

SDI 365

Ready to use customized electronic invoicing in Microsoft Dynamics 365 Business Central

Would you like to decide which additional tags to export to the electronic document in Microsoft Dynamics 365 Business Central?

Do you want to manage the stamp duty automatically with a simple setup?

By creating rules and templates, you can decide which values to export, taking them from the document fields or with fixed texts.

Furthermore, through a single setup page, you can manage the stamp duty, withholding tax and Enasarco.

All these features can be activated manually or automatically when the document is released. This way you will never forget to add critical information to your document.

Why SDI 365?

- Ability to meet customer requests with custom tags
- Automatic stamp duty management with customer charge or only on the invoice
- Automatic split payment management with standard setup
- Withholding tax management
- Enasarco management
