OneVuex

OneVuex Unified Systems

The Unified Interface for the Modern Workplace

A New Concept of Computing

Businesses Today Face
Many Integration Challenges

Businesses face many challenges finding, extracting, and sharing multiple sources of information from separate legacy and cloud systems, stifling productivity and preventing a complete view of operations. Employees waste hours working with inflexible systems, struggling to collaborate and achieve desired business results. This often forces leadership to make decisions without vital information.

Migration to the cloud is ideal, but existing connectivity services are complex and expensive, requiring costly IT intervention. In addition, security systems lack the level of protection needed for internal and growing remote operations.

Unified Software, Platforms and Systems

OneVue*x* integrates technology used every day with greater connectivity and functionality, eliminating barriers between systems, so users are more productive, achieving faster, more complete and intelligent business results.

OneVue*x* + Microsoft Solutions

OneVue*x* integrates Microsoft and non-Microsoft solutions through an out-of-the-box, single web interface, optimizing business processes and organizational intelligence without complex and expensive connectivity services.

Expected Business Results

Achieve IT cost reductions and self-empowered workforces, delivering 20% increases in productivity, able to find, access, share, and analyze information on most devices, with cloud security extended to on-premises systems.

OneVue*x*

OneVue*x* – Bridging The Gap

OneVue*x* optimizes business processes and organizational intelligence, self-empowering employees for greater results

Empowering businesses to work as a cohesive team, with greater insights, power and freedom with less IT intervention, complexity and expense.

Creating complete search efficiencies, collaboration, reporting, integrated analyses, mobility and security across all connected on-premises and cloud systems...

OneVue*x* connects once separate apps and platforms to work and function as one system through a single web interface without complex, expensive connectivity services...

"We will continue to make strides in providing innovation that bridges the unstructured world of human processes with the structured world of business applications."
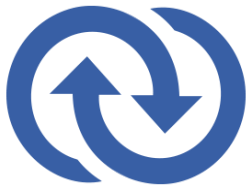

**Satya Nadella
CEO, Microsoft**

OneVue*x* with the Power of Office 365 and Azure

As an out-of-the-box computing solution, OneVue*x* integrates software applications, enterprise platforms and cloud infrastructure services (Microsoft and non-Microsoft) through a single web interface. Not linked or patched—it's running as a complete cloud system via OneVue*x*'s proprietary Code Integration Technology.

OneVue*x* is more stable and secure, unimpacted by updates and leverages the security of Office 365 and Azure in the cloud, extending it to on-premises systems.

OneVue*x* also integrates Azure Services—VM, VN, Machine Learning, Data Lake Analytics and more.

Seamless Integration
OneVuex's connectivity services allow connected apps and platforms to operate as one, without disruptions.

Total System Search
Conduct a single search across all applications, platforms, virtual servers and on-premises systems for complete results.

Seamless Collaboration
Share, co-author and communicate in an instant, accessing information in legacy systems on mobile devices.

