# PCF – Thumbnail

Barhead's Power Apps Component Framework - Thumbnail View (PCF-Thumbnail) displays images of searched keywords on a given results page.

Barhead's Power Apps Component Framework - Thumbnail View (PCF-Thumbnail), paired with Azure Cognitive Services, allows users to search via text and image inputs. Upon entering a text search, results will be displayed according to the images searched. Users can search multiple records in the repository and can apply filters according to a list of records and hierarchies. Records also provide a shareable link wherein users can quickly share the location of the asset.

Types of Users:

- Project Managers
- IT Managers
- Management
- Sales and Marketing

Business Outcomes:

- Easily create visually appealing dashboard.
- View records on a thumbnail view.
- View and expand images attached to the records.
- Shareable link for easy access of records.

Barhead is a specialised consulting firm focused on delivering business solutions leveraging Microsoft's Technology Stack. As a leading Microsoft Business Applications Gold Partner, Barhead covers the diverse product offerings from Microsoft and the broader ecosystem supporting our customers to modernize their systems and processes.

Barhead provides global support for customers, providing deep expertise around:

Power Platform tools – Power Apps, Power Automate, Power BI and Power Virtual Agents.	Business solutions for standalone apps, or apps that extend existing Microsoft solutions.	Pre-built solutions from Barhead's research and development team.	Deployment models, best practices and governance.
