

## Azure Kubernetes DevOps Container Platform

- End to End Container management
- Built on the Azure stack
- CI/CD with deployment to AKS

### What is the BoxBoat Azure Kubernetes DevOps Container Platform?

The Azure Kubernetes DevOps Container Platform is an end to end container management platform built on Azure.

#### Stack Overview

- Azure Platform Configuration
- Azure Kubernetes Service
- Azure Container Registry
- Azure Monitor
- Azure Redis
- Azure Cosmos DB
- Azure DevOps
- Azure Key Vault

#### Features

- Infrastructure as Code
- Dynamically provisioned pipelines
- Modular build

#### Benefits

- Fast and Easy deployments (enables POCs)
- Accelerated time to value
- Limits risk

### Platform Reference Architecture
