Seamless Multi-Session Cloud Experience by 10ZiG Technology for Windows Virtual Desktop

Endpoints and Management for Windows Virtual Desktop Multi-Session Platform

10ZiG is a longstanding Microsoft Azure Partner and cutting-edge Windows Virtual Desktop Partner. 10ZiG Windows 10 IoT based Thin Clients are powerful, reliable, and affordable endpoints for all Windows Virtual Desktop multi-user initiatives. The 10ZiG Manager Centralized Software provides exceptional management and deployment without license limitations at no additional cost.

The partnership of Windows Virtual Desktop and 10ZiG creates a seamless multi-user platform for Cloud-based, virtual desktop environments. Kevin Greenway, 10ZiG Technology CTO, "Windows Virtual Desktop really enhances the virtual desktop experience. If you're in the Cloud, why wouldn't you want to manage your virtual desktop machines easily and efficiently?"
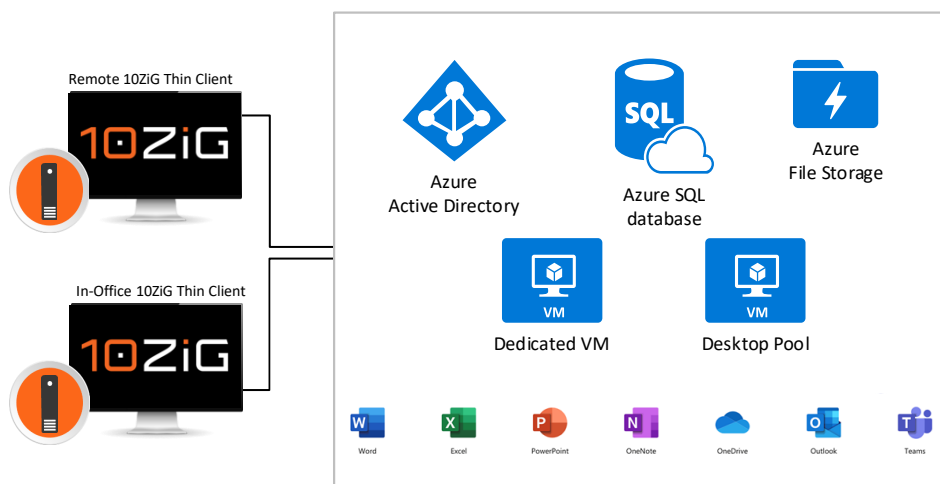

10ZiG's world-market leadership in Thin & Zero Client endpoint devices and management software for virtual desktops is exemplified by its customer solutions. Client hardware comes with thoughtfully constructed benefit features and options designed to ensure customers receive the right devices based on needs. Endpoints are customized to fit into customer environments with Windows-based Clients to provide a seamless performance in virtual desktops in the Cloud.

The 10ZiG Manager™ is a free, easy-to-use endpoint centralized management software suite provided to customers using endpoints running on a 10ZiG OS in a virtual desktop infrastructure environment in the Cloud.

> "The Windows Virtual Desktop and 10ZiG Partnership is a seamless solution for multi-session Cloud users. With the right endpoints and centralized software management, 10ZiG and Windows Virtual Desktop form a powerful combination for an exceptional Windows 10 IoT desktop experience virtualized in the Cloud."

10ZiG and Windows Virtual Desktop Integration

Remote 10ZiG Thin Client

In-Office 10ZiG Thin Client

Azure Active Directory

Azure SQL database

Azure File Storage

Dedicated VM

Desktop Pool

Word   Excel   PowerPoint   OneNote   OneDrive   Outlook   Teams

Why Integrate?

The Windows Virtual Desktop comprehensive desktop and app virtualization service running in the Cloud integrates with 10ZiG Microsoft Azure Ready Win IoT Thin Clients and The 10ZiG Manager™ to offer a seamless class multi-session experience for desktop virtualization. 10ZiG has provided the VDI space with the Power, Speed, and Performance of cutting-edge hardware endpoints and exemplary centralized management software for over 17 years, and Windows Virtual Desktop is no exception. Working together, the end user experience is exceptional, whether remote or in-office working environments.

10ZiG with Windows Virtual Desktop

Flexible Configuration & Deployment

Easy centrally-managed configurations and deployments of Microsoft Ready hardware, locally or via The 10ZiG Manager™ software with automated groups and management features.

Remote User Functionality

10ZiG Microsoft Ready Thin Client endpoints and The 10ZiG Manager™ Software with Cloud capabilities create a cutting-edge, multi-session Windows Virtual Desktop remote-working solution.

FREE Enterprise Management

The 10ZiG Manager™ centralized management software connects in the Cloud and manages large volumes of endpoints in locations across the country or around the world.

The Benefits of Using 10ZiG Technology with Windows Virtual Desktop

Management Made Easy

Automated deployment & management with The 10ZiG Manager™ - centralized management software that is always FREE with no user or device limit.

In-House Development Ahead Of The Curve

Solely focused in-house endpoint OS vendor. Always at the forefront of EUC, VDI, and Digital Workspaces development with expertise in underlying Windows-based technologies.

Support When You Need It

Personalized local, Microsoft-certified support. An understanding not just on 10ZiG endpoints, but also EUC, VDI, and Digital Workspaces environments.

Software With Unrivalled Performance

Provides speedy and easy to use UI for users to access their EUC, VDI, and Digital Workspace environments. It's all about easy to use, easy to configure, and easy to manage.

Hardware Without Compromise

Performance hardware designed from the ground-up for ever changing experience demands. Assembled locally with the highest quality stateless components.

Service Like No Other

No-obligation test devices, including personalized POC follow-up, presale support, local assembly, and custom build.

Fully Customizable Solutions

10ZiG Mission of our underlying commitment to providing custom-tailored solutions, which is a level of service that simple doesn't exist elsewhere.

Hassle-Free Warranty

Market leading 3-year advanced exchange warranty, including software support and upgrades.

About Windows Virtual Desktop

Windows Virtual Desktop offers the best virtual desktop experience delivered on Azure. Windows Virtual Desktop enables organizations to deliver a virtual desktop experience, and remote apps to any device. Microsoft 365, and Azure, together provide users with the only multi-session Windows 10 experience — with exceptional scale and reduced IT costs.

About 10ZiG

10ZiG Technology is a world-market leader in Thin Client & Zero Client endpoint devices for Virtual Desktop Infrastructure. 10ZiG provides leading Intel and AMD based Dual and Quad Core Thin Clients and Zero Clients for all leading major protocols on the market. 10ZiG offers free, no-obligation demo devices, best-in-industry Technical Support teams based in the U.S. and Europe, and provides at no cost, the Cloud-enabled "10ZiG Manager" Console with unlimited user licenses
