

# Enterprise Skills Initiative content portal by Learn on Demand Systems

## Using the ESI content portal hosted by Learn on Demand Systems

The Enterprise Skills Initiative (ESI) helps sharpen your technical skills and knowledge of Microsoft platforms and solutions.

Some ESI classes provide access to labs and other content (such as videos, slide decks, surveys, and more) through a portal hosted by Learn on Demand Systems (LODS) on behalf of Microsoft. This document contains information about how to use that portal.

If you have any technical issues with the Enterprise Skills Initiative Portal hosted by LODS, please go to [ESI support](#).

*This document is available in the following languages. The English version always has the most up-to-date information.*

## Accessing your class content

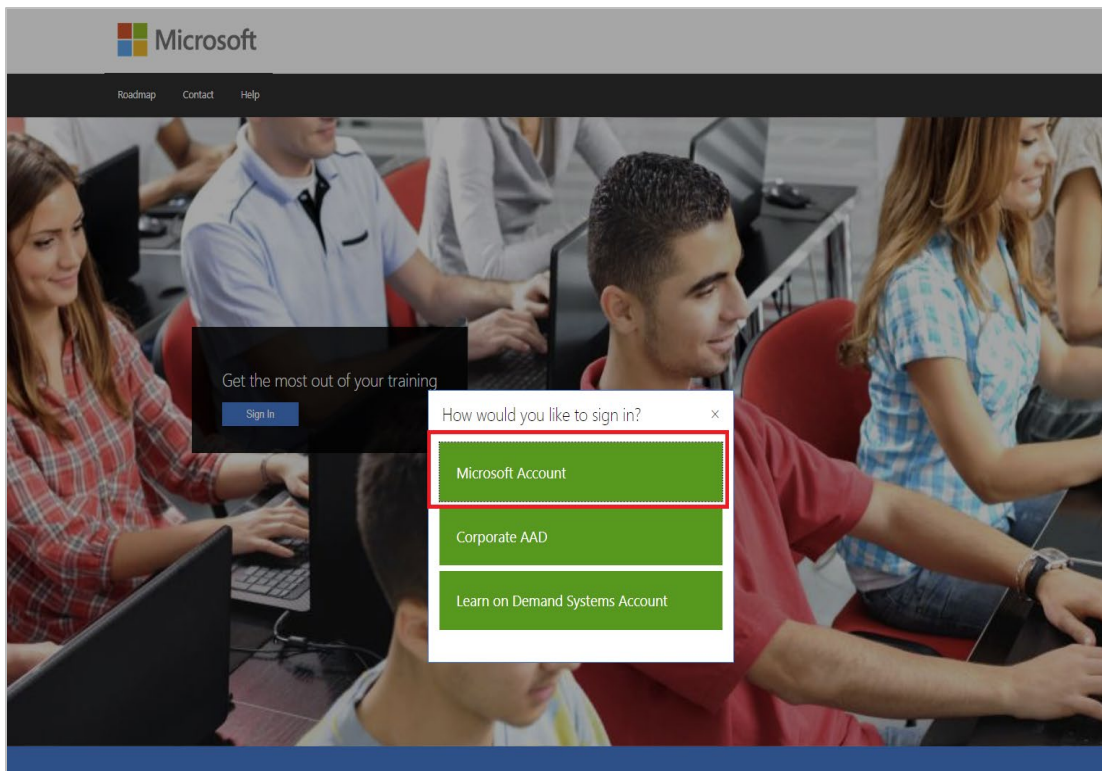

On the day your class is delivered, your instructor will provide you with class-specific access information, including the sign-in URL and the event training key for your class.

To get started, using an HTML5-compliant browser, go to the sign-in page for the Enterprise Skills Initiative Portal hosted by LODS: <https://esi.learnondemand.net/>.

