

SNC Mobile

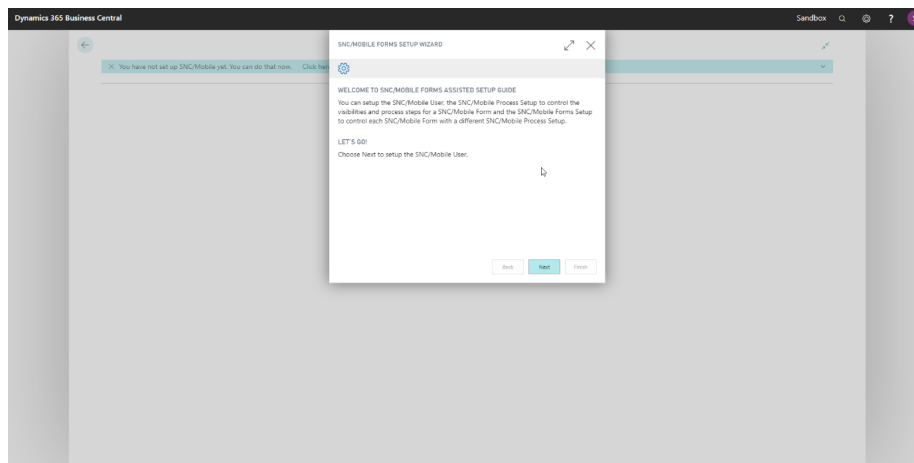

Key Usage Scenarios

Setup

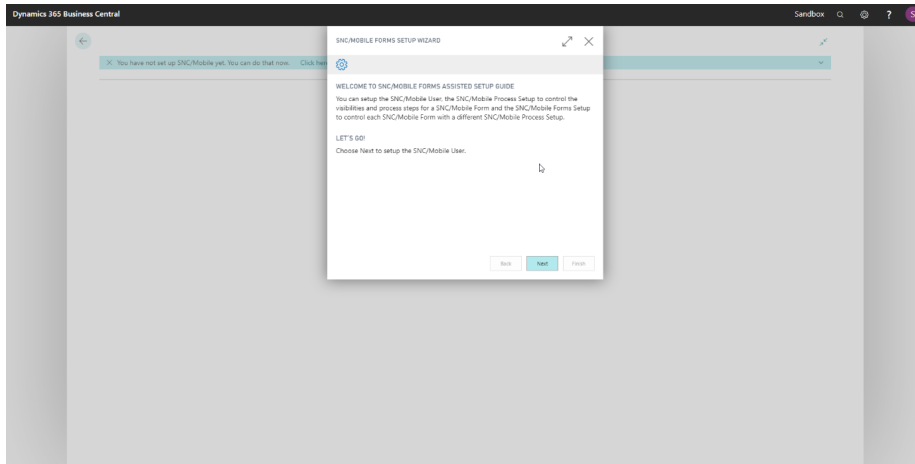

1. Start Setup: Launch SNC/Mobile from Tell Me.

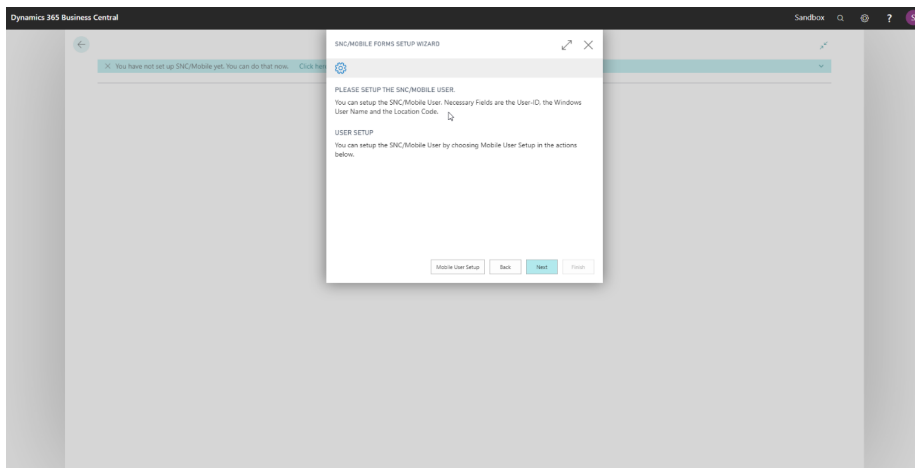

1. Empty Mobile Page Start Wizard: SNC Mobile shows a blank page because it is not setup yet. Click the notification for the setup wizard.

