

Leni: World's First Virtual Analyst

Natural Language Querying | Full Spectrum Analytics
Capability | AI-based Contextual Insights

Say 'Yes' to Augmented Analytics with LENI

The World's First Virtual Analyst

At a time of unprecedented global crisis, when organizations are grappling with data deluge and executives are pressed for making critical business decisions, the pain of going through long reports with complex analysis in designer dashboards is real.

The truth is data in-of-itself has limited value. Context gives data meaning. Without it, one cannot make decisions. You don't need another data navigation tool or dashboard, you need simple, digestible and actionable insights.

That's why we created LENI - The world's first virtual analyst!

Who is LENI?

LENI our Artificial Intelligence and Machine Learning-powered virtual analyst, works just like a real analyst to understand, analyze, interpret and communicate what's most interesting and important in your data , in a language and form that you can easily comprehend.

LENI's Skillset

Conscious

Perceive critical business disruptions and simulate potential realities in the constantly evolving business context.

Intelligent

Full spectrum data analytics capability from descriptive to prescriptive with automated discovery and machine learning.

Articulate

Understand questions and respond instantly with visual and narrative information that is relevant and actionable.

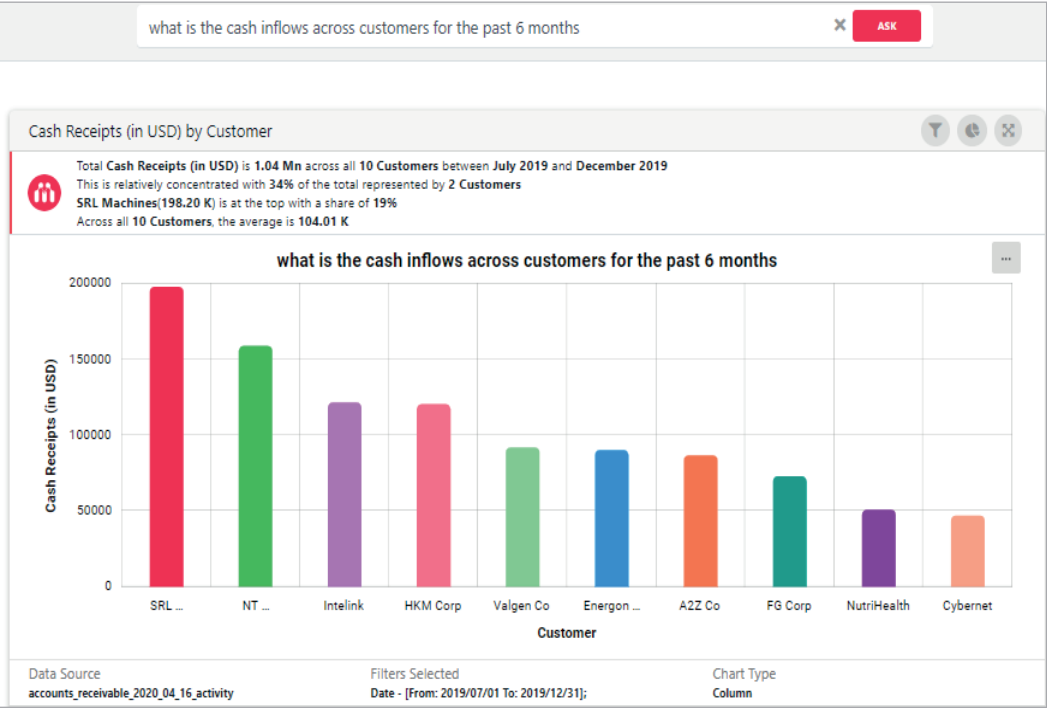

Efficient

Provide accurate and reliable insights with effective feedback mechanism to learn and re-learn on the fly.

What Can LENI Do?

LENI equips you with ready-to-use advanced analytics arsenal - from descriptive to prescriptive to get straight to the answers that matter the most. No more data wrangling, visual interpretation or manual KPI definition and tracking.

