In a small or large organization, in a big project or a small matter - **everyone is constantly looking for something**, because they don't remember, because they don't know, **because they need** ...

ATTADO

Why we created ATTADO?

We created ATTADO **to make work easier for all people a**nd to improve its comfort.

From the perspective of the employer or the boss, ATTADO improves the efficiency of employees, ensures safety and gives the possibility of control.

From the perspective of the employee, ATTADO improves work, gives a sense of comfort and motivates to reliability.

Why we created ATTADO?

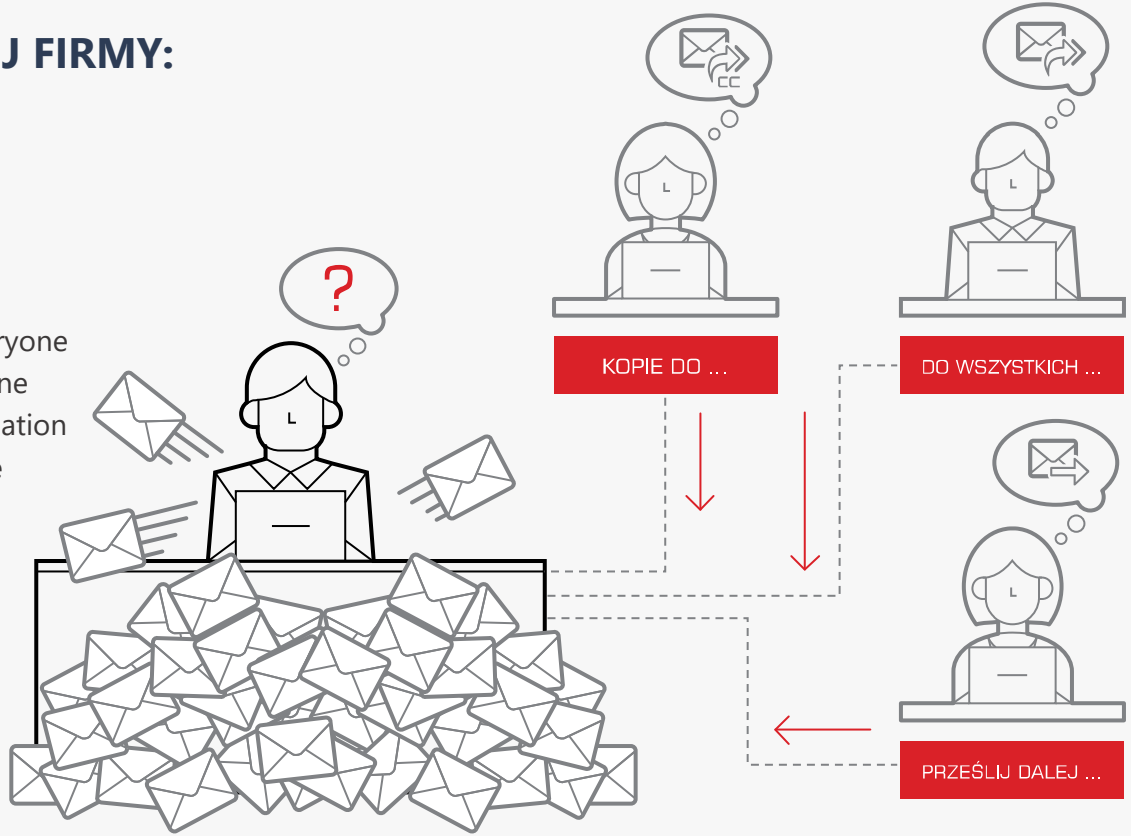
REALNE PROBLEMY KAŻDEJ FIRMY:

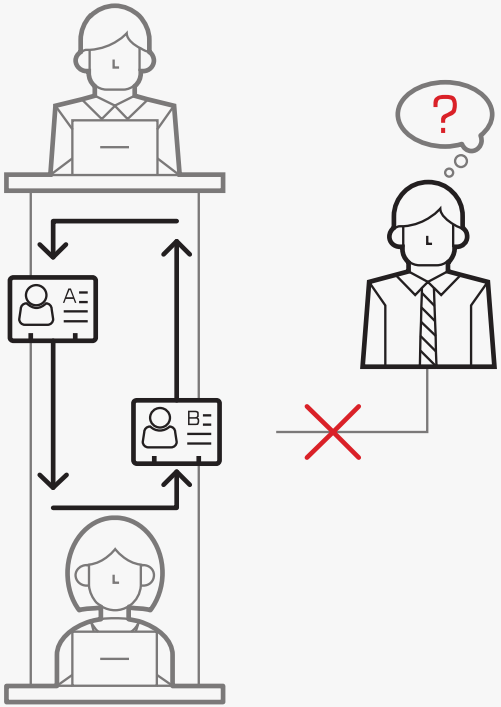
Lots of email - the tendency to inform everyone about everything.

