

Organise Your Business Processes With One Tool.

Cloud-Based ERP Software

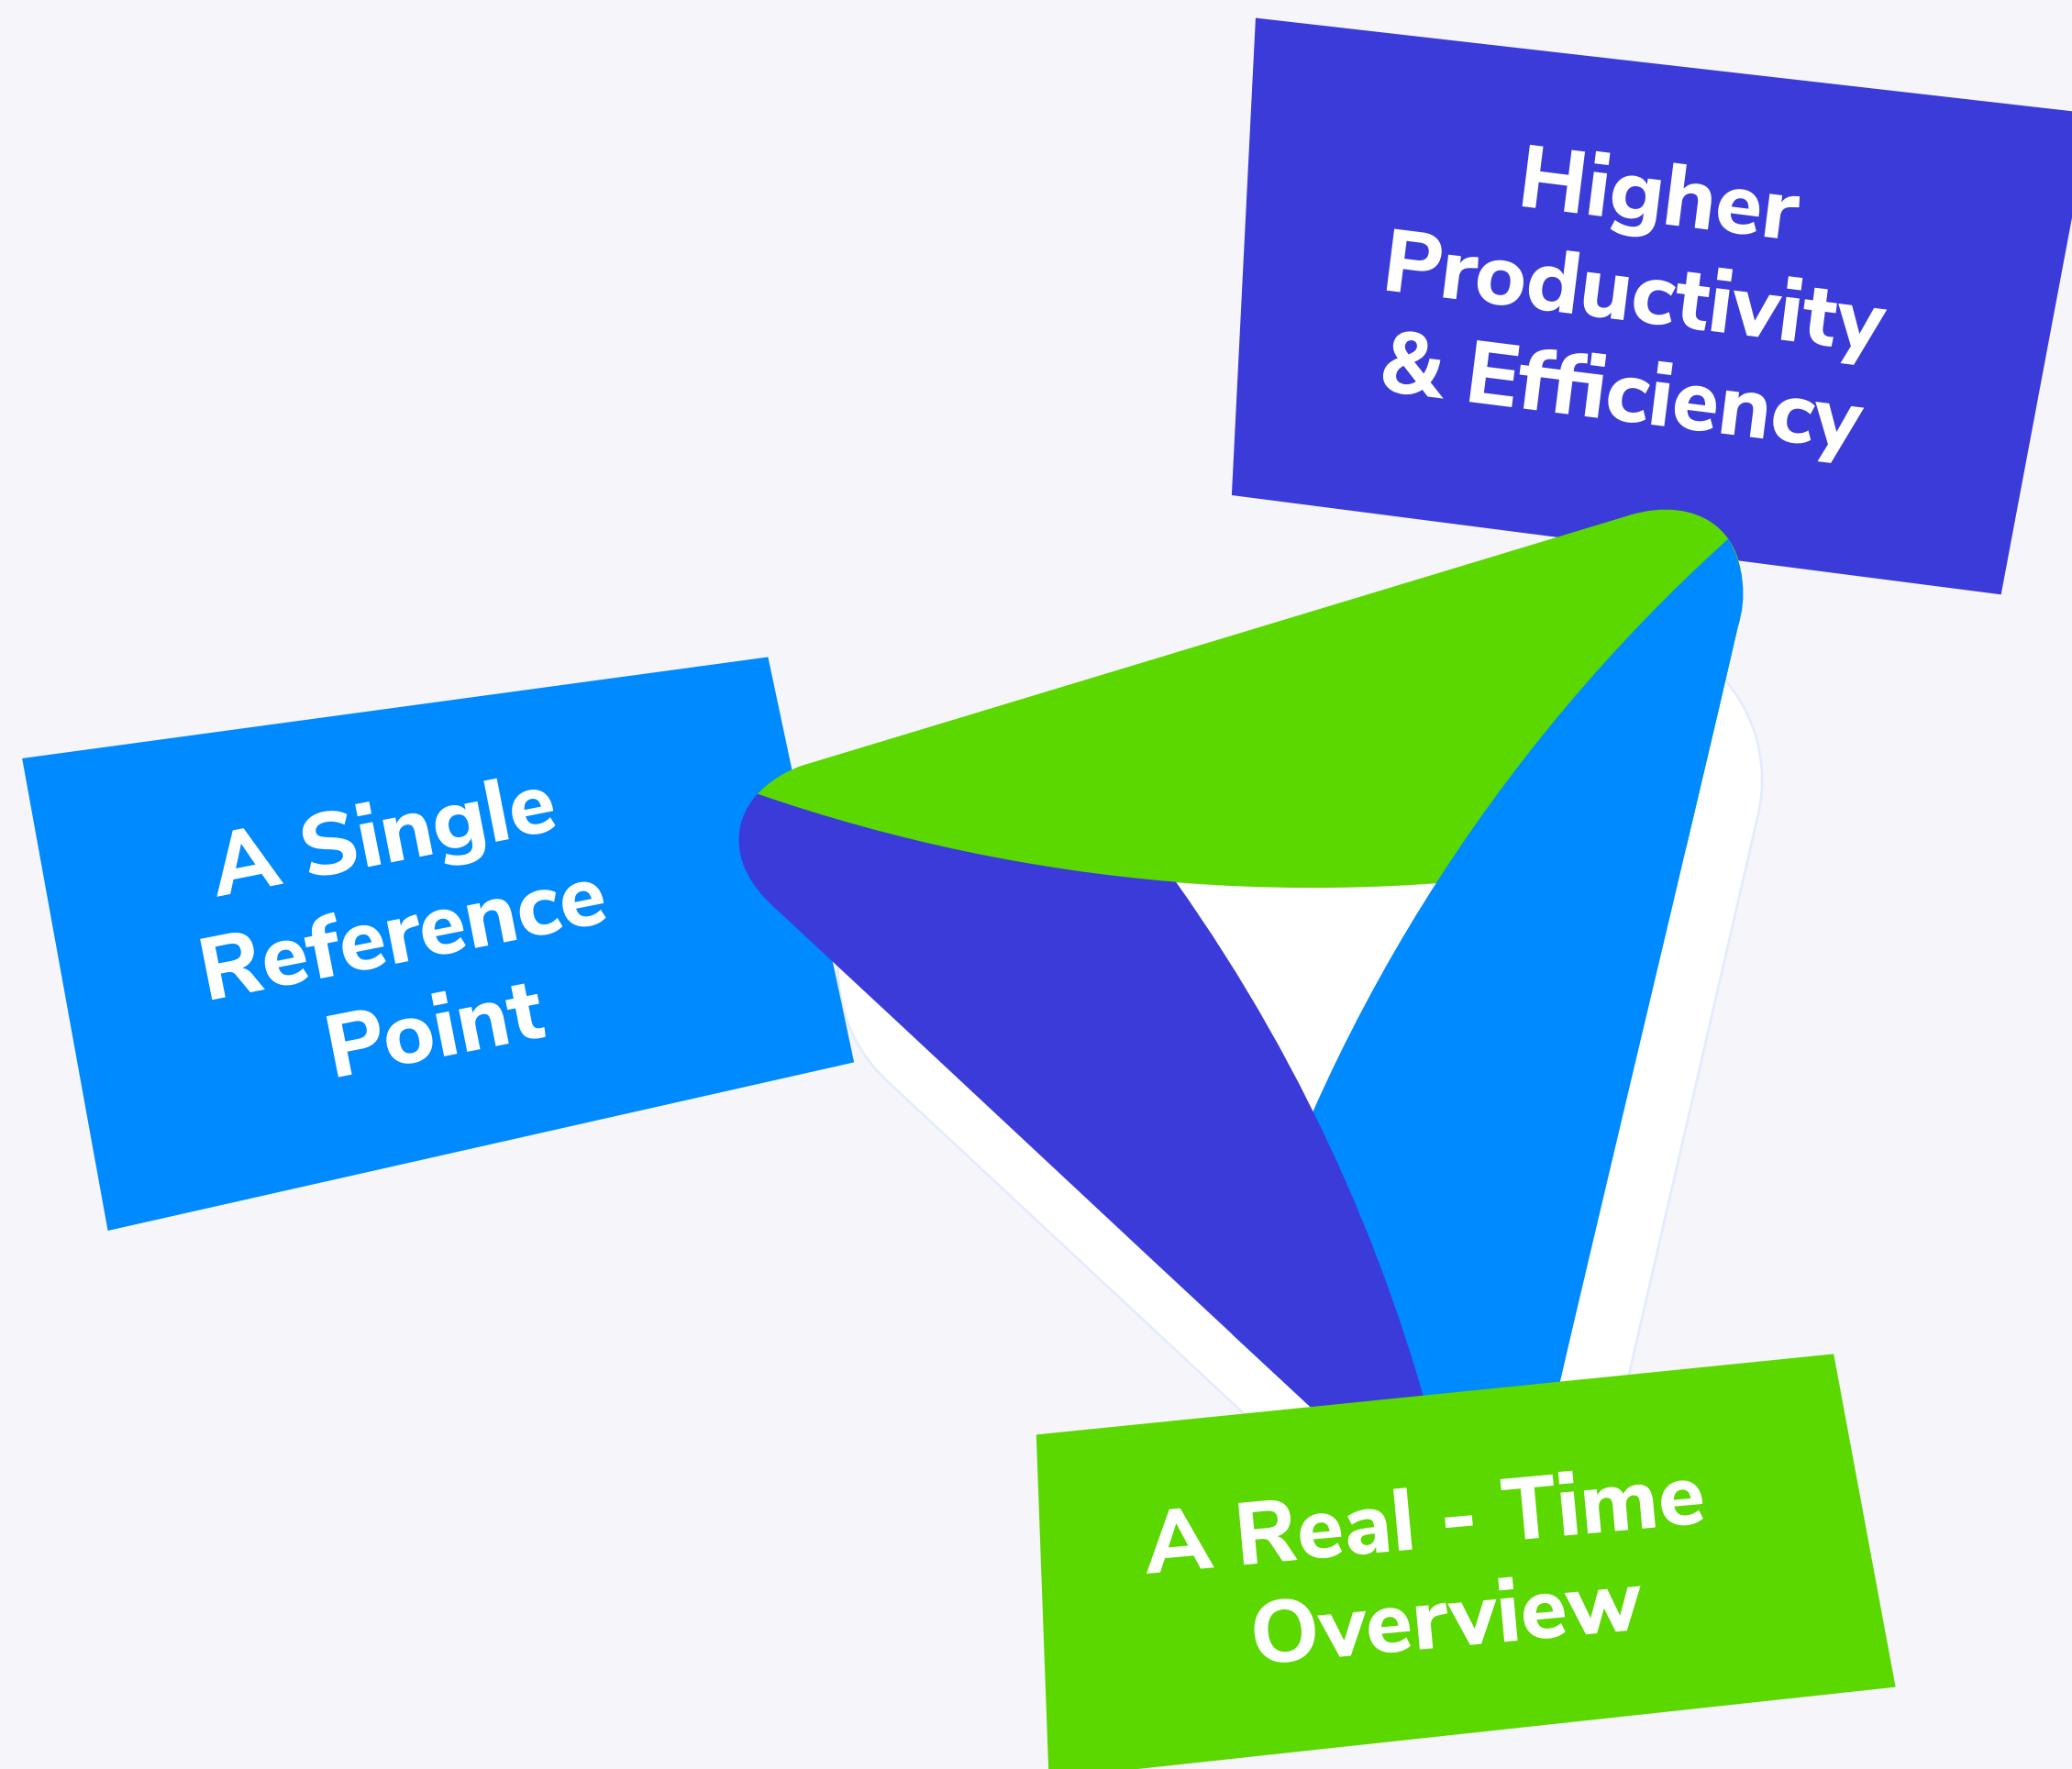

Vault-ERP is a powerful enterprise resource management tool specifically tailored to your business needs.
Helping you achieve higher levels of productivity and efficiency.

