  - Enterprise

(3) Place URL on your website
  - The HTML code to embed on your website is generated within the App itself
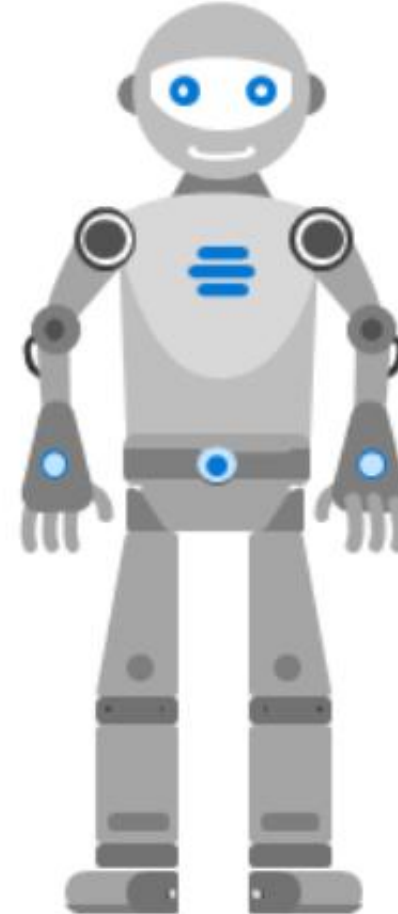

Platform neutral

- uWebChat is based on MS Teams, users can choose from various clients; iOS, Android, Web, Mac and Windows10.

First step towards AI

BOT

- In addition to linking speech and video, uWebChat can be linked to artificial intelligence systems that enable, for example, speech recognition or the recognition of dialogues.

- Like frequently asked questions they can serve as input for later human interaction

Flexibility in integration

- uWebChat makes it possible to expand direct communication between people with chatbot technology.

- As a result, for example, frequently asked questions such as a Q&A database can be linked or certain tasks that now require a lot of administrative tasks can be automated.

- Ask about the possibilities to expand uWebChat with the specific skills within your organization.
