

# AI Assisted Cataloging For Marketplaces

TRY DEMO

## HOW YOU BENEFIT

Reduce Time To Market  
By Upto 80%

Catalog Once, Convert  
To Any Taxonomy

Eliminate Errors In  
Cataloging Process

Improve Discoverability  
On Marketplaces

## FEATURES

### AI Generated Tags

Category relevant tags are automatically generated by the AI using our fashion intelligence platform, saving almost 90% in tagging time.

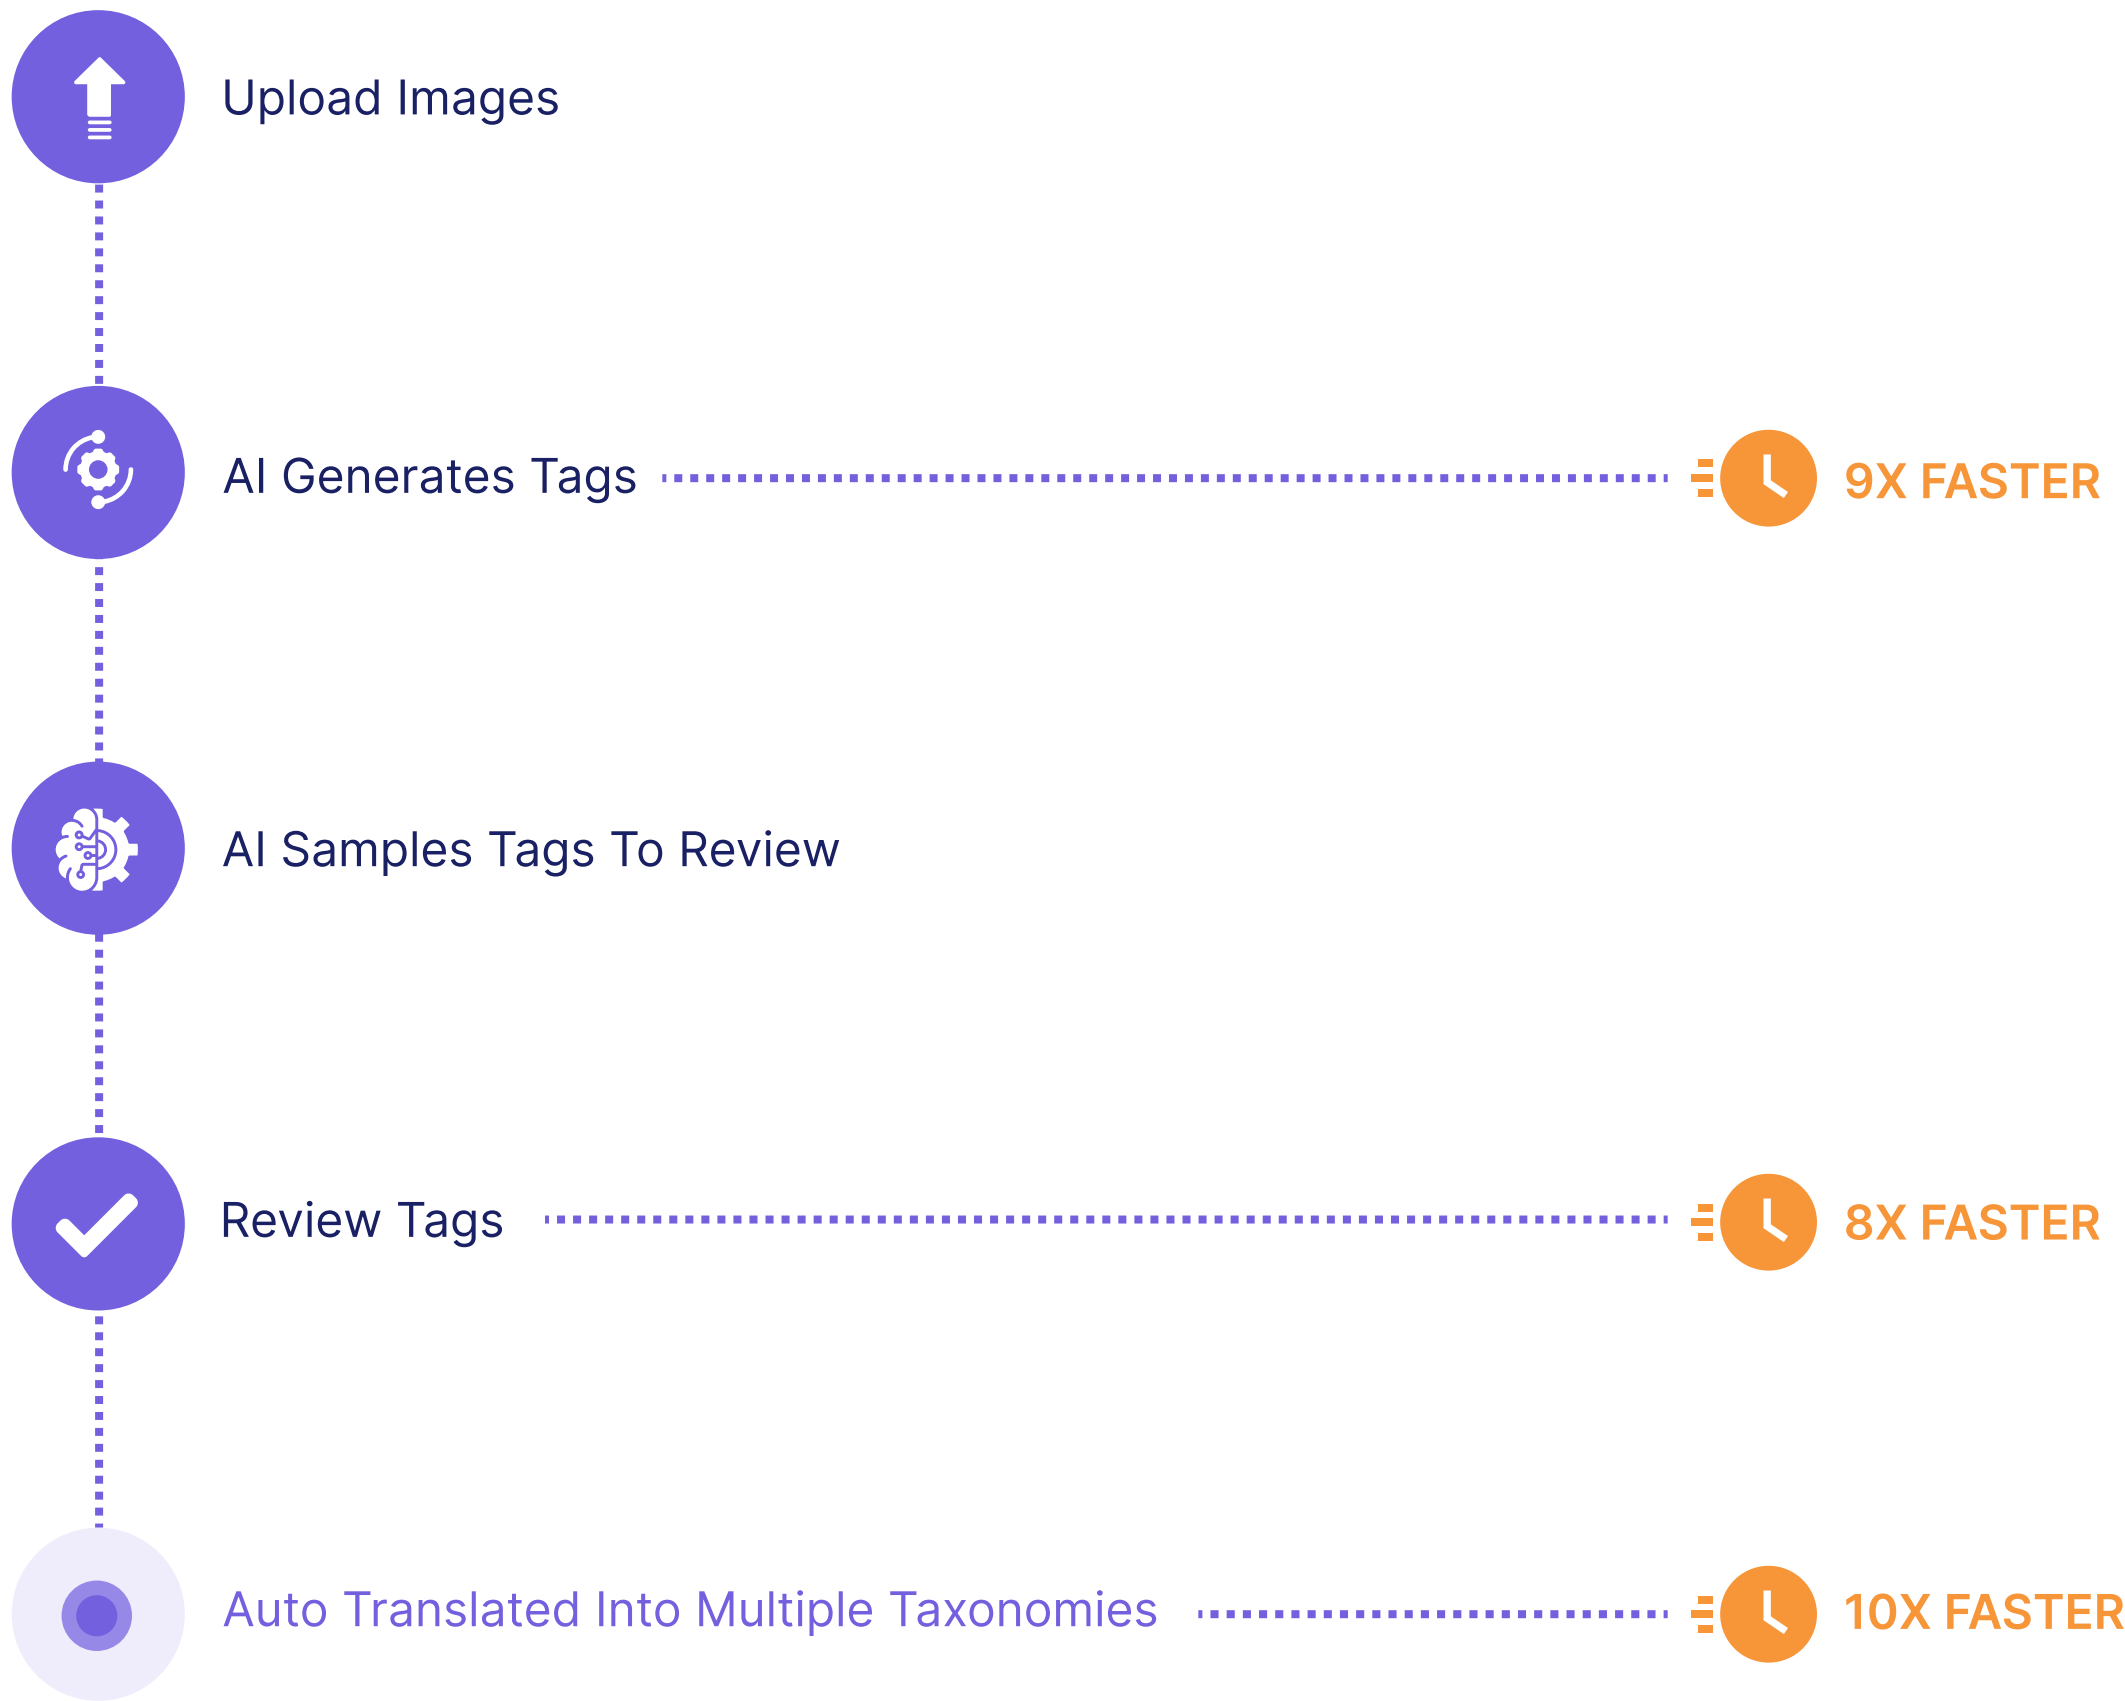

### Batch Upload

Upload images or a CSV file in batches of upto 50 products and complete tagging in a few minutes. You can upload unlimited batches.

### Catalog Once, Convert to any Taxonomy

Export the data into your own taxonomy or any of the supported marketplace formats. We support 10 marketplaces as of today.