1. To get started, select **Sign In**.

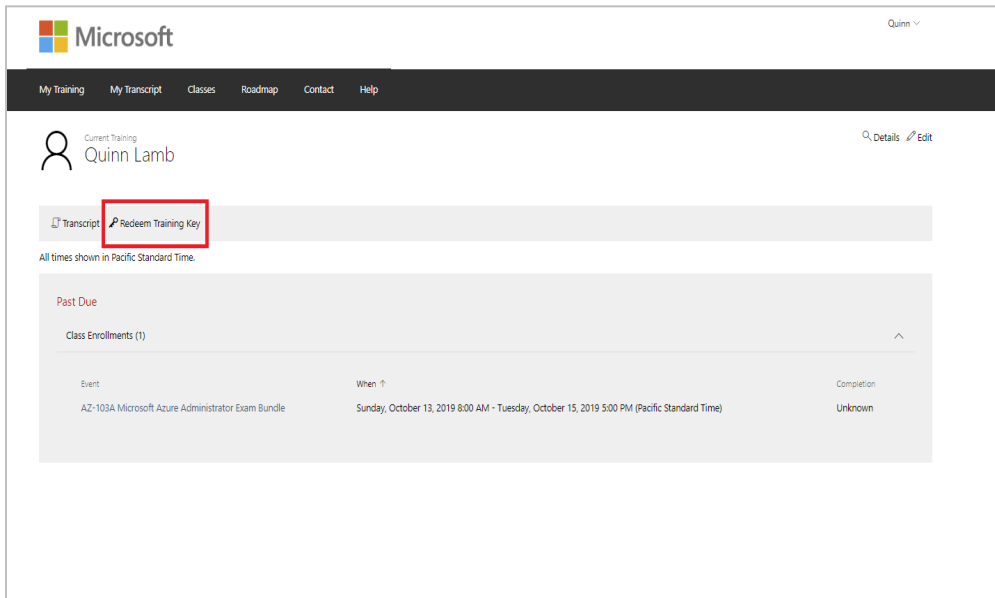

2. Select **Microsoft Account**.

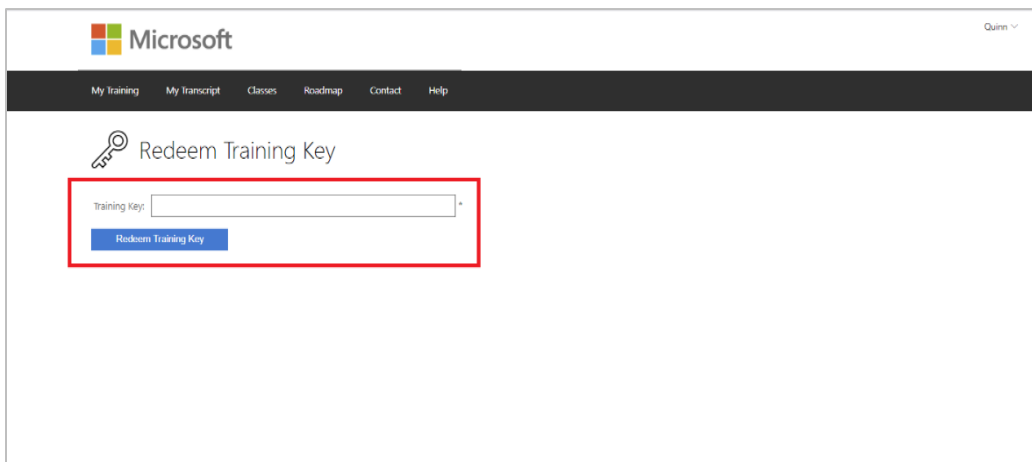

3. After you sign in, the Current Training page opens.

4. To redeem the event training key, select **Redeem Training Key**.

5. Enter the event training key that your instructor provided, and select **Redeem Training Key**.

This opens the class page with the list of labs and any additional content for the course (if available), including videos, slide decks, surveys, and other materials.