What Do We Offer?

Vault-ERP provides a highly efficient information database covering employees, contracts, clients, vendors, and day-to-day business operations, along with a spectrum of useful and innovative features for managers. It keeps all your important data in one system which is easy for employees to work with.

All the best tools are made to help their makers, and so is this ERP. It brings order to your company, saves time, and very importantly, reduces your running costs by making work processes more efficient.

It's fully customizable and is constantly evolving to provide an even more user-friendly experience.

WHAT'S INCLUDED

Everything You Need To Manage Your Business

HR

You don't have to use multiple systems to keep track of your people. Vault-ERP brings together key functions like time tracking, time off, on/off-boarding and all employee data into one secure, easy to use module.

Company Culture

Use Vault-ERP to keep your company culture evolving. Evaluate, motivate, share a poll and get an overall picture of employee development over time – all using one tool.

Projects

Forget spreadsheets when managing your projects. Keep your projects running smoothly, on budget and on time with unique resource insights.

Operations

Don't be out of the picture. See what's happening in your organisation with overviews of business trips, asset admin and more.

Financials

Take control of your company's financials. Vault-ERP brings all your financials into one place, giving you the big picture.

Sales

Get an overview of your clients, leads and pipeline so that no opportunities slip away.

- ✓ Insight Into Personnel Work Habits

**"Excellent improvements in efficiency & productivity.
Business growth in challenging times!,,**

The Checklists module is amazing. Period! With it, we easily automated our high-volume repetitive workflows. The processes are now robust, with the right & clear handoffs, alerts, reports and "super-live" dashboards. Our documentation-diligence and payment-collection processes wrt the enrolled students are key to our business success - here we have great control and real-time visibility.

Our Japanese partner universities and hiring companies like the regular updates we give them, especially the consistent performance & depth of details. With document storage being centralised and access being distributed, our remote & home-based teams are all working seamlessly.

