

# Inventory Count Audit Application

Solution Description	<p>Every organization with even a single warehouse needs to ensure their physical inventory count matches the inventory count in the system.</p> <p>This ensures proper forecasting and better inventory management and goes a long way in saving costs.</p> <p>In the same breath, not every organization has Advanced Warehouse management system or Warehouse Management modules of ERP implemented.</p> <p>This application caters to such organizations with regular inventory management ensuring that all the warehouses of the business in each of its legal entity hold the same physical and system inventory count.</p>
