Connected Campus

## Dynamics 365 (CRM) for Education - EduSenz

As you may already know, higher education institutions today face several challenges such as lack of system usability, traditional system design and architecture, lack of adaptability, and configuration and unavailability of capabilities such as process management, automation, data analytics and visualization.

To overcome these challenges, TeBS aims to equip your institution with digital capabilities, designed to ensure convenience and accessibility for students and faculty in and out of campus. TeBS' unique educational solution framework is built on [Microsoft technologies](#) such as [Dynamics CRM](#), [SharePoint](#) and [Office 365](#). It facilitates seamless communication between staff and students through an interactive digital platform. [EduSenz](#) offers 360 degree student view, course and fee management, simplified faculty management, portals, documents repository, adhoc reports and dashboards.