Stream Analytics
Provides customized BI reports and analytics; uses Natural Language to access data in platforms like SQL Server, without writing queries.
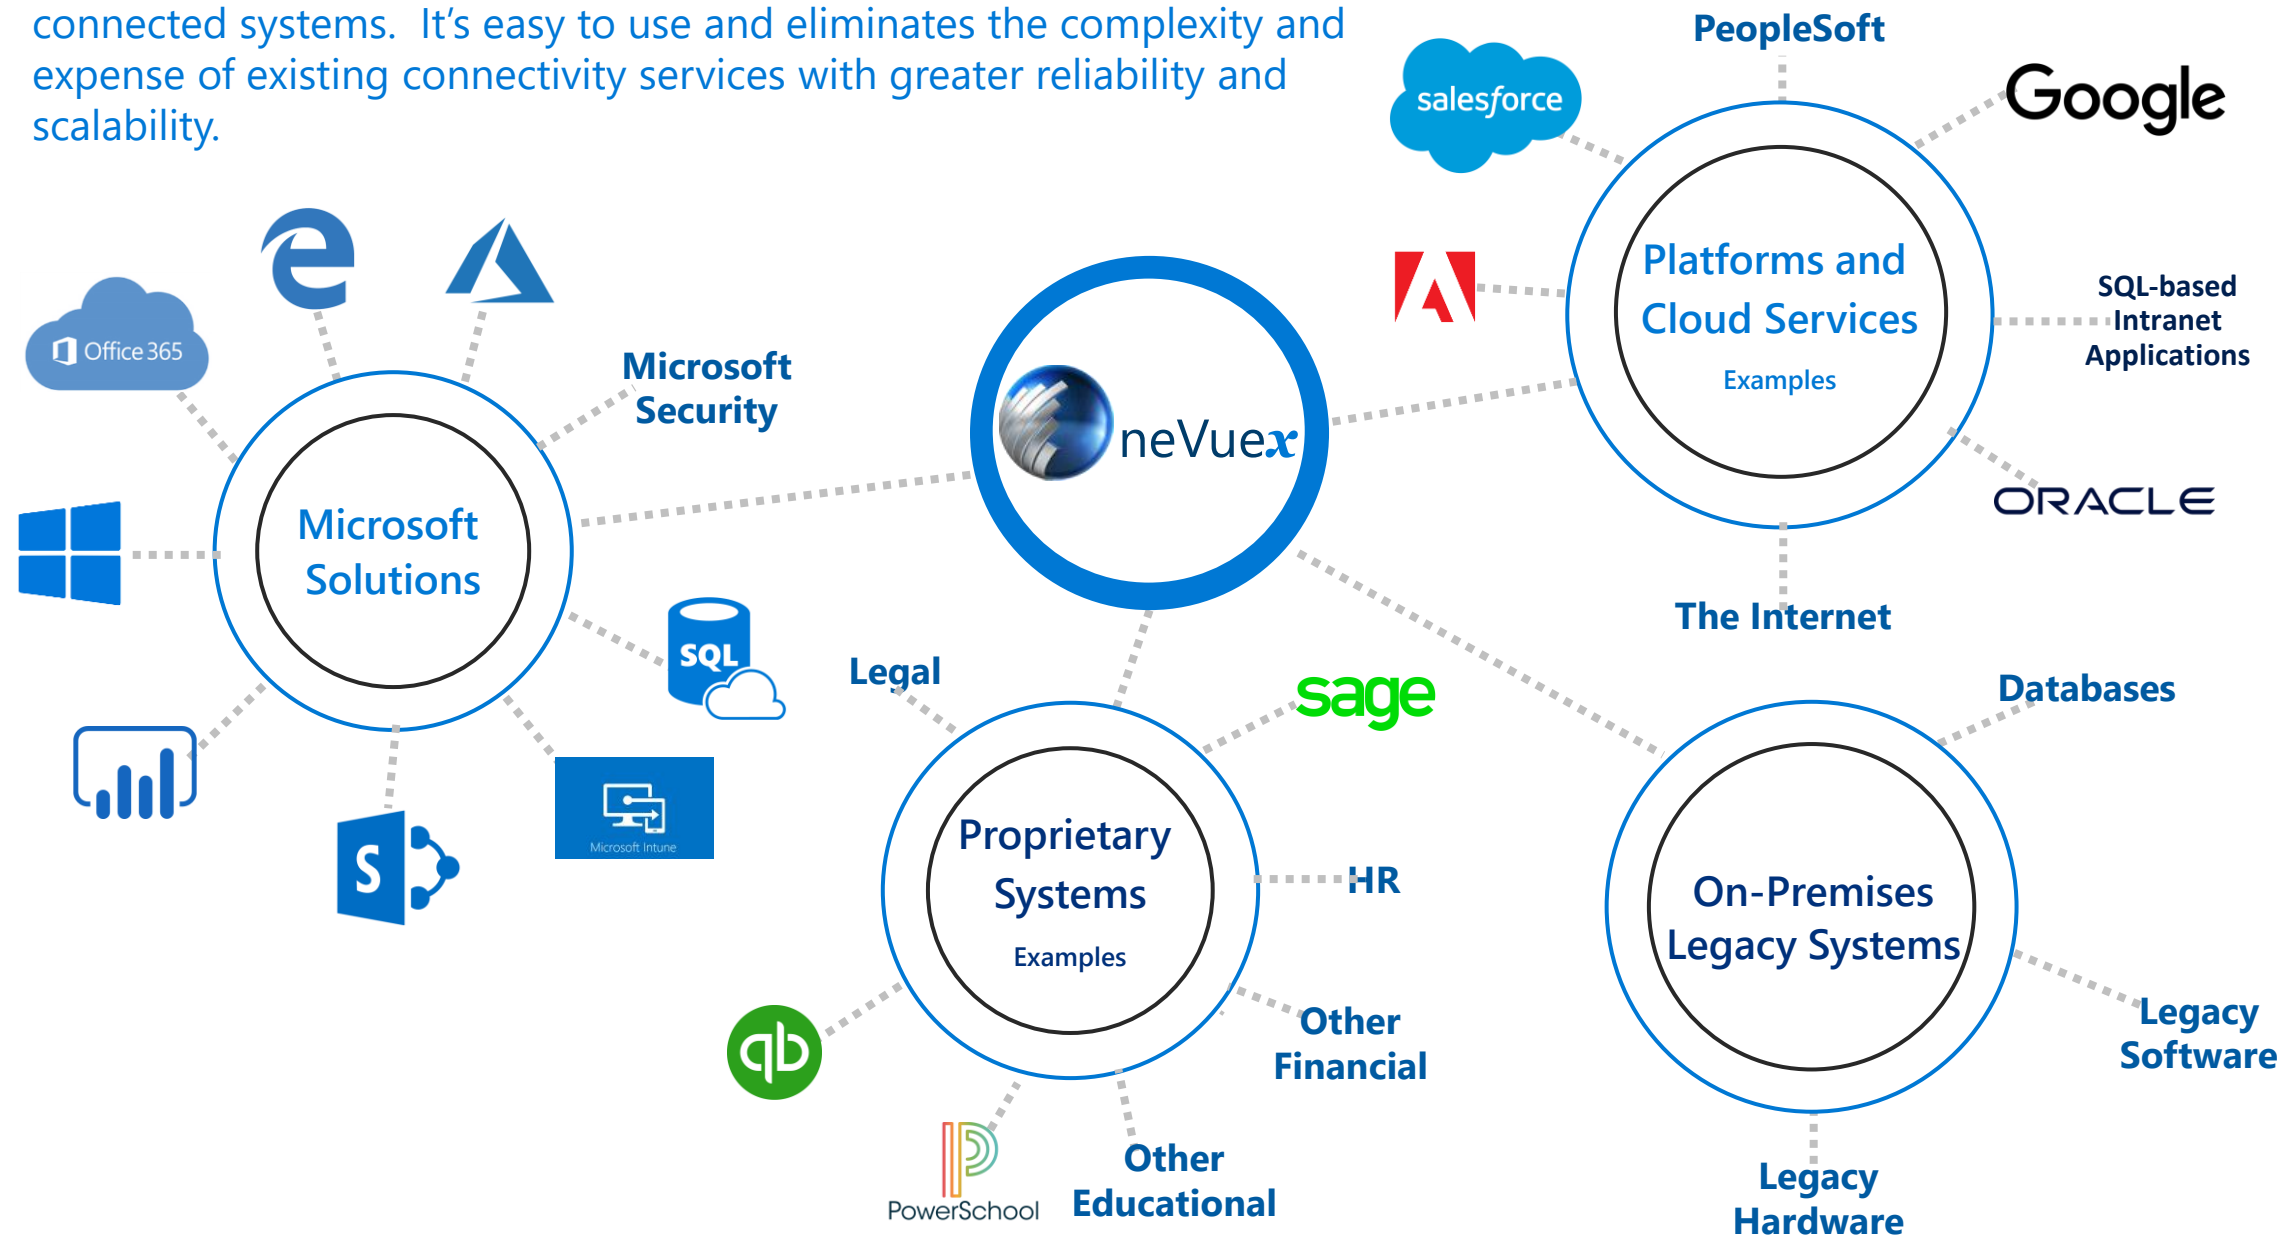

