At MazikGlobal, we've created user friendly app that helps Teacher's connect with Students through Virtual Team meeting and conduct their classes as per their schedule

We have used Microsoft K-12 component in Education Accelerator as a platform and enhanced its capabilities to enable Virtual Classroom feature, this app empowers teachers to conduct virtual sessions with students and help them to excel in their studies.

### Manage Virtual Classroom

Teacher can view their daily and weekly schedule of virtual sessions which has information about their Grade / Program and Course section, Class schedule is seamlessly integrated with Microsoft Team calendar which will notify teachers to start their virtual session as per schedule

### **Lesson Planning**

Each virtual session is associated with topic as per Lesson Planning Management by the administration to keep track of the curriculum timeline.

### Notification

Students will get notified of their virtual sessions to ensure their attendance and keep themselves abreast with their studies.

## **Create Virtual Meeting**

Teacher's are empowered to create virtual sessions for entire classroom or for selected students which will help them manage their students individually as part of personalized education program.

### **Student Portal**

This portal helps students to join virtual session conducted by their teacher with information about the topic which will be covered in the session.

### Announcement

This feature help school to manage their announcement for Teachers and Students separately, Users will be well informed of any important announcement made by school authorities and act accordingly.
