Packaging

Manage your packaging and returnable packaging inventory and partners balance.

## Did you ever have a discussion with your customer about the delivered quantity of crates?

With Packaging you are able to setup default packaging and be guided through the logistic processes to register the crates and pallets used. Add default packaging to items to never miss a crate and keep accurate track of outstanding balances. Lines will be automatically added to the source document, from purchase order to purchase invoice and from sales order to sales invoice. If you charge your customers for the returnable packaging, the added line will carry your sales price so you'll never forget to add it on the invoice.

What is the outstanding packaging balance to my customer?

We will give you a clear overview of the outstanding balance including all historical transactions and links to the source documents. Would you rather keep the balance on customer group level or even in a combination of a vendor and customer? It's all possible in the packaging app. No more confusion about the outstanding balance with your vendors or customers.

Start managing your packaging stock today!

Although one crate or pallet does not represent a lot of value, if the volume grows, the value will grow accordingly. Create your pallets and create and using a wizard to set up the items. Reorder packaging in time and never run out of stock.

Features and benefits:

- Create packaging and crates to monitor stock

- Choose if you want to keep inventory records

- Create order or item bound packaging

- Access a clear balance overview with optional consolidation accounts

- Easy packaging item setup with the Packaging Wizard