Lots of attachments - scans, photos, documents, invoices, contracts.

Problem with finding information - everyone creates their own database, users within one organization do not have access to information on the activities of other employees of the company.

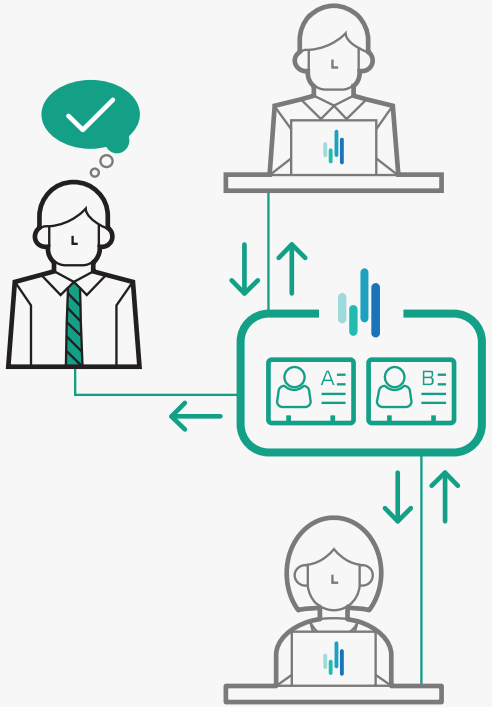
Many simultaneous projects.





So what is **Attado**?

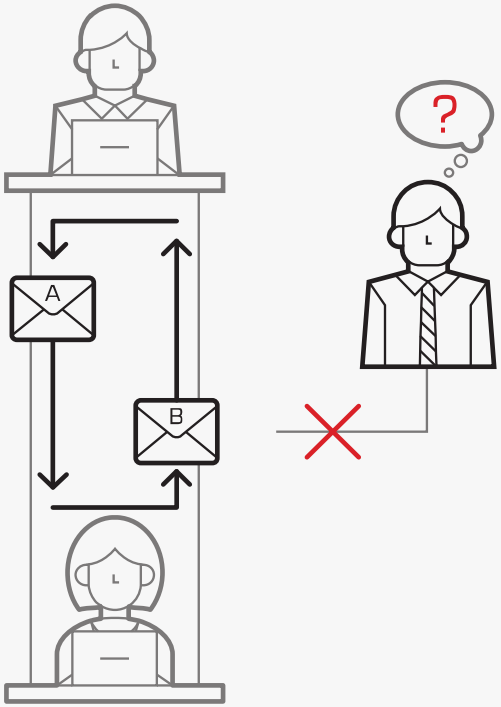
A software that allows you
to quickly and easily
FIND any contact,
even if you were not the one who
contacted the person you are looking for.



No ATTADO

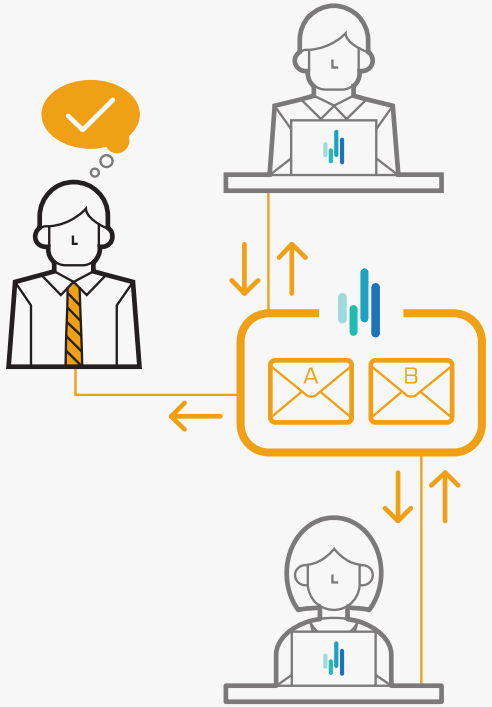
With ATTADO

COMPANY CONTACT FINDER



So what is **Attado**?

