

Shipping Central offers you a ready-to use solution that connect Microsoft Dynamics 365 Business Central to the Unifaun platform for transport management.

This product is easy to use and allows you to create and book shipment and get your parcels on the road in no time. From the smallest box to the largest pallet, this solution will get those important shipments where they need to go. Manage all aspects of your transport service from Dynamics 365 Business Central. Book, Ship & Track parcels from Business Central.

The Shipping Central app implements the Unifaun services, e.g. shipment booking, parcel label printing, way-bills and customs documents. The app also allows updated shipment status in Business Central.