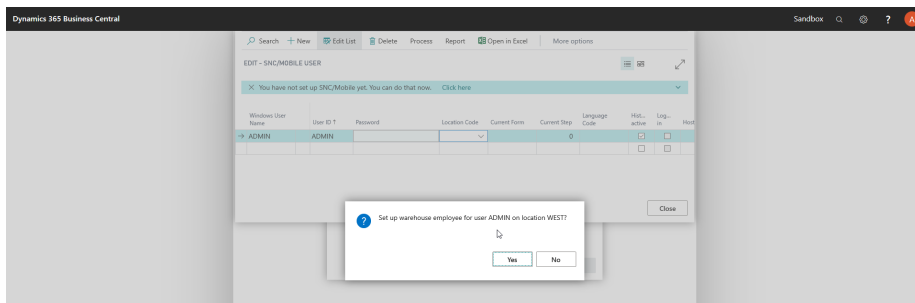

1. Wizard Welcome: The setup wizard welcomes you and explains the upcoming steps.

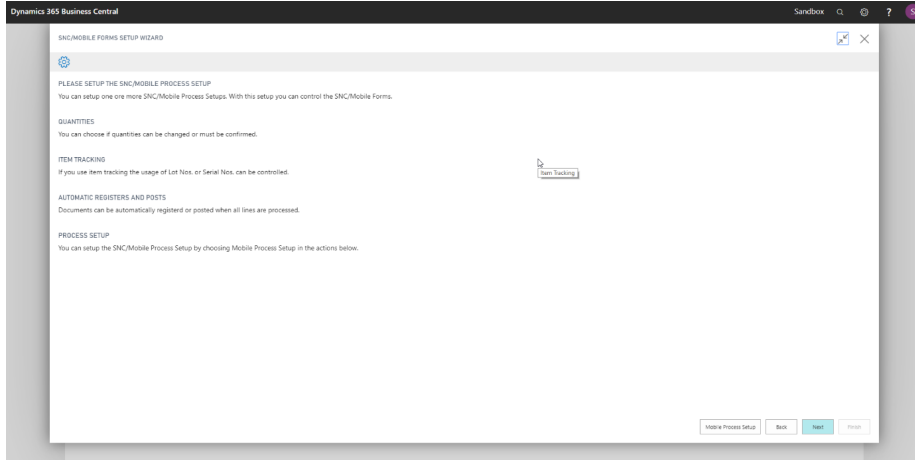

1. Wizard SNC Mobile User

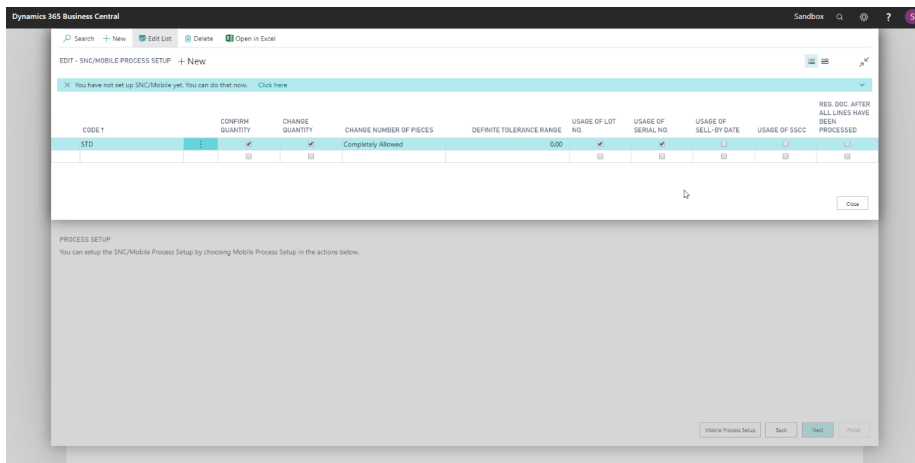

1. User Setup: Define a User ID, select your windows user and a Location Code. If there isn't already a Warehouse Employee for your Windows User in the database, you will be asked to create it.

