elevateHR®
Taking Talent to the Top

Features

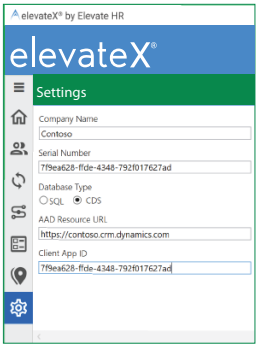

- Define fully configurable connections to third-party systems or services without the burden of custom programmed interfaces
- Establish Microsoft Dynamics 365 as the single source of truth, eliminate duplicate data entry, reduce error rates and alleviate audit headaches
- Pass data needed by payroll, benefit providers, savings plan administrators, background check vendors, learning management systems, and any other downstream applications your company uses
- Enable bidirectional sync for vendor APIs to send information back to Dynamics for processing
- Map HCM data for all global provider formats, and deliver data via APIs, flat file formats, delimited files, XML, APIs, ODBC JSON, etc.
- Guarantee processing schedules and logs are accessible and easy to use with the intuitive elevateX® UI
- Attain total, secure control over your data, with options to manage data through cloud services or on premises
- Operate within the Microsoft Power Platform (Common Data Service) or SQL databases for high-volume environments and scalability

Establish connections from any Dynamics source to any third party system or service provider, utilizing any format or interchange (e.g. CSV, API, Text, ODBC, etc.)

Configure what data go where, in which direction, and with what kind of transformation, all without writing code

Simple setup provides options for CDS or SQL databases and Client App IDs