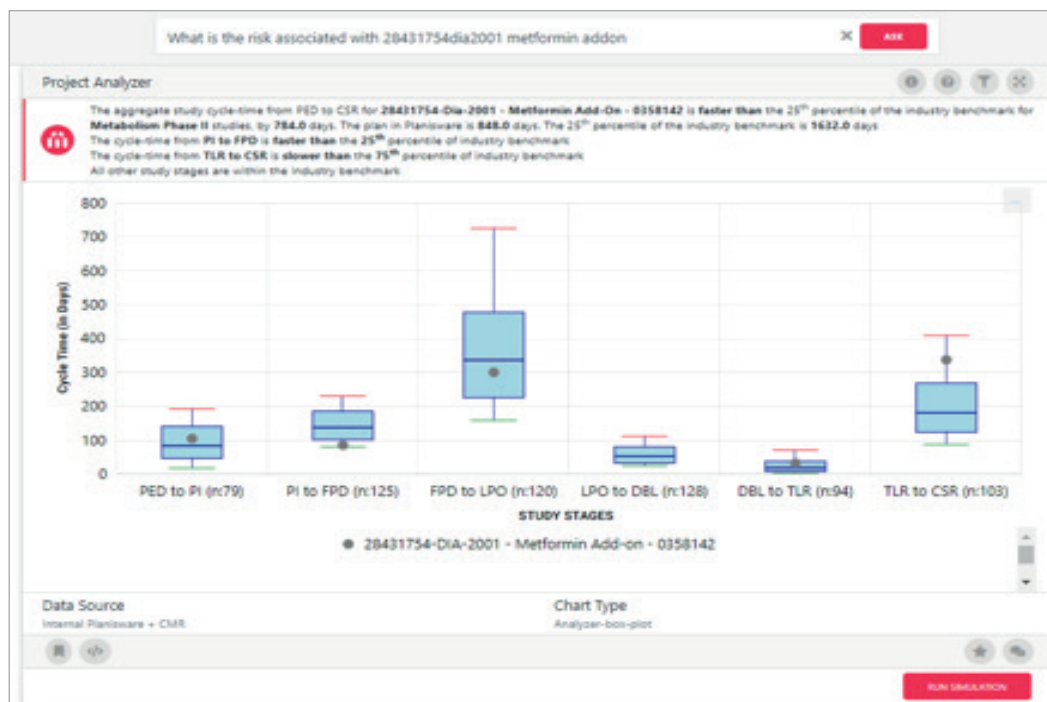

LENI does all the heavy lifting on your data to give you actionable insights and stories in seconds sans human intervention or bias.