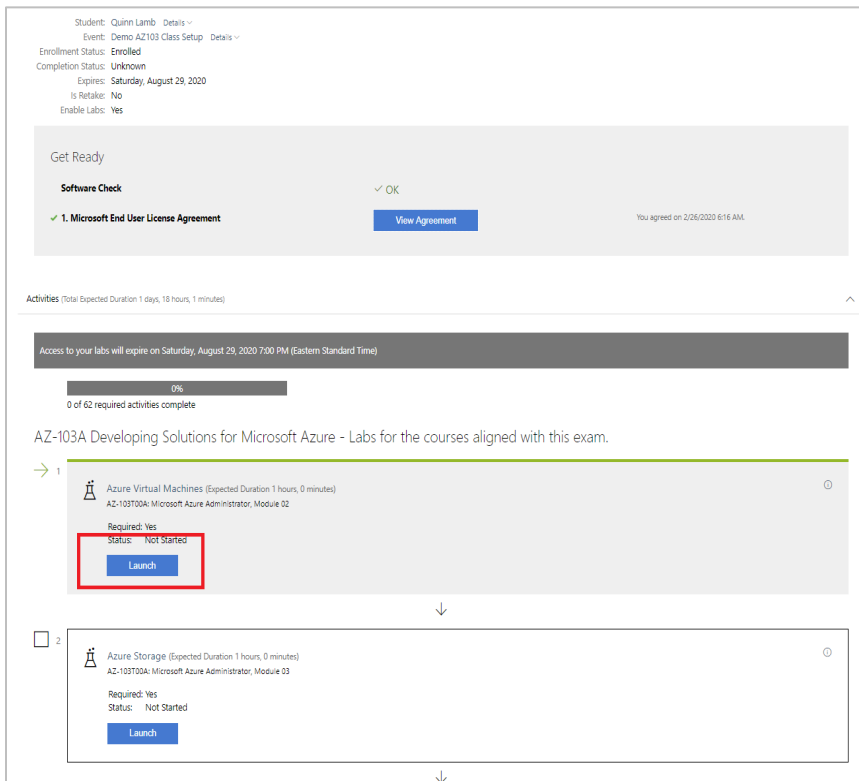

- Before you can launch the labs, you'll be prompted to read and accept the Microsoft EULA. Select **View Agreement**.

The screenshot shows a user interface for a course titled "Quinn Lamb Demo AZ103 Class Setup". Under the "Get Ready" section, there is a "Software Check" area with an "Alert" icon and a "View Agreement" button highlighted with a red box. Below this, a progress bar indicates "0% of 62 required activities complete". A list of activities is shown, including "Azure Virtual Machines" and "Azure Storage", both with a status of "Not Started".

- When you've reviewed the Microsoft EULA, to agree to its terms, select **Agree**.

This screenshot shows the same interface as the previous one, but with a "License Agreement" dialog box overlaid. The dialog box contains the text: "This virtual environment is the copyrighted work of Microsoft or other providers and is licensed, not sold. Any reproduction or redistribution of the virtual environment is expressly prohibited by law. Your access to and use of the virtual environment is governed by these terms and conditions ('T&Cs'). By accessing a virtual environment in any way, you agree to be bound by these T&Cs. If you do not agree, do not access or use the virtual environment." Below this text, there is a bulleted list of terms, including: "You will have a unique user ID and password that will enable you to access the virtual environment associated with your subscription. You may not share, disclose or transfer your user ID or password with or to any third party. If you believe...". At the bottom of the dialog box, the "Agree" button is highlighted with a red box, and the "Cancel" button is also visible.

8. After you agree to the EULA, **Launch** buttons appear next to the labs. To access the lab interface for a specific lab, select **Launch**.

