SharePoint Documents and Lists in Confluence

The screenshot displays the 'SharePoint Connector for Confluence Cloud' interface. At the top, it shows the connector name and a 'Share' button. Below, it indicates the connector was created and last updated by an administrator. The main section is titled 'SharePoint Document Preview' and features a large preview window showing a circular diagram with segments for 'INTEGRATION', 'PEOPLE', 'UX', 'CONTENT', and 'COLLABORATION'. A context menu is open over the preview, offering options: 'Download a Copy', 'Print to PDF', 'Embed Information', 'Help Improve Office', 'Terms of Use', and 'Privacy and Cookies'. To the right, under 'SharePoint Document Link', a list of documents is shown: 'Portfolio Apps.pptx', 'Communardo Products.pdf', 'Price List.xls', and 'Use Cases.docx'. A blue callout bubble with an arrow points from the 'Embed documents as a link or preview' text to the document list. Another blue callout bubble with an arrow points from the 'Open documents in fullscreen and find more options in the context menu' text to the context menu. At the bottom left, there is a 'Like' button and a comment input field. The bottom right corner contains navigation links: 'confluence', 'sharepoint', 'integration', and 'cloud'.

SharePoint Connector for Confluence Home

Created by Petrus Abaelardus, last modified 2 minutes ago

✔ **Use all the functions!**
You able to see macros, write comments and use dialogs on this page.

SharePoint Connector Features

- ✔ Start collaborating in the cloud: This popular app is compatible with Microsoft Office 365 and SharePoint Online
- ✔ Add robust document management capabilities to Confluence: Instantly embed, share and edit SharePoint documents in your wiki
- ✔ Never get stuck in the details: Simply embed a List or Document Library from SharePoint Online and browse the files from within a Confluence page
- ✔ Easily embed wiki pages and blog articles in SharePoint: It just takes a couple of clicks to add Confluence content into SharePoint
- ✔ Keep it all up-to-date: Bidirectional synchronization ensures that documents and content on both platforms are always in sync

How to embed a document from SharePoint Online in a Confluence page

Created by Petrus Abaelardus a minute ago

In the first section of this Blog series I will walk you through one of the most requested features of our app SharePoint Online Connector for Confluence: displaying documents from SharePoint Online within a Confluence page or blog post! So why would one have the need to embed for that at all? Read on to find out!

Customers often tell us that Confluence is awesome for **team collaboration** but only so-so for document management (even though attachments are versioned and so on). In turn, while SharePoint offers some sort of wiki most customers only use it as better "file drive" and primarily want to benefit from all the **document management capabilities** it provides. This often leads to a situation where the gap in the integration of the two systems forms some sort of **digital divide**. But – to say it with the words of Apple Inc. – **there's an app for that!**

Now let's have a look how that would handle in real life.