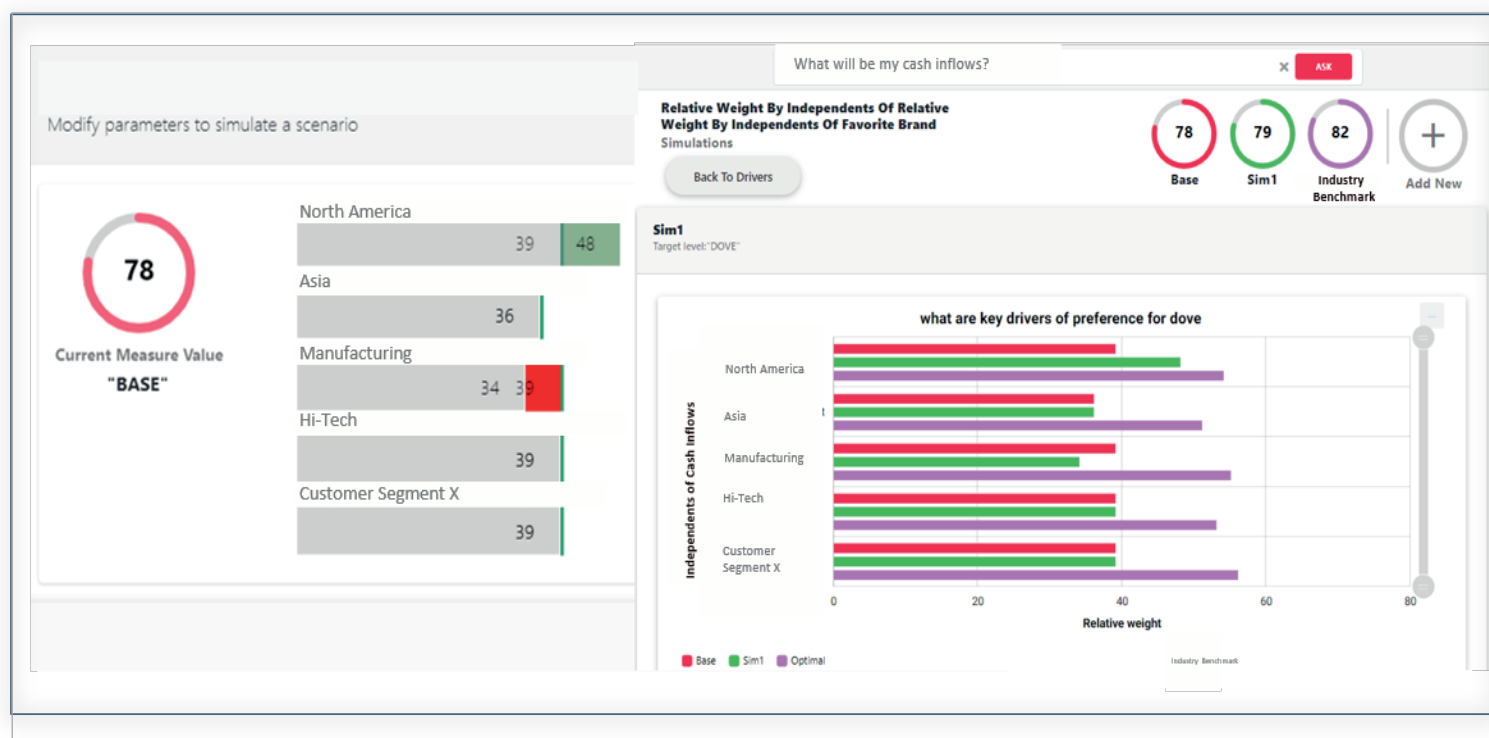

Automated categorization of business specific KPIs, with intuitive selection of visuals and narratives for comprehensive storytelling.

Rapid recognition of patterns, signals and anomalies in data, to surface underlying trends and business drivers.

