EXAMUS

examus

Switching from traditional face to face education to computer-based education makes the learning experience entirely different for teachers and students

Challenges

Educational Institutions want to scale using online technologies while maintaining high standard of education, but facing huge differences between in-campus and online education

Online-education:
- Only verbal feedback and no information about student's behavior
- Online exams are not always relevant especially to the skills
- Online exams are difficult to supervise

Ideal Solution

Customers need a supervising and exploring tool of student's behavior during learning process and taking the online exam

It allows them:
- Make sure an exam result reflects student's knowledge
- Obtain information of student's behavior during online lecture
- Improve e-learning courses

Desired Outcomes

Universities educate more students using e-learning technologies without loss of quality.

MOOCs increase amount of students successfully finishing the course

Corporations analyze engagement into e-learning process to increase outcomes

- Ensures exam results reflect a student's knowledge
- Student behavior analytics from online lectures can be used tangibly improve e-learning courses
- Reduces proctoring costs by 3-5 times

EXAMUS

We aim to help customers improve quality of education globally providing them with extremely flexible and cost effective online proctoring service.

Win Results

Distant Exams in the Corporate University

Since 2017, Examus has been used to conduct entrance and final online exams at the Corporate University of Sberbank.

- 1-year-deal
- More then 6 000 exams
- All over the Russian Federation

The level of differentiation of real knowledge of students has decreased and the effectiveness of training programs has increased.

Satisfaction with the process of assessing knowledge has increased. Students noted that the results of the examinations became more fair.

The results of examinations significantly changed the profile of the listeners, indirectly confirming the assumptions about mass cheating in some units.

Customer Success Stories

HSE using Examus from 2016 simultaneously on the National Open Education Planform and for HSE's student on the Moodle platform. Have launched online-exams for international applicants.

Examus providing proctoring Service for exams on the National open education platform since 2016. Examus guarantees student's identity during finals. This allows the platform's partners to rely on platform's student's verification.

Scalability

Examus technologies enable to University to scale abroad and to attract more and more students. For students it's a plus too – they can pass exams in their places even in their countries.

Flexibility

Examus provides about 30 types of proctoring – it allows you to choose the most convenient way to arrange the exams.

Usability

It's so easy to start the proctored exam both for student and for educational establishment. Furthermore, thanks to smooth integration student passes exams in a familiar environment of University's LMS.
