

PROTECT YOUR DYNAMICS 365 CRM CONTENT—ALL FROM ONE SERVICE.

Dynamics 365 Backup & Recovery

Comprehensive Backup

An unlimited backup service for all your Dynamics 365 content, ensuring your business-critical entities, records, forms, and field attributes are fully protected without losing associated metadata.

Recover in Minutes, Not Days

Without having to pick up the phone to schedule restore windows, you can granularly restore your Dynamics 365 entities and records to ensure your business keeps moving forward.

Encrypted & Secure Data Protection

AvePoint Cloud Backup for Dynamics 365 is hosted on the cloud, utilizing Microsoft Azure Encryption in conjunction with user account security to ensure compliance around highly sensitive data.

The Most Complete Cloud-to-Cloud Backup Solution

AvePoint Cloud Backup for Dynamics 365 is the industry's most complete cloud-to-cloud backup solution for Dynamics 365. With unlimited, automated backups, and secure storage in AvePoint's Azure storage, or your own cloud, you just decide how much to recover, and when. On-demand and granular, item-level restore provides anytime access for critical entities, records, forms and field attributes.

COMPREHENSIVE BACKUP

- Near-zero configuration for daily backup plans.
- Robust capacity options ensure your backup process starts automatically and runs up to four times a day (or every 6 hours).
- In conjunction with automatic daily backups, you can schedule additional backups with just the click of a button.
- Audit-based backup and recovery will capture all changes made within the point-in-time, 4x's daily backup window for up-to-the-minute recovery of all changes.
- Protection for all Dynamics 365 content with all associated permissions and metadata fully maintained.
- Built-in business rules and filters enable you to guickly choose which content you want to restore.
- Store backups in our default, or your own Microsoft Azure Storage, or any data destination accessible via Secure File Transfer Protocol (SFTP).
- Further safeguard your data from cyberattacks or leakage by bringing your own Microsoft Azure Key Vault Encryption Key to meet compliance regulations around sensitive data.

GRANULAR RESTORE

- Quickly restore data at entity, record, or field level to eliminate business interruptions.
- Restore all content in Dynamics 365 with metadata, properties, and permissions fully maintained.
- Prioritize or focus on entities and records for targeted rollback of content based on properties, including content owner, date created, date modified, and more.
- Empower the flexibility to restore—or not restore—the related items tied to the records to ensure that system data maintains integrity.
- Recover quickly with time- or object-based restores by locating business-critical entities or records with full-text search capability for rapid discovery.
- Comparison view provides visibility into how your Dynamics 365 entities and records have changed over time, making it easier for you to restore data from the right backup.
- View and manage the protection status of all Dynamics 365 items through a single reporting interface.
- End users can rollback and recover accidental changes directly from the Dynamics interface.