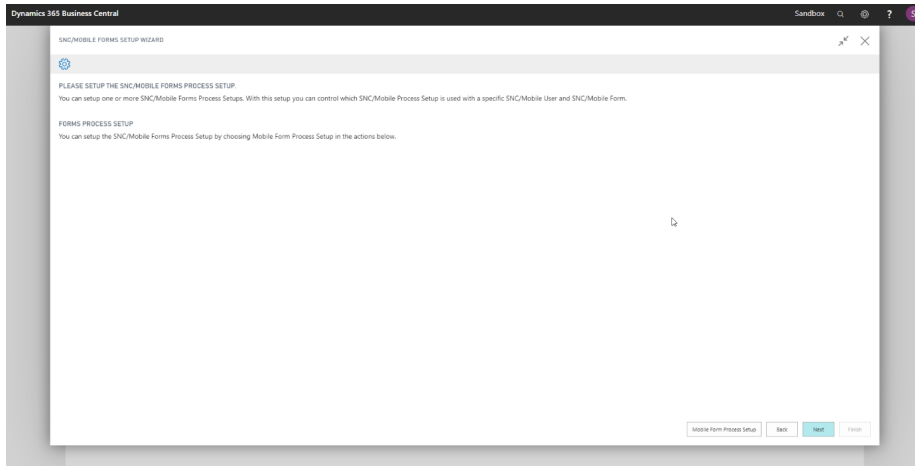

1. Wizard Process Explanation

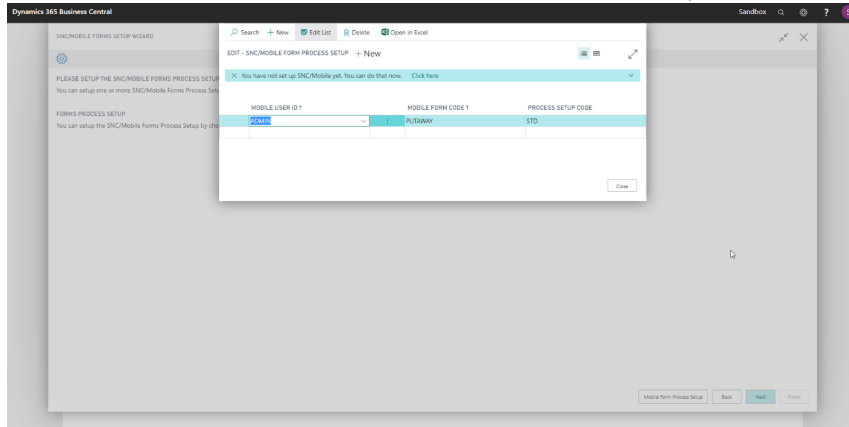

1. Process Setup: Define a Process Code and select the options you would like to use.

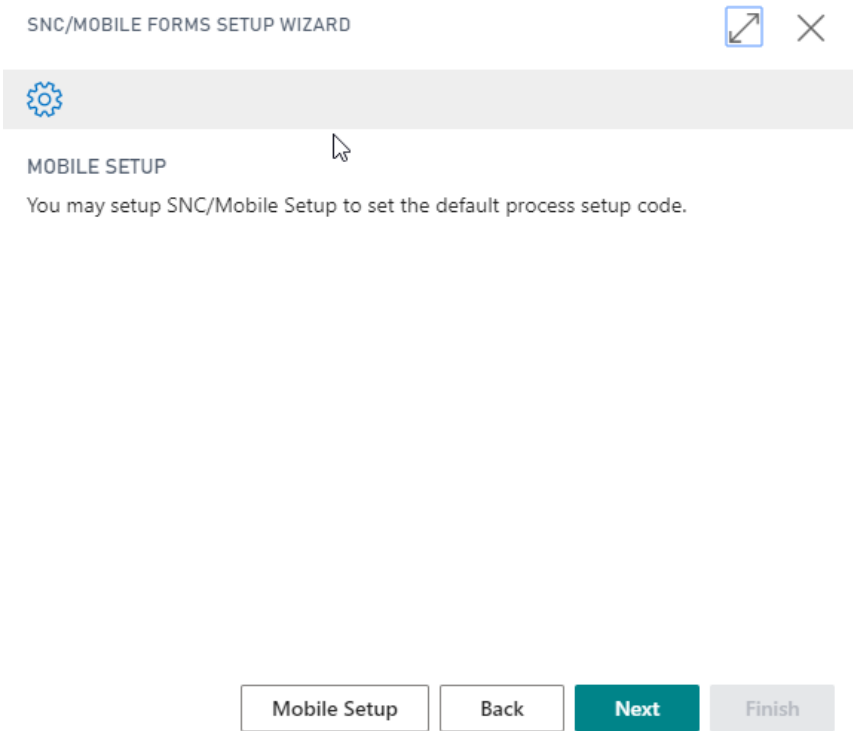

1. Wizard Forms Process Setup

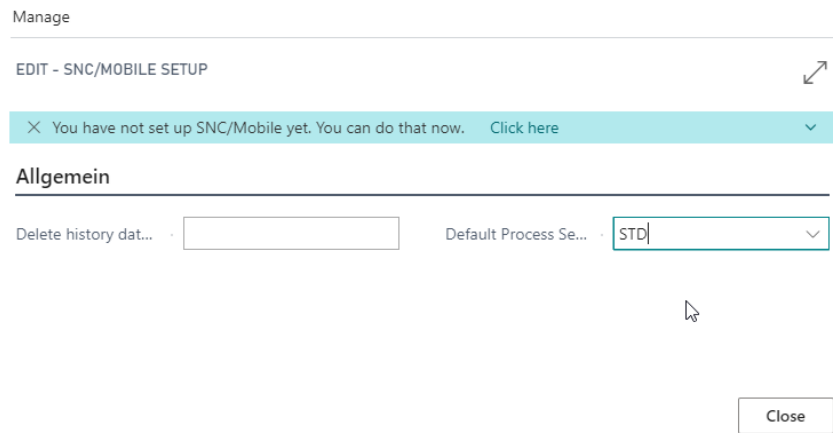

1. Form Process Setup: Select your Mobile User, the form and the Process Code this combination should use. You may also skip this step and define a general Process for all users and forms in the SNC/Mobile Setup.

2. Wizard Mobile Setup

3. Enter the Default Process Setup Code of the Process you want to use as a

global fallback.