## HOW IT WORKS

## TECHNOLOGY BEHIND

### AI To Human Handover

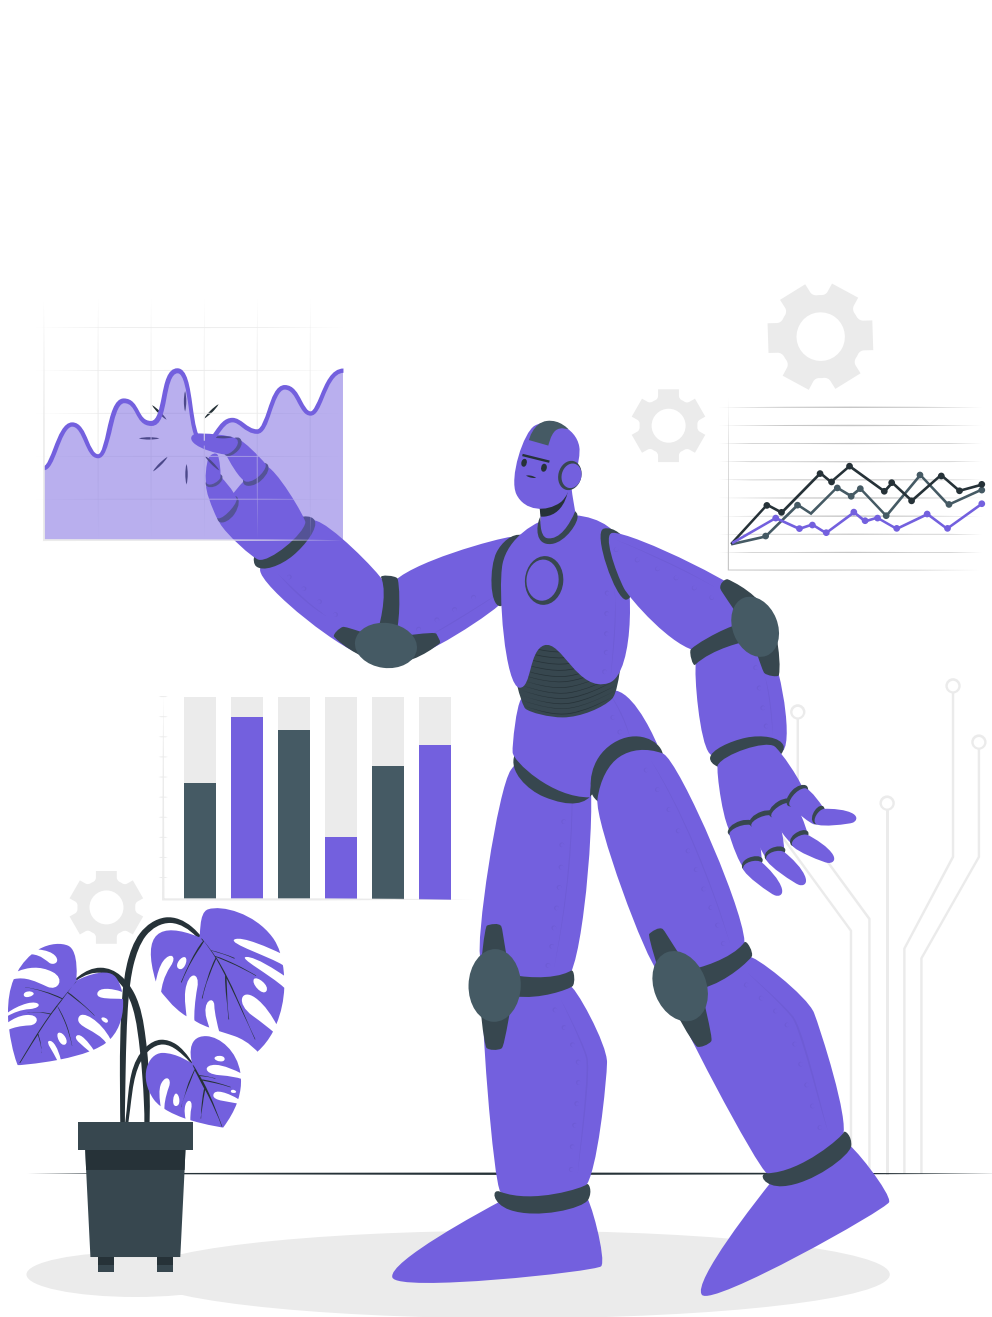

We use Self Evaluation Networks to auto-highlight scenarios where the AI generates wrong tags

### Online Learning

The AI takes feedback and learns from it on the fly without depending on large volumes of data

### Fine Grained Classification

Fashion optimised AI that captures more than 2000 intricate design details
