SCHOOL DAY

Microsoft Partner

Education: Student wellbeing the most burning issue in education today.

School Day enables schools and districts to identify areas in student wellbeing and social and emotional skills that need attention and improvement. Our anonymous wellbeing data supports decision-making in schools and districts, empowering the school community to focus on learning.

CHALLENGES

Too many students face problems with anxiety, wellbeing and mental health. Superintendents, principals and teachers lack data and analytics to improve wellbeing and SEL.

IDEAL SOLUTION

Wellbeing and SEL Improves Learning Results. Data and analytics identifying areas in student wellbeing and social and emotional skills that need attention and improvement. Also highlighting the positives.

DESIRED OUTCOMES

Supporting schools and districts for efficient prioritizing and informed decision-making, reduces administrative work, cuts drop-out rate and improve GPA.

School Day

School Day Wellbeing

Combining kindness with unique AI to help schools and districts develop their school climate by identifying areas in student wellbeing and social and emotional skills that need attention and improvement.

Students

Wellbeing voice. Self-awareness to promote empathy and engagement. Leading to better learning outcomes and results.

Teachers

Real-time insights on class wellbeing. Support to guide teaching, pedagogical decisions and early interventions. Leadership based on facts.

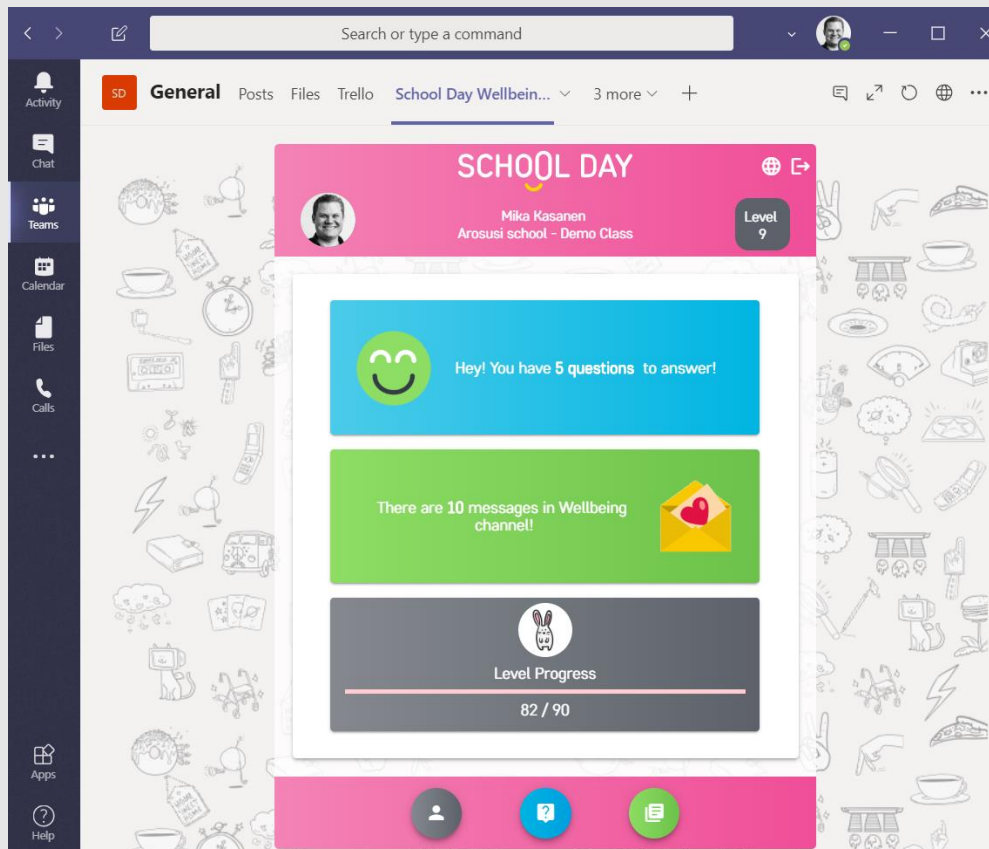

Schools and district leaders

Leadership based on silent knowledge and data, instead of gut feeling. Holistic school culture change.