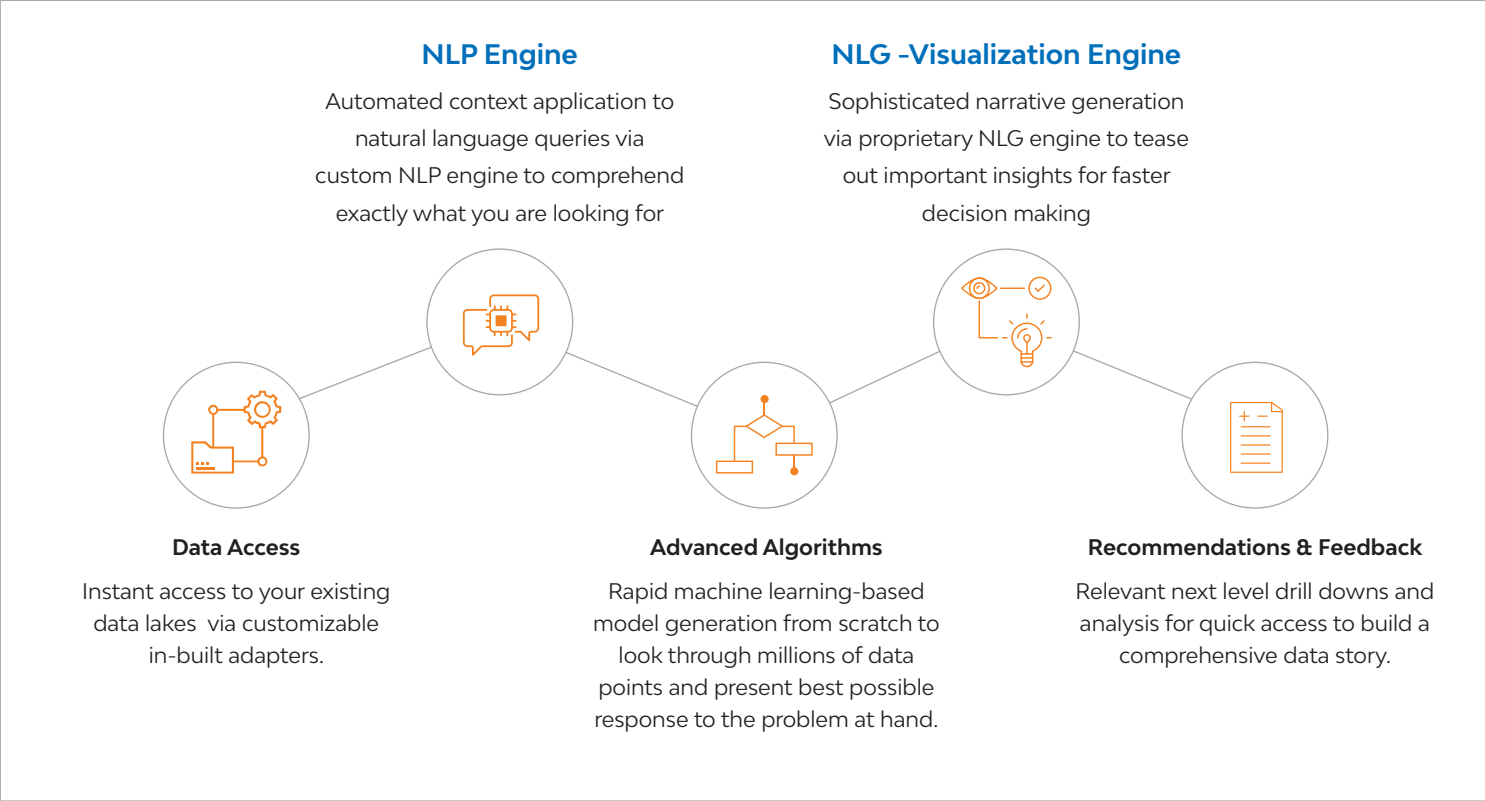

Industry benchmarking of key business metrics to strategize and learn from the best.

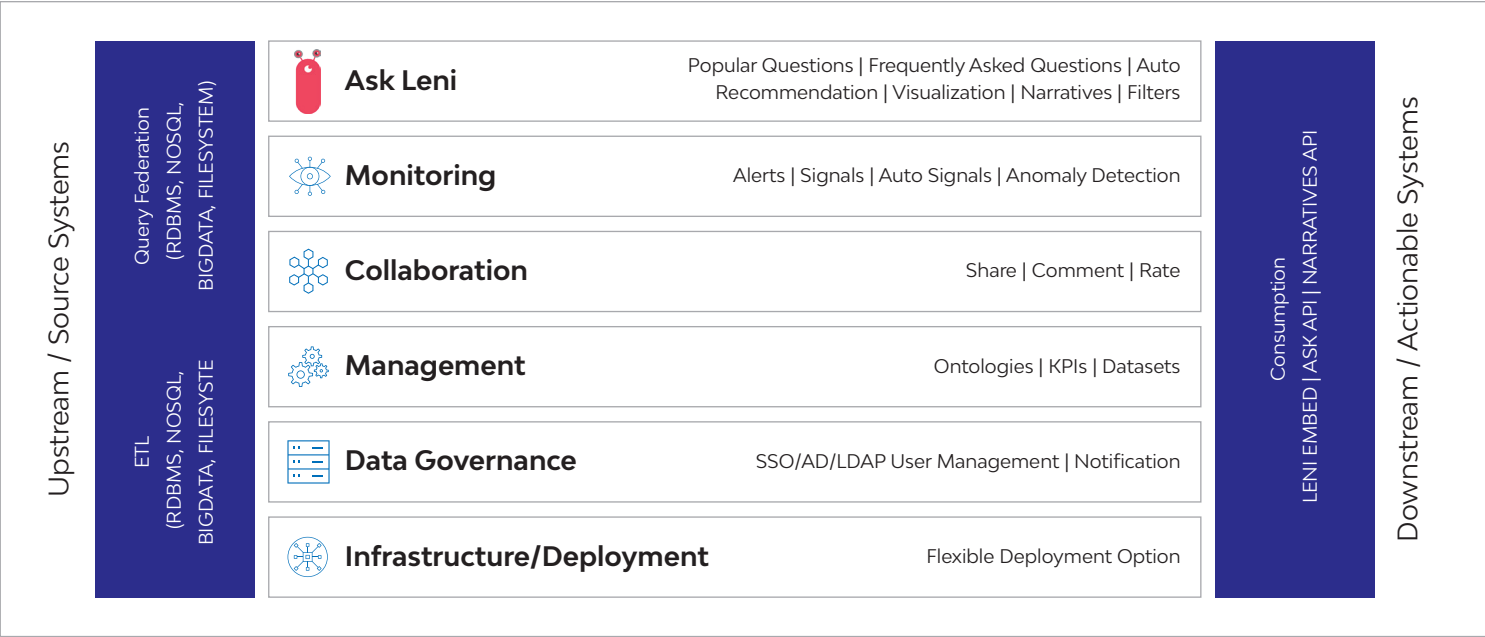

Rapid simulation of hundreds of alternate business scenarios to substantiate predictions and prescribe best course of action.

How Does LENI Work?

Leni ingests and integrates structured and unstructured data from multiple sources and formats, which is then processed by her Auto-ML layer consisting NLP/NLG and advanced analytics engines.

LENI's Intelligence Center

Flexible Deployment Options : On Cloud or On-premise

What is LENI's Expertise?

LENI has deep domain expertise in multiple industries and functional domains and well-versed with the context and nuances specific to business. She is available as several pre-built use cases and solutions that can work across the business lifecycle.

No analytics challenge is too complex for Leni. She can be configured at speed to work for any domain or function.
