

Dynamics 365 Business Central bcPacknShip

PRODUCT OVERVIEW

bcPacknShip brings enhanced parcel and pallet packaging capabilities to your Microsoft Dynamics 365 environment. In addition, the solution supports integrated technologies such as barcode scanning and electronic scales, bringing further efficiencies to your warehouse.

BENEFITS

- Pallet and parcel packaging
- Optimized packing and shipping processes
- Integration with Business Central's warehouse module
- Compatible with UCC/EAN logistics label printing

KEY PRODUCT FEATURES

Simplicity

Pick items, package them into parcels and pallets, and ship them from your warehouse, all with a single user interface.

Flexibility

Fully supports any Business Central warehouse setup, from basic shipping to advanced bin controlled picking environments.

Visibility

Packages and shipping batches can be easily linked to posted Business Central shipments, allowing you to quickly obtain the details of a particular activity.

REQUIREMENTS

Microsoft Dynamics 365 Business Central

Ship Smarter

Let your ERP system reflect the way you pack and ship your products.

bcPacknShip greatly expands upon Dynamics 365 Business Central's warehousing capabilities by allowing you to pick and pack individual parcels, cartons, or pallets against a single shipment. Each package you create is unique, giving you the ability to track data at a greater level of detail than ever before. Standard processes become streamlined, as necessary picking and shipping activities are automatically created behind the scenes and managed through a simple, intuitive user interface. In some warehouse environments, pack scanning features can further streamline these tasks, allowing for instantaneous package creation through the entry of the proper identification number.

As packages are created in bcPacknShip, they can be added to shipping batches, allowing for enhanced management options for your pending shipments. bcPacknShip makes it easy for you to print content lists and labels for packages prior to shipping. And if there are issues with a particular package, it can be placed on hold and removed from the shipping process until the problem is resolved. All these tools allow you to easily manage your shipping processes, getting your products out the door and to your customers as quickly as possible.

Manage the packing of sales items into multiple cartons or cases, with full insight into the exact contents of every package.

Enhanced Features

bcPacknShip introduces new shipping features to Business Central:

- Set up item-specific packing parameters to ensure that the proper package type, weight and size limitations, and packaging hierarchy level is assigned as items are being prepared for shipment.
- Combine smaller packages such as individual boxes or cartons into larger groupings such as pallets, which can in turn be aggregated into even larger containers, all while maintaining full visibility into the content of each packaging level.
- Assign default billing rules for freight and handling to shipping agents and customers, then instruct Business Central to automatically calculate them on shipments.

About Us

For over 30 years, we have been providing enterprise software and professional services to clients of all types and sizes throughout the world, from startups to multibillion dollar companies. With applications based on the most modern ERP (Enterprise Resource Planning) system available today, Microsoft Dynamics 365 Business Central, our goal is to assure that our solutions reflect the way you do business.