4. Wizard Test Locations – for testing purposes you may choose to setup two test locations that work well with SNC/Mobile. If you do not want these locations skip this step.

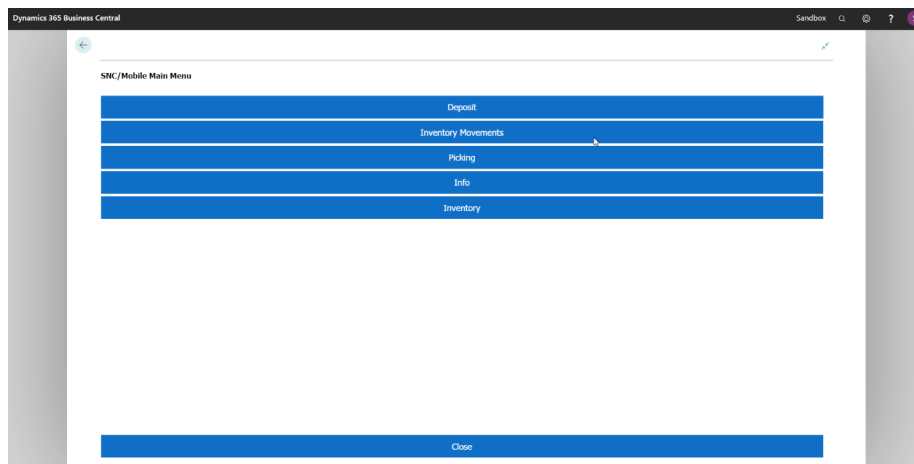

TEST LOCATIONS

To test out SNC/Mobile, without much setup, you can now create two test locations (SNCM1, SNCM2). If this is a production environment please proceed without this step.

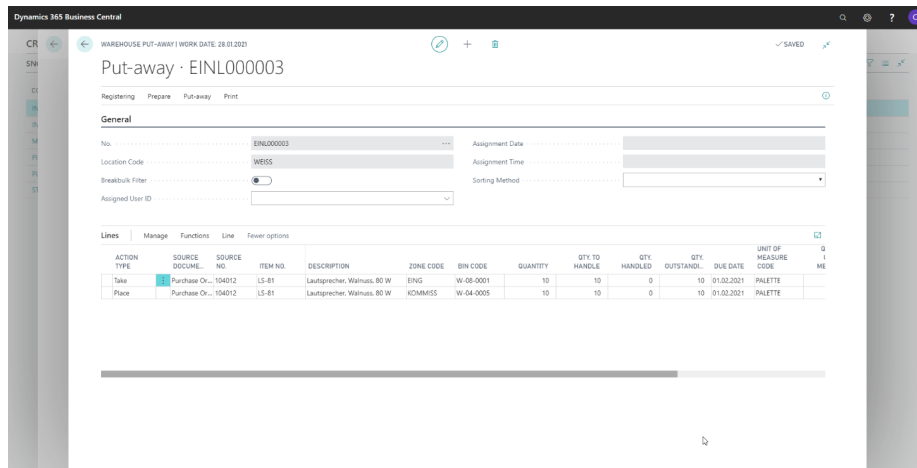

5. Mobile Main: Finish the Wizard and reload the SNC/Mobile Page with F5. The SNC/Mobile Main Menu should show up.

Deposit

1. Start with Putaway: Begin with a Warehouse Put-Away

2. Launch Mobile Device: Launch Business Central App on a Mobile Device. Please use a user that has the SNC/Mobile Role Center selected. Start SNC/Mobile Client.
