative action in the boardroom while protecting your corporate strategy.

Eliminates silos

Risk Command brings everything up to a single view, helping you to identify and capitalize on areas of convergence across compliance and fraud programs, and aligning compliance activities with corporate strategy.

Increases consistency

When your teams have a single view of how the organization works as a whole in real-time, there is more consistency in risk and compliance actions – and fewer decisions, fueled by reliable recommendations, can have broader reach.

Reduces errors

The power of AI helps reduce manual errors and is able to identify and reduce false positives. This gives your teams increased time on high-priority tasks and empowers your organization to stay ahead of risk and compliance, allowing you to achieve more.

The benefits to your business

Anticipate the future, increase strategic acumen

Enhance process efficiency

Whether it's entering into new markets, expanding into new partnerships or allocating cost – Risk Command can help you do it faster.

Increase confidence in decisions

Arm yourself with information to better understand what's happening so you can more accurately weigh your risk appetite against what the data reveals.

Protect your brand and company finances

Using machine learning, advanced algorithms and AI, you can mitigate regulatory investigations and prioritize your response risks effectively.

How does Risk Command identify, monitor and help respond to risk?

Identify

Using AI, machine learning and advanced algorithms, data is analyzed, generating insights, which are then populated into a centralized platform, powered by Microsoft Azure, users can work simultaneously from anywhere in the world.

Monitor

See across the enterprise from a single dashboard, gaining new perspectives on uncovered risk areas and getting visibility into program and control effectiveness, helping manage your team and results.

Respond

Future decisions are informed by a feedback loop, and identified issues are rapidly escalated for remediation. When crisis does happen, relevant information is consolidated for investigation.

Are you ready in today's business world?

Built with experience

Using advanced algorithms and AI, Risk Command embeds years of industry experience, giving intelligent insights to help you balance growth goals and risk.

Easy to use

Risk Command is built to work for you. It connects data, systems and processes for a single source of truth, and it's built to get off the shelf and into action quickly.

Priced for what you need

Transparent, structured pricing options include a one-time setup fee and/or annual subscriptions that adapt to changes in your strategic business plan.

“ One step on our journey to digital transformation was to develop an end-to-end analytics solution that risk scores sales transactions to detect anomalies and route them for additional compliance oversight. With Risk Command, we started with post-deal reviews, and are now pro-actively identifying high-risk deals before entering into them...to help prevent non-compliance before it happens.
