

Asset Management

Provides an online asset database that is viewable and updateable on-the-go

What is Asset Management?

The Asset Management app enables team leads and project managers to monitor the allocation of assets to resources.

App Description:

The canvas app was built through Power Apps. It has a built-in QR code scanner, utilises Power Automate and is integrated with Common Data Service and Microsoft Outlook.

App Benefits:

- Seamless asset management and case creation through one app.
- Faster and smarter decision-making with a complete view of assets.
- More transparency and better collaboration among team members.

App Features:

Organise assets between assigned and unassigned.

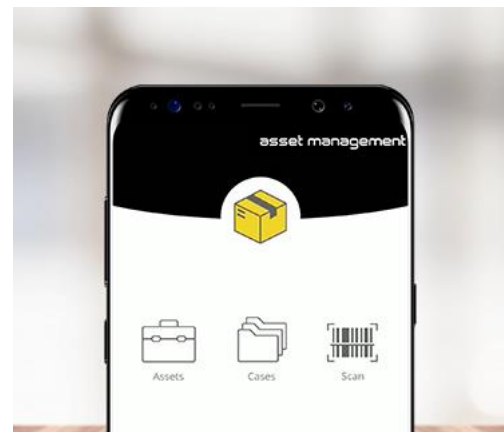

Scan a code to retrieve an asset.

View all assets belonging to a certain region.

Easily search assets through the Asset List.

Offerings and Delivery Models that are Tailored to Specific Demands

Leverage Microsoft Solutions and Realise Value Faster

Advisory Services

Governance	Assessment and advice to establish a tailored governance framework
Ideation Services	Facilitated ideation workshops to explore and validate solutions
