

# 10 REASONS WHY: BANKING & TREASURY AUTOMATION WITH SK GLOBAL SOFTWARE

Ten reasons to choose the SK Global Software &  
The Banking & Treasury Automation Suite

1. **You have things to do...** apologizing for data entry errors shouldn't be one of them. Automate file creation, uploads to the bank & data entry in your ERP, and see significant error reduction and time savings.
2. **You need protection** - No one has time for security breaches & troubleshooting fraud. Enjoy additional features that reduce internal vulnerabilities as well as external fraud. We send and receive files every day, while providing the peace of mind you need.
3. **You won't even know we are there.** Our solution is written in the native code and designed to look and act like your Microsoft Dynamics 365/Dynamics AX system. We don't aim to re-create what is already there, we simply enhance it and add more value with our feature set. We maintain current releases to deliver long-term support. Our software is certified for Microsoft Dynamics AX2012 and in AppSource for Microsoft Dynamics 365 for Operations.
4. **Automation is our foundation.** From design to delivery, our mission is to develop software that brings our customers as close to fully un-attended, fully automated processing as possible.
5. **We help you configure, not customize.** We deliver a commercial product to be configured for your business needs, vastly reducing the need for special customizations that require ongoing development knowledge and upkeep. Our roadmap is driven by customer demand. As we meet that demand, we enhance one suite available to everyone.
6. **We scale with you.** We have over 1,500 customers across many industries, varying from domestic companies with single-bank setups to multi-national enterprises with sophisticated banking & treasury requirements. Our solution can help finance teams both small and large.
7. **Any Bank, Any Format, Anywhere...** We have a large library of bank integrations and support many popular banking formats & file types around the world. If we don't have your format in our library, we'll build it for you - for free.
8. **Every department wins.** Our suite includes modules that streamline cash management, AP payments, AR cash application, collections and credit card processing. We deliver time and money savings to the entire finance team.
9. **We maintain strong partnerships.** We sell our software through the Microsoft Dynamics partner channel. Our reputation for being easy to work with is a foundation of our success and we're happy to either lead our implementations or work with your partner to ensure your success.
10. **We Are Experts.** We bring with us over 20 years of experience building banking automation software as a Microsoft partner. We are passionate about empowering finance teams and delivering big value along the way.