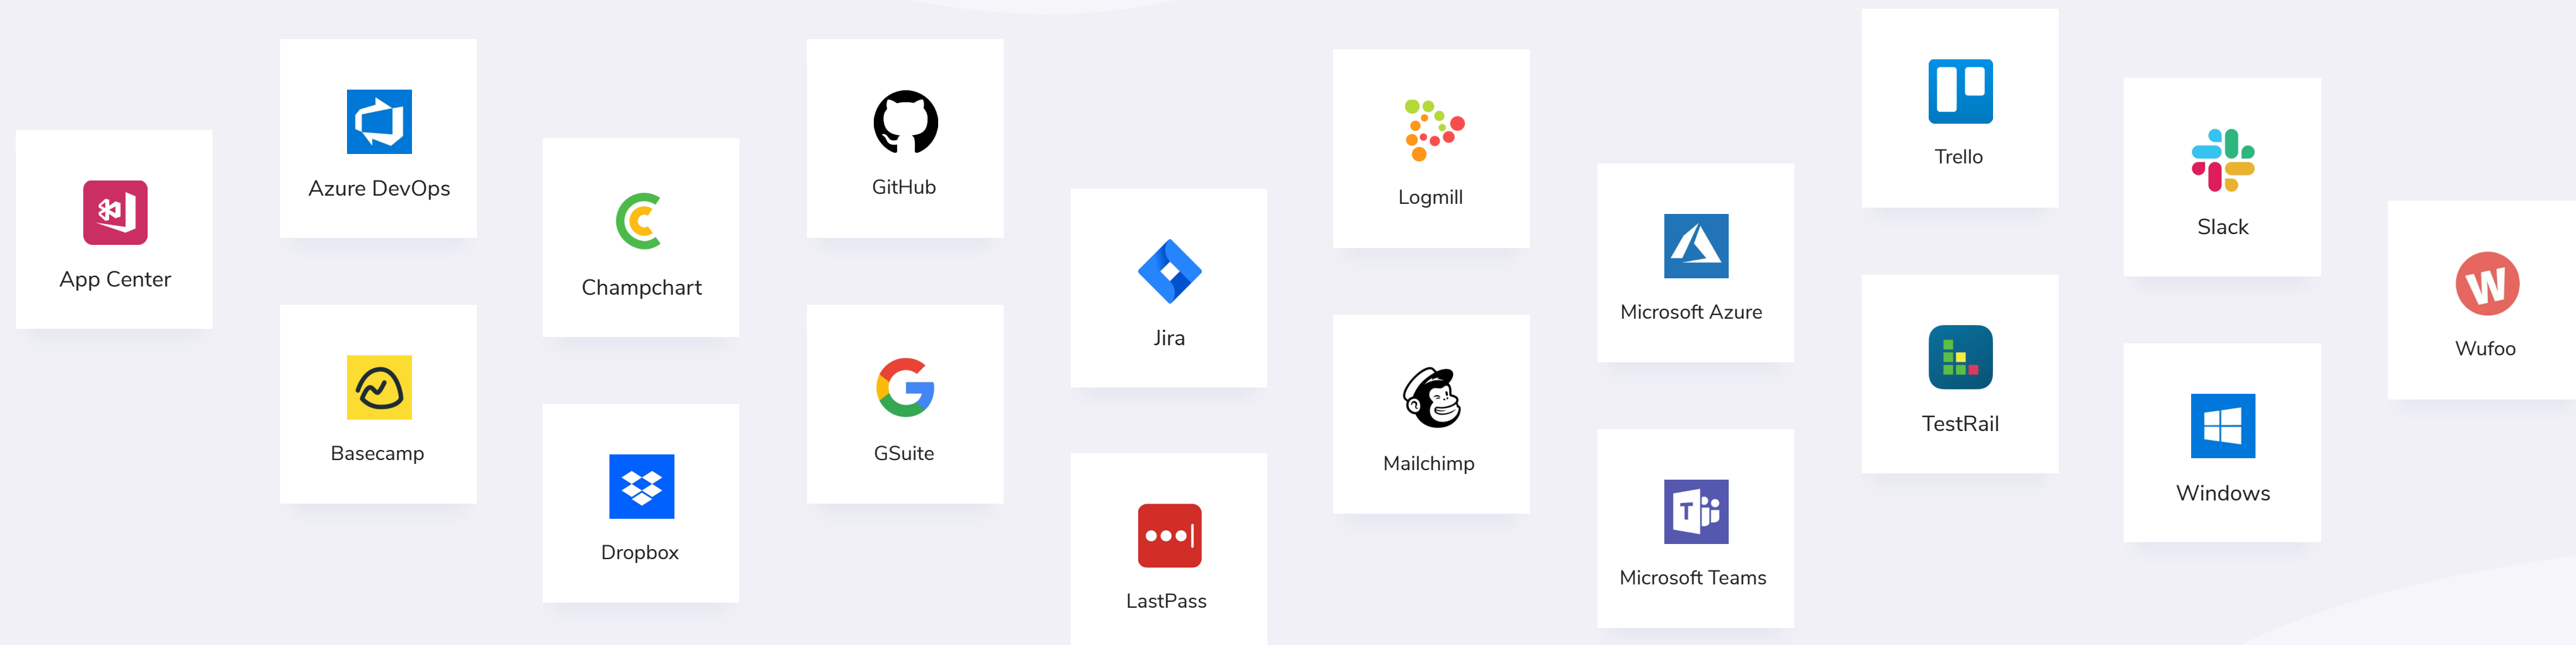

Vinay Nanjappa
