How is my consumption calculated?

At the end of each calendar month, your total number of expense users will be calculated. This number will determine your price by a simple look-up in our price table.

Named Users are registered users during the month, who are exported to an Expense App user. *Active Users* are number of Named Users who submit at least one expense during the month. We will always invoice the cheapest user model, depending on how many of your Named users have been active during the month. However, we will invoice you minimum for one Active User within the month.
