

## Connect your phone services to the new world of Microsoft Teams

Call2Teams for Trunks is a global Cloud platform that connects SIP Trunks into Teams and can be configured in a few minutes.

**Configuring and using Direct Routing for Microsoft Teams is often thought to be complicated and expensive. With Call2Teams, companies can be up and running with their existing carrier in a few minutes, no hardware or software is needed. Companies now have an easy route to stay with their current provider as they move from a traditional phone service or PBX, to using Microsoft Teams' built-in Phone System capability.**

### What is Call2Teams for Trunks

Call2Teams will connect existing phone lines, numbers and call bundles to a Company's Microsoft Teams users without any disruption. It's a cloud service that runs in Microsoft Azure and includes a revolutionary set-up process that has automated several days planning, configuration and deployment into a single button click. You can quickly be up and running and have users calling in Microsoft Teams; Call2Teams is an easy way to keep your current phone services, and start to use the full power of Microsoft Teams

### Why Companies use Call2Teams for Trunks

- Start making the most of Microsoft Teams immediately and have the solution when users want Teams calling.
- A managed Cloud service with no set-up or configuration charges, just pay as you go
- Low support overhead, no hardware or software to deploy for the carrier or the customer

### Microsoft Teams is in big demand

- Have the answer when users ask for Calling features in Teams
- Retain current SIP and call rates and numbers
- A new world of end-user benefits and opportunities

**Take advantage of the fastest growing business application in Microsoft's history**

### Remove the complexity of deploying Teams Direct Routing

- Powerful auto-configuration feature for Office 365
- No need for special skills or training for deployment
- Simple to support and great service backup

**The easiest way to provide and support SIP Trunk services for Microsoft Teams**

### Global Enterprise-grade platform

- Deployed in Microsoft Azure across 3 continents
- Enterprise-grade high-availability architecture
- Supports full end-to-end encryption and secure access control

**Use Teams in international and security-sensitive companies**

"We wanted a way to deliver the latest Microsoft Office 365 calling experience to our all our Sustainability Strategists, and needed an enterprise voice platform for all of our business operations. Qunifi's Call2Teams enabled us to deliver a great calling experience to our Office 365 Skype for Business and Teams users without compromising on business tools. And it was set-up in record time."

Taryn Magistrelli. Finance & Operations Manager, Futerra Sustainability Communications
