User Dashboard

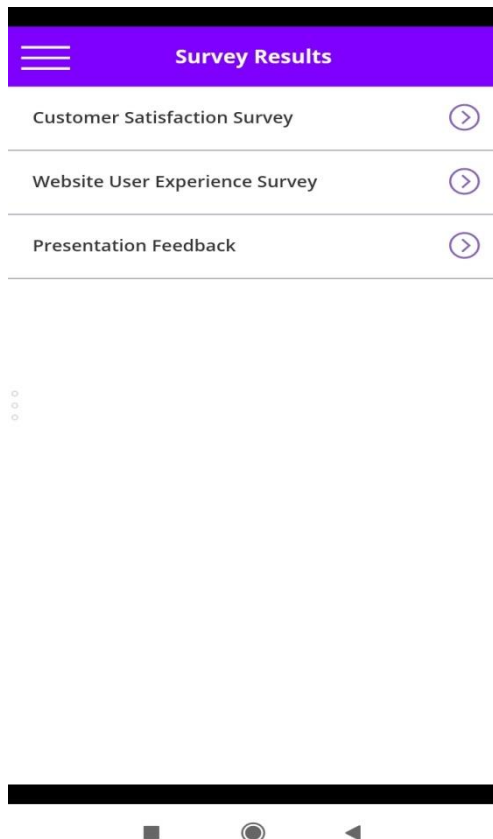

1. **Active Survey Screen** - This screen displays all the active surveys to the user

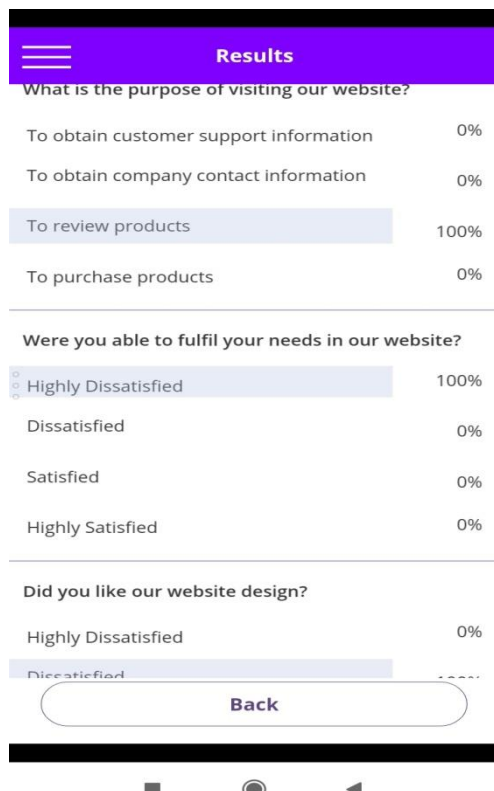

2. **Collect Response Screen** - In this screen the user can give its opinion for the respective questions for a particular survey

The screenshot shows a mobile application interface for the 'Collect Response Screen' for the 'Website User Experience Survey'. At the top, there is a purple header bar with a white hamburger menu icon on the left and the text 'Website User Experience Survey' in white. Below the header, there are three questions, each with a list of radio button options. The first question is 'What is the purpose of visiting our website?' with four options: 'To obtain customer support information', 'To obtain company contact information', 'To review products' (selected), and 'To purchase products'. The second question is 'Were you able to fulfil your needs in our website?' with four options: 'Highly Dissatisfied' (selected), 'Dissatisfied', 'Satisfied', and 'Highly Satisfied'. The third question is 'Did you like our website design?' with two options: 'Highly Dissatisfied' and 'Dissatisfied' (selected). At the bottom of the screen, there are two buttons: a purple 'Done' button and a white 'Back' button with a purple border. At the very bottom, there is a black bar with three white navigation icons: a square, a circle, and a triangle.

3. **Survey Result Screen** - This screen displays the survey results to the user. The survey results is also displayed to the admin

4. **Result Screen** - In this screen the user's opinion for different question for a particular survey is displayed in percentage format. This screen is also visible to the admin