School Day Microsoft Teams

Seamless Teams integration. Asking wellbeing and social-emotional questions from students every day through **School Day Teams App**. Providing teachers real-time insights for light-touch classroom interventions through **School Day Teams Insights**. One platform for school wellbeing and social-emotional learning.

EASY ONBOARDING

Hassle-free school, class and student onboarding with 0365 authentication and Graph API features.

USER ENGAGEMENT

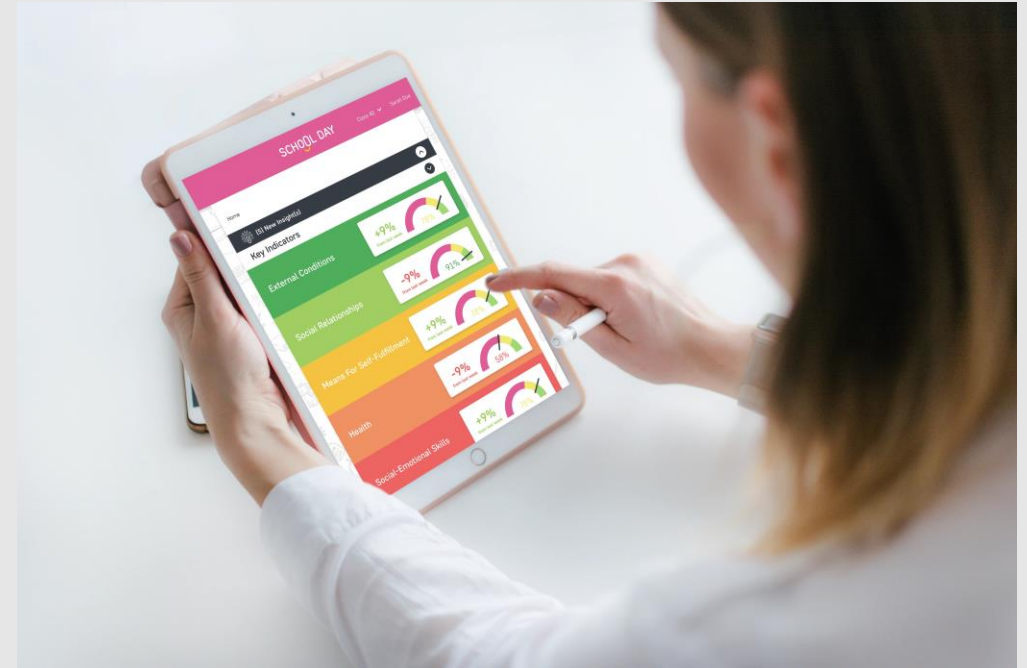

School Day daily questions part of the school day. No need for other platforms and applications. Improving student and teacher engagement and retention.

INSIGHTS AND ANALYTICS

Real-time insights and light-touch intervention recommendations provided through Teams chat and notifications. Positive encouragement messages to students.

Customer success: Helsingin Suomalainen Yhteiskoulu (SYK)

SYK is an independent grade 3-12 co-educational school founded in 1886 and located in Helsinki. The school has always focused on student wellbeing and social-emotional skills. School Day is an essential platform to amplify student voice to improve whole-school wellbeing together with students, teachers and parents.

Greetings in the morning up by 60%

Small things matter. Students were not greeting each other in the morning. With School Day the school was able to start a discussion of feeling welcomed to the school in the morning.

User activity 75%

Students value that the school is interested in their wellbeing and emotions. School Day Wellbeing provides a safe and anonymous platform for all students with high engagement.

Focus on leadership and teaching

More time for leadership and teaching. Decisions and intervention model based on data and facts instead of gut-feeling.
