The Scientific Data Engine®

ACCELERATING SCIENCE TO INNOVATION

SDE

A drug development platform that expedites delivery of safe and effective scientific innovations (drugs, vaccines & diagnostics) using disease specific, real-time clinical data powered by AI.

DEVELOPMENT SUPPORT

Streamline the process and de-risk the investment in bringing innovations to market.

SCIENTIFIC DATABASE

Inform decisions and find information fast with disease-specific clinical database updated in real-time and powered by AI.

DRUG DEVELOPMENT ROADMAP

Visualize and measure progress in a customizable development plan that organizes and manages cross functional tactics and projects.

SCIENTIFIC INFORMATION DISSEMINATOR (SID) ®

Utilize the AI-assistant to automate repetitive data searches and inform individual projects and objectives when new data is available.

Creating Strategic Value

- Automations that accelerate time to market by 1.5 years with $15M savings

- Development roadmap eliminates repetitive work saving 4 years of labor and > $1M

A Different Solution

- One hub for all clinical data and product development deliverables

- Validated, disease-specific data models developed with practicing clinicians