A Mobile Platform
Operate from most devices; legacy, on-premises systems are now mobile and connected to cloud security.

OneVue*x* Integrates Microsoft and Non-Microsoft Technologies

OneVue*x* amplifies the functionality, capabilities and intelligence of all connected systems. It's easy to use and eliminates the complexity and expense of existing connectivity services with greater reliability and scalability.
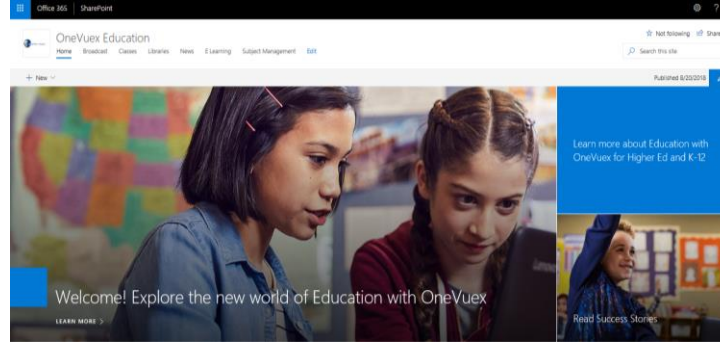

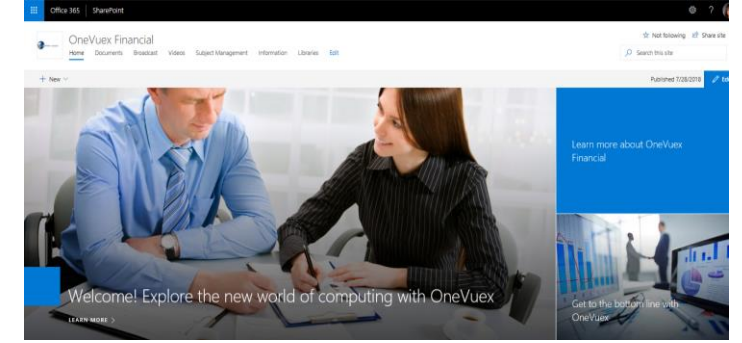

OneVue*x* + Microsoft Technologies

OneVue*x* is customizable, with predesigned solutions for specific industries – great for Small, Mid-Size and Enterprise businesses seeking faster, more complete and intelligent business results.

Manufacturing

Medical

... and more

OneVue*x* Removes All the Risks

OneVue*x*—Not Just Another Software Program

OneVue*x* uses existing software and systems more effectively, allowing separate systems to be interoperable for optimal business results, greater transparency and increased productivity. OneVue*x* is customizable to meet specific needs within multiple industries.

OneVue*x*—Computing Made Easy

As an out-of-the-box solution, OneVue*x* users are self-empowered, able to find, access and share information in one system. OneVue*x* is supported by Microsoft, running in Office 365 or Azure, providing familiar functionality that's easy to use so users are up and running as soon as they log in.

OneVue*x* Eliminates Significant IT and Business Expenses

OneVue*x* eliminates investments in hardware, technical support and most migration services. It provides a more stable connectivity solution, so systems run smoothly, handling updates without IT intervention or business disruptions. OneVue*x* leverages Office 365 and Azure Security to cloud and on-premises systems. Just provide a stable internet connection and devices, and we set up the rest.

OneVue*x* Provides True Mobility

Users can access all information from most devices. Information in on-premises systems connected through OneVue*x* is now mobile and secure. OneVue*x*'s Code Integration provides the option to keep or improve access credentials across the organization.

The Greater Hamilton Chamber of Commerce

A Case Study of Greater Productivity and IT Cost Savings

OneVue*x* is the backbone of our operation. We immediately increased productivity by 20%... time that's now directed to members, generating more revenue...We're attracting new members and helping other chambers that are 10 times our size."

– Dan Bates, President and CEO

The GHCC deployed OneVue*x* integrated with Microsoft 365, Windows 10, SharePoint, Teams, Broadcast and their existing on-premises systems, increasing their computing power to better connect with members and business partners.
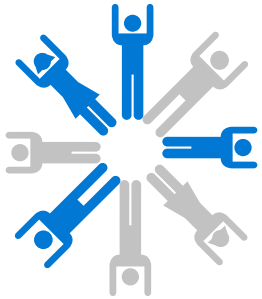

The GHCC wanted an IT environment that combined mobility with security, simplicity, and value, both to the organization and their members, but didn't want to manage or incur the costs of an expensive IT infrastructure.

OneVue*x*, integrated with Microsoft solutions provided the power and infrastructure they needed, connecting on-premises systems with powerful cloud solutions, accessible from any device or OS with extended security.

Now, the GHCC can work directly with members in the community, delivering faster, more convenient services—at significantly lower costs, with fewer IT headaches and expense. Team members are more productive, accomplishing more in less time.
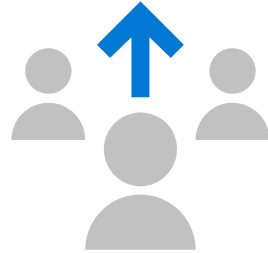

The GHCC's staff is 20% more productive, leading to greater efficiencies, professional presence and membership growth. They also eliminated many IT services and unexpected IT events.

OneVue*x*—For More Productive, Secure Teamwork

Real-time teamwork
Teams work together in one solution for greater transparency and elevated productivity with integrated systems, shared docs, and online meetings.
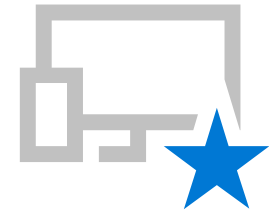

Effective collaboration
Teams engage more professionally, being more productive with customers, coworkers, and suppliers.

Enterprise-grade security
Cloud security, extended to on-premises systems provides access to those who need it, keeping out those who don't.

Mobile worker support
Teams are easily supported, working anywhere, from most devices, with no business disruptions.

1 OneVue*x* provides solutions to known pain points: integration, connectivity, collaboration and security.

2 With OneVue*x*, best-in-class, integrated solutions improve the customer experience.

3 Unified systems with more effective connectivity services drive productivity while reducing IT and business costs.
