

# COMPANY FACT SHEET

Proactively protecting companies from cyber threats with a patented malware prevention technology.

## THE CHALLENGE

Cybercrime is the greatest threat to every company in the world regardless if it's small, medium or large enterprise. The problem for most companies: the current anti-malware solutions cannot detect most of the new malware when they first appear.

The weakest link at organization's cyber security infrastructure is UNKNOWN malware HIDDEN in FILES bypassing the existing cyber security systems.

## THE **odix** PATENTED TECHNOLOGY

odix's technology prevents malware infiltration of organizational networks by disarming all malicious code from a wide range of file types. The odix process is done on the fly and does not affect business continuity. Uniquely, odix protects files from known and **unknown** future attacks – where legacy solutions fall short.

## **odix** PRODUCT SUITE

The odix technology is wrapped into 2 product suites; on-premise and cloud, enabling companies to sanitize files from various channels and sources.

The on-premise suite includes:

odix Kiosk

odix NetFolder

odix Mail

odix Client

- sanitization station for removable media.
- sanitization service for files in transit.
- email attachments sanitization.
- Desktop app for USB's file sanitization.

The cloud suite includes:

FileWall™

odix CDR-as-a-service

odix managed Kiosk

- Microsoft 365 email attachments sanitization.
- file sanitization service via API in the cloud.
- Cloud based kiosk management service.