Spread knowledge into your Sites with the help of a single blog post

Embed your whole Confluence Blog into your SharePoint Project

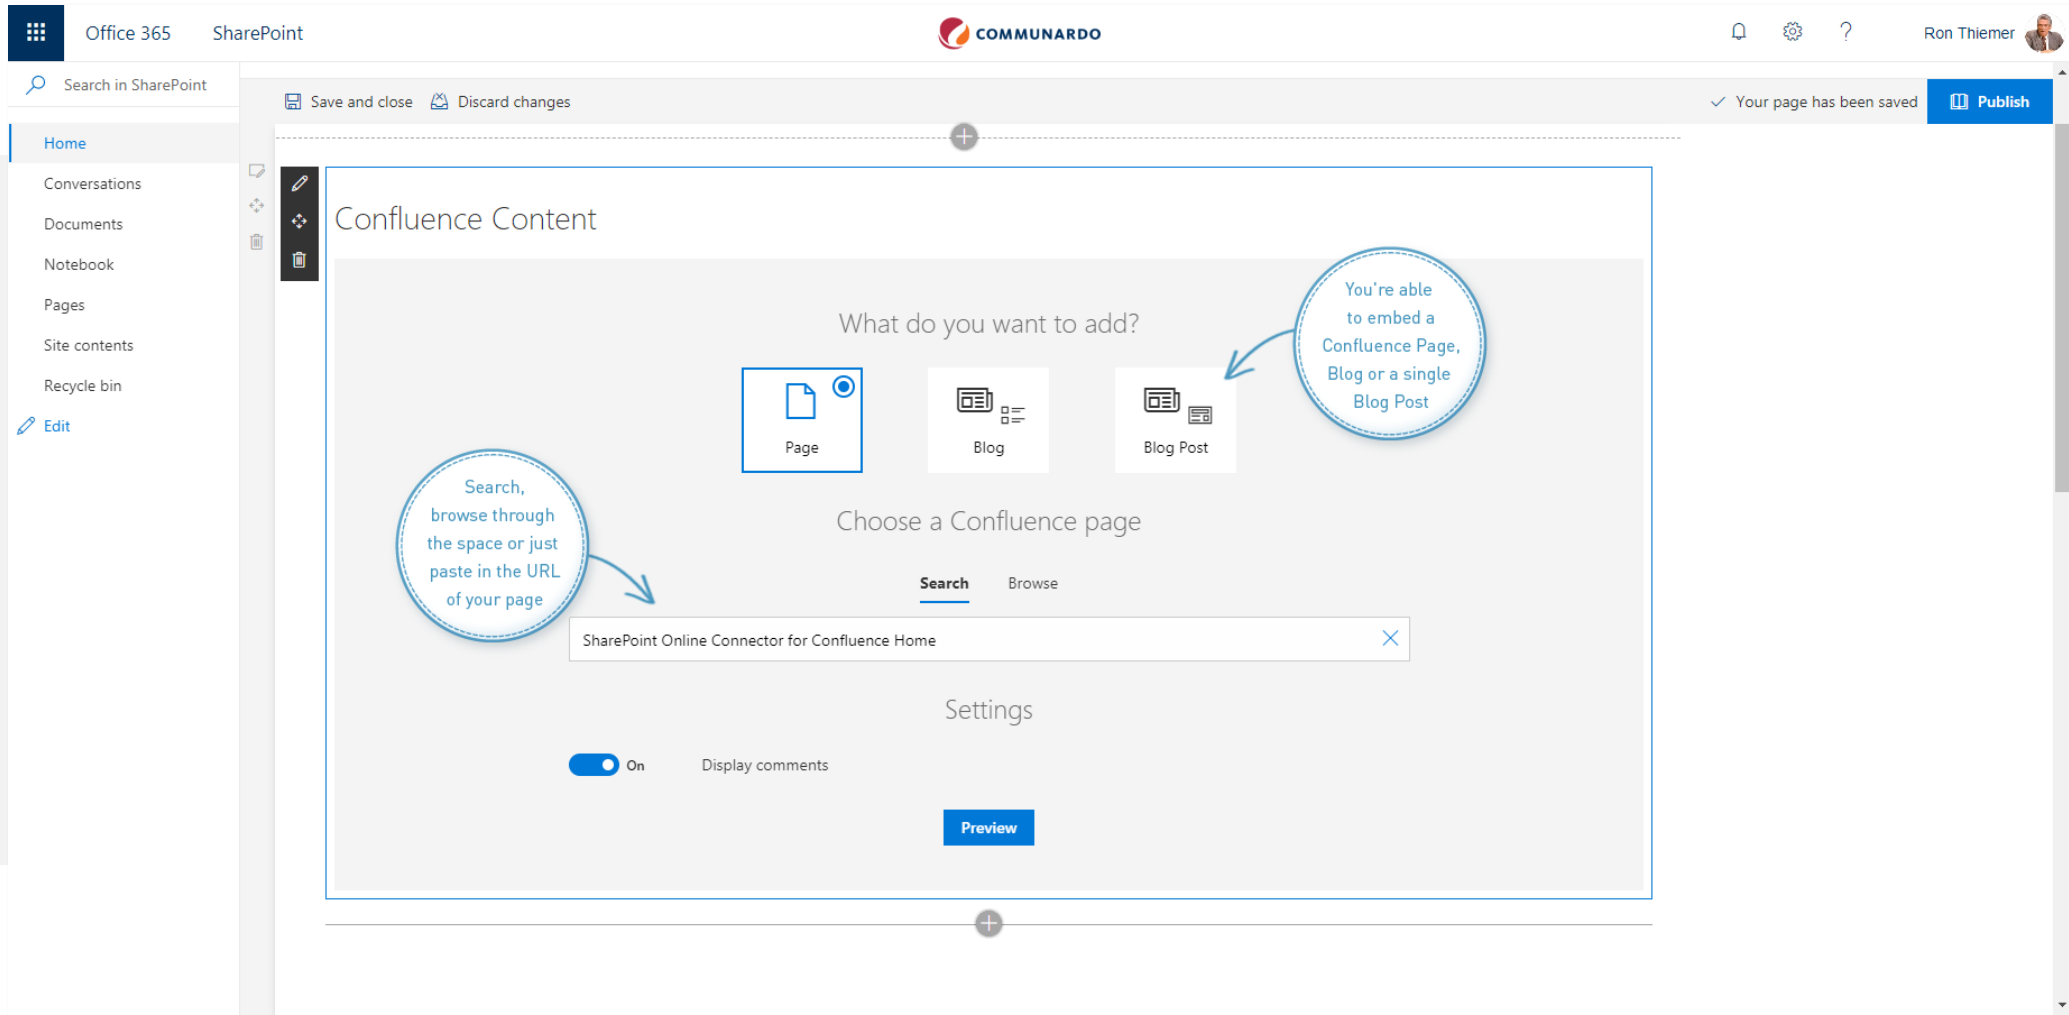

The new digital divide: How competing collaboration platforms are slowing innovation
a minute ago
Team collaboration is often based on different platforms, which makes it hard to build a strong knowledge base for everyone in the company. Read on to get more information on breaking this cycle.

How to embed a list or document library from SharePoint Online in a Confluence page
2 days ago
In this second section of our blog series I will walk you through another highly requested features of our app SharePoint Online Connector for Confluence: displaying List and especially Document Libraries from SharePoint Online within a Confluence page or even blog post! So why would one have the need to embed for that

How to embed a page or blog from Confluence into SharePoint Online
3 days ago
The (for now) final section of this blog series will cover another top feature of our app SharePoint Online Connector for Confluence: displaying content (blogs, single blog post or of course pages) from Confluence in SharePoint Online! So why would one have the need to embed for that at all? We'll find out soon!
