

Video Conferencing Interoperability with Microsoft Teams

Empower your organization with face-to-face collaboration no matter the location or technology.

Speridian will provide expertise in implementing and enabling your current conference rooms to seamlessly connect to Microsoft Teams video meetings. By leveraging Microsoft Cloud Video Interoperability (CVI), our comprehensive solutions makes it easy for SIP and H.323 standards-based video conferencing systems from vendors such as Cisco, Poly, Lifesize and others, to seamlessly share content and collaborate across platforms, all while staying within the Microsoft Teams interface.

Seamlessly share content and collaborate across

platforms, all while staying within the Microsoft Teams interface. Our solution is able to integrate with standard based telepresence conference room systems and hardware. This allows our clients to repurpose their previous investments while staying up to date with the innovations of Microsoft Teams. Connect with popular collaboration tools like Cisco Unified Communications Manager (CUCM), Google Hangout meet, Amazon Chime and many more. By enabling interoperability for your video conferencing, you can expect reliable, high-performing video experience for both you and your guests while maintaining industry-standard encryption and security protocols.

Solution Benefits:

Flexible Deployment

Whether you need a SaaS based solution, want to deploy it on cloud infrastructure (i.e. Azure, AWS or Google Cloud), or want to run it on-premises, we've got you covered.

Supports Multiple Collaboration Tools

Walk into a Video Conference equipped meeting room and join meetings using the Microsoft Teams interface. Engage with your fellow meeting participants, and easily work in real-time on the same content. Leverage our solutions that could easily integrate with your existing collaboration tools including Cisco Webex, Google Hangout Meet, and Amazon Chime.

Seamless Collaboration

Collaborate through conferencing rooms, web browsers, Microsoft Teams App, and PSTN dialing.

One-Touch Join

Focus on your meetings, not on how to join them. Our One-Touch Join integrates with your company's calendar environment to make joining any scheduled video meeting easier than ever before.

Full Experience

Maintain the full HD audio and video experience, as well as full content sharing between all participants

Get Started:

We offer a free high-level assessment to help you get started, which includes:

1. Assessment of Office 365 Tenant Preparedness (e.g. licenses, Azure AD sync)
2. Assessment of existing environment
