# Federal GovCloud
DevSecOps Platform

FedRAMP Ready

Expedite agency Authority to Operate (ATO) approval process.

Turnkey Platform

End-to-end security and support throughout the software development lifecycle.

Cloud Agnostic

Customers can deploy their application with any Cloud Service Provider.

Why FedGovCloud DevSecOps?

One common platform with continuous delivery and continuous integration where development, security and operations can achieve critical mission outcomes.

- ✓ **Built for government** to deliver and release applications faster and with higher quality.

- ✓ **Integrated toolchain** that enables end-to-end security and compliance.

- ✓ **Landing zone agnostic.** Automatically and securely deploy your application anywhere.

Modern Agile Secure Development

The Federal GovCloud (FGC) DevSecOps Platform-as-a-Service is FedRamp Ready at moderate impact level. U.S. federal government agencies use the platform to integrate agile, iterative, and secure development practices.

The platform brings together best-in-class tools to enable federal agencies to develop their applications faster to any landing zone. Explore how we enable secure source code management, agile and CI/CD processes, infrastructure and configuration management, static code vulnerability scanning, dependency analysis, blackbox/red team validation tools and more!