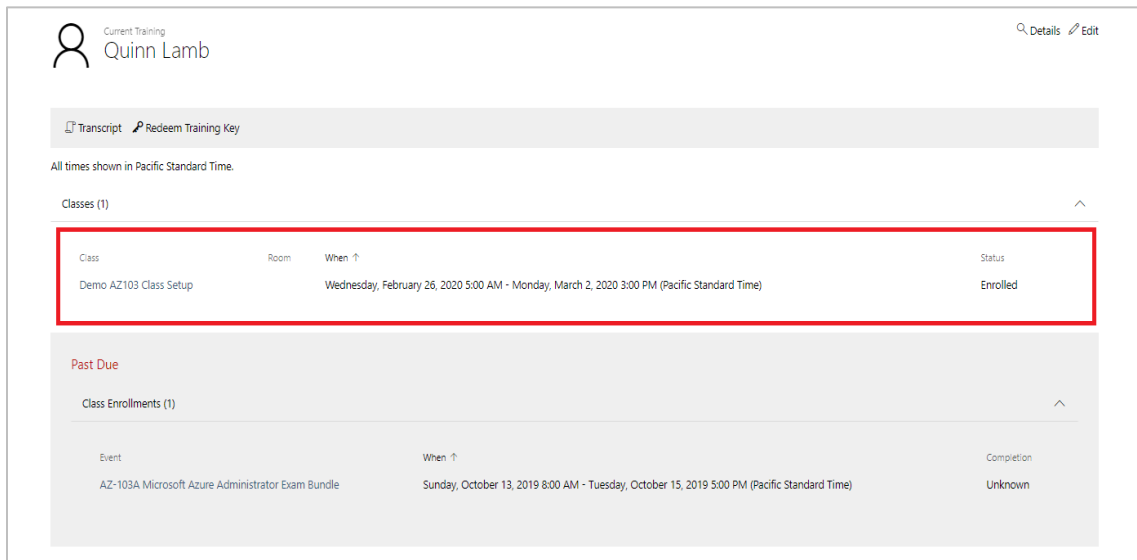

The screenshot displays the Microsoft Learning interface for a student named Quinn Lamb. At the top, it shows enrollment details for the 'Demo AZ103 Class Setup' event, including the enrollment status (Enrolled), completion status (Unknown), and expiration date (Saturday, August 29, 2020). Below this is a 'Get Ready' section with a 'Software Check' that is marked as 'OK'. A '1. Microsoft End User License Agreement' is listed with a 'View Agreement' button and a timestamp 'You agreed on 2/26/2020 6:16 AM.'.

The 'Activities' section shows a progress bar for '0 of 62 required activities complete' and a warning that 'Access to your labs will expire on Saturday, August 29, 2020 7:00 PM (Eastern Standard Time)'. Below this, the course 'AZ-103A Developing Solutions for Microsoft Azure - Labs for the courses aligned with this exam.' is listed. Two lab activities are shown:

- Activity 1: 'Azure Virtual Machines (Expected Duration 1 hours, 0 minutes)' with ID 'AZ-103T00A: Microsoft Azure Administrator, Module 02'. It is marked as 'Required: Yes' and 'Status: Not Started'. A red box highlights the 'Launch' button.
- Activity 2: 'Azure Storage (Expected Duration 1 hours, 0 minutes)' with ID 'AZ-103T00A: Microsoft Azure Administrator, Module 03'. It is also marked as 'Required: Yes' and 'Status: Not Started', with a 'Launch' button.

When you return for subsequent training days for the class, sign in with the same method and account as you did at the beginning of the class. On the Current Training page, in the list under **Classes**, find your class. To resume class activities, select the link for your class.

You can also see classes you've previously taken. If the post-event access window is still open for one of those older classes, to access its labs, select it from the class list.

The screenshot shows a user profile for Quinn Lamb under the heading "Current Training". At the top right, there are links for "Details" and "Edit". Below the profile name, there are two tabs: "Transcript" (selected) and "Redeem Training Key". A note states "All times shown in Pacific Standard Time." The main section is titled "Classes (1)" and contains a table with one row highlighted by a red border. Below this, there is a "Past Due" section titled "Class Enrollments (1)" with a table containing one row.

Class	Room	When ↑	Status
Demo AZ103 Class Setup		Wednesday, February 26, 2020 5:00 AM - Monday, March 2, 2020 3:00 PM (Pacific Standard Time)	Enrolled

Event	When ↑	Completion
AZ-103A Microsoft Azure Administrator Exam Bundle	Sunday, October 13, 2019 8:00 AM - Tuesday, October 15, 2019 5:00 PM (Pacific Standard Time)	Unknown
