Modern Data Platform - Need for NextGen Analytics

"Data and analytics are at the center of every competitive business". In the current state of businesses, the existing hybrid data landscape is evolving to be hyper distributed, posing the challenge to manage, maintain, and consume data. Every organization, aspiring to be data-driven, has a key mandate to extract insights from their data and derive faster business impact. It raises the need for a Modern Data Logistic Platform to mitigate the following enterprise challenges -

Connectedness for
Hyper Distributed
Environment

Driverless ETL
processing

Highly Scalable &
Available on any
hybrid infrastructure

Enabled for Cloud
Adoption strategies

Extensibility for
Custom code

Modular Architecture
with Technology
Abstraction

Enterprise Governance
& Security

Time-to-adopt and
Ease-of-use

LTI's self-served and unified data engineering platform - Mosaic Decisions harnesses valuable data to generate actionable insights, which accelerates the business outcomes and enhances the quality and speed of decision-making. Equipped with capabilities such as data ingestion and data processing integrated with enterprise's storage, governance, and security on a hybrid, hyper distributed scalable infrastructure.

mosaic decisions - Benefits

Data Engineer

Ease of Use

Simplifies modern data logistics need using an easy-to-use platform with drag-and-drop like features to facilitates rapid development cycles

Collaboration & Control

Effectively manage, govern, and collaborate by sharing data workflow, data assets across the teams

Extensibility

Prebuilt data connector library reducing the effort to connect & ingest data in varied formats to different storage systems, coupled with the capability of extending the runtime engine for data pipelines

Scalability

Provides server-less, auto-scaled architecture with on-cloud, and on-premise infrastructure deployment

Data Scientists / Business Analysts

Out-of-box Data Profiling

Readily available data profiling on defined sample size data simplifies statistical analysis and modeling

Self-serve Data Preparation

This helps reduce dependency on IT and elevates the feature engineering activities

Collaborative Workbench

Coupled with data featuring pipelines capabilities and integrated machine learning workbench

IT Executives

Reusing Investment

Maximize ROI with platform capability and provide a competitive edge as an organizational capability

Accelerated Decision Making

Facilitates impactful business decisions by analyzing diverse data and addresses the future-proofing of technology stack

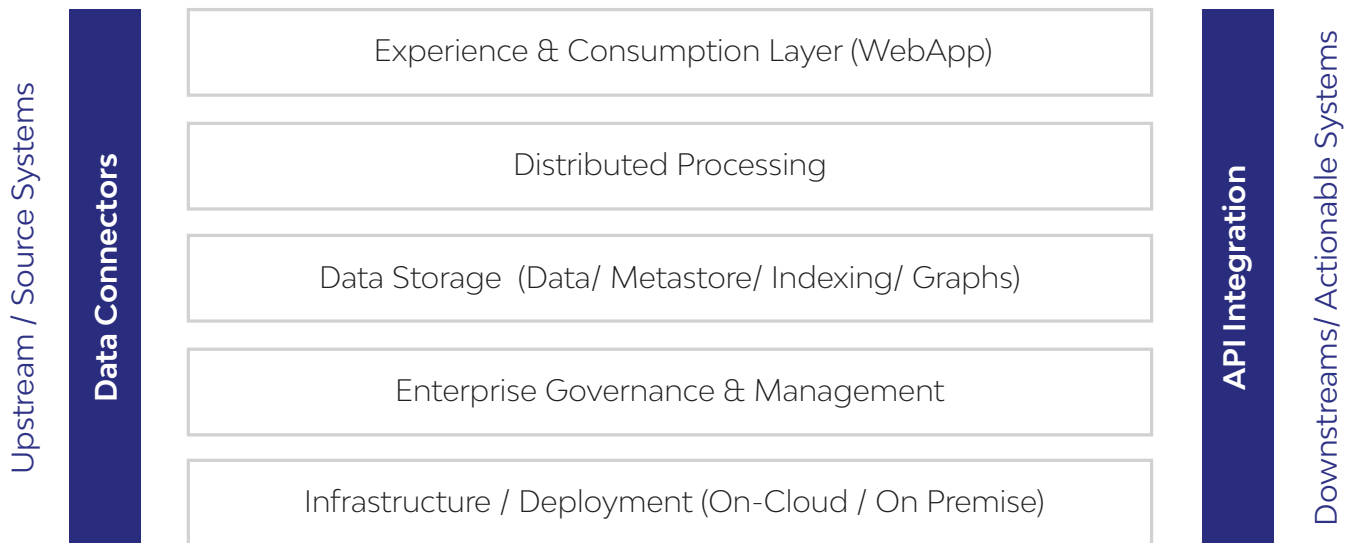

Reduced Time-to-Market

Ability to quickly respond to business demands around data and insights

Reduced Total Cost of Ownership

Managing variation of workloads with scalability & availability of manage the cost of the environment and the cost of skilled resources

Product Architecture -

Deployment Options

Flexibly deploy on cloud or on-premises

LTI (NSE: LTI, BSE: 540005) is a global technology consulting and digital solutions Company helping more than 420 clients succeed in a converging world. With operations in 32 countries, we go the extra mile for our clients and accelerate their digital transformation with LTI's Mosaic platform enabling their mobile, social, analytics, IoT and cloud journeys. Founded in 1997 as a subsidiary of Larsen & Toubro Limited, our unique heritage gives us unrivaled real-world expertise to solve the most complex challenges of enterprises across all industries. Each day, our team of more than 30,000 LTIites enable our clients to improve the effectiveness of their business and technology operations, and deliver value to their customers, employees and shareholders.
