

PCF – Azure Maps

Barhead's Power Apps Component Framework – Azure Maps (PCF-Azure Maps) displays data and location on a global map view.

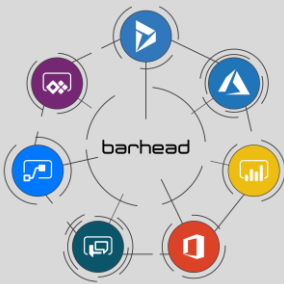

Barhead's Power Apps Component Framework – Azure Maps (PCF-Azure Maps) enhances user experience by pinning addresses of office locations, event venues and other places which are needed by the user. It also presents details about the selected location such as account name, phone number and city address. Through this app, users can apply filters according to a list of records and hierarchies.

Types of Users:

- Project Managers
- IT Managers
- Management
- Sales and Marketing

Business Outcomes:

- Visually appealing dashboard
- Easily search location and venues
- Access records and get location details through Azure Maps

Barhead is a specialised consulting firm focused on delivering business solutions leveraging Microsoft's Technology Stack. As a leading Microsoft Business Applications Gold Partner, Barhead covers the diverse product offerings from Microsoft and the broader ecosystem supporting our customers to modernize their systems and processes.

Barhead provides global support for customers, providing deep expertise around:

Power Platform tools – Power Apps, Power Automate, Power BI and Power Virtual Agents.
