

iDynamics Commissions

This app, designed for Microsoft Dynamics 365 Business central, lets you set, follow and settle sales commissions for your sales force. It can be [installed from AppSource](#) for free, with all features enabled for any demo company.

The app handles both direct commissions, generated as soon as a sales document is posted/collected, and commissions based on sales targets, generated depending on the sales achieved by each salesperson within a date period. iDynamics Commissions has been designed to be the most flexible and complete commission management solution for Business Central, while also being the most user friendly and easy to use.

Here you will find all the information needed to setup and start using iDynamics Commissions. If you are a partner or customer that needs to extend the app, you will also find useful information in the *Developers* chapter.

If this is **the first time that you use the app**, we encourage you to follow the short tutorial on the [first steps](#) chapter, so that you get an overview of the basic concepts required to use it.

Table of Contents

| Title | Description |
|--|---|
| First Steps | Get a global view of the app and learn its fundamentals. |
| Setup | General setup parameters for the app. |
