

Standardization of accounting and financial processes

Pre-Configured Accounting allows you to use Dynamics 365 modules in a shorter time, thus optimizing implementation times and consulting costs.

Pre-Configured Accounting

Pre-Configured Accounting is an accounting configuration within Dynamics 365 that standardizes the accounting and financial processes of companies, helping them align compliance with law, tax requirements, comply with electronic accounting and electronic invoicing 3.3.

- Serves as the starting point for tax declarations
- Helps with the electronic accounting compliance
- Reduce implementation times

Optimization

- Optimization of implementing timings
- Standardization of accounting records
- Saving time and expenses

Financial Services

- Bank Layouts
- Financial Reports
- Asset control
- Budgets

Documentation

- Billings
- Standard SAT catalogs
- Periodic accounting journals
- General service item catalogs

General accounting • Accounts receivable • Financial reports • Fixed assets • Accounts payable • Cash management
