

## MillenniumIT ESP **HealthVision** REMOTE PATIENT MANAGEMNT

### PATIENT Primary Healthcare & Symptom Reporting

**HealthVision** by MillenniumIT ESP provides a web-enabled, mobile responsive, intuitive platform for medical personals to get connected with their patients remotely, record their current health / safety / risks through a guided questionnaire, visual capture of their expressions /symptoms / symptom history etc and have continues communication on a daily basis.

The patients can securely access **HealthVision** platform through a URL and use the health vision mobile app or sign in via OTP sent across to their mobile for authentication. Each recorded case will be identified with a unique case number which is provided to the patient for future reference. The medical personals can access the patients assessments / inquiries through the application's admin panel. They can also communicate via video, voice and even chat. The admin panel would provide a valuable insights to identify the patients current status, where they are located and provide them all the resources to have a positive mind set & to also follow medical guidance given by the medical personals.

**HealthVision** provides the medical personals a detailed information of symptoms and video captures of the cases, risk ratings to prioritise the cases and the ability to customize questionnaires and workflows. In addition, **HealthVision** automatically allocates cases to medical personals allocated in the system.

## HealthVision Patient portal [New Patient]

The sequence of screens for the HealthVision Patient portal (New Patient) is as follows:

- Language Selection Screen:** Displays the Health Vision logo and three language options: தமிழ் (Tamil), English, and தமிழ் (Tamil). The English option is highlighted.