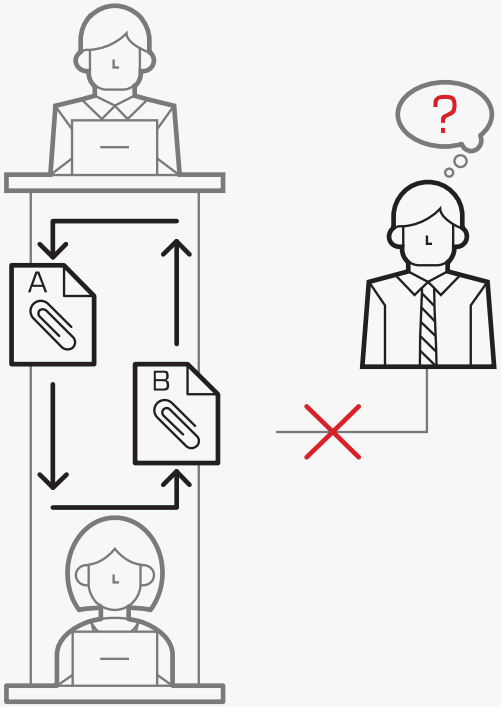
A software that allows you
to quickly and easily
FIND any content of correspondence
with a client or colleague via e-mail,
even if you were not the participant of this
correspondence



No ATTADO

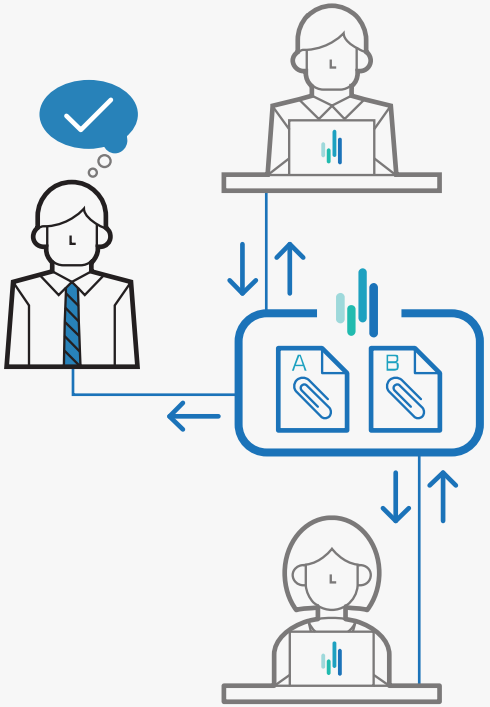
With ATTADO

COMPANY CORRESPONDENCE FINDER



So what is **Attado**?

A program that allows you to quickly and easily **FIND any document [attachment, scan of letter]** attached to the e-mail correspondence, even if you were not attached to the exchange of these documents



No ATTADO

With ATTADO

COMPANY DOCUMENT FINDER

Why ATTADO is so simple?

01

BECAUSE ATTADO

is a program that installs in the Outlook e-mail program.

02

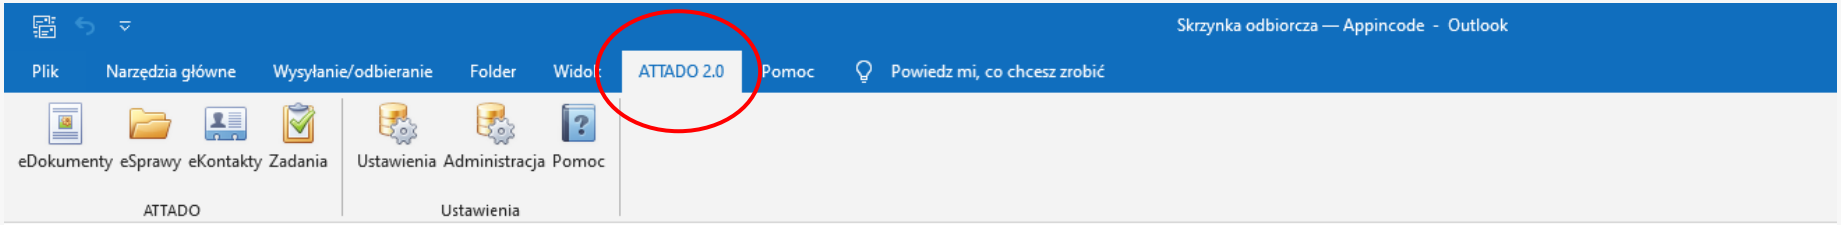
OUTLOOK

every user knows perfectly well, so he doesn't have to learn anything.

03

YOU DO NOT NEED TO

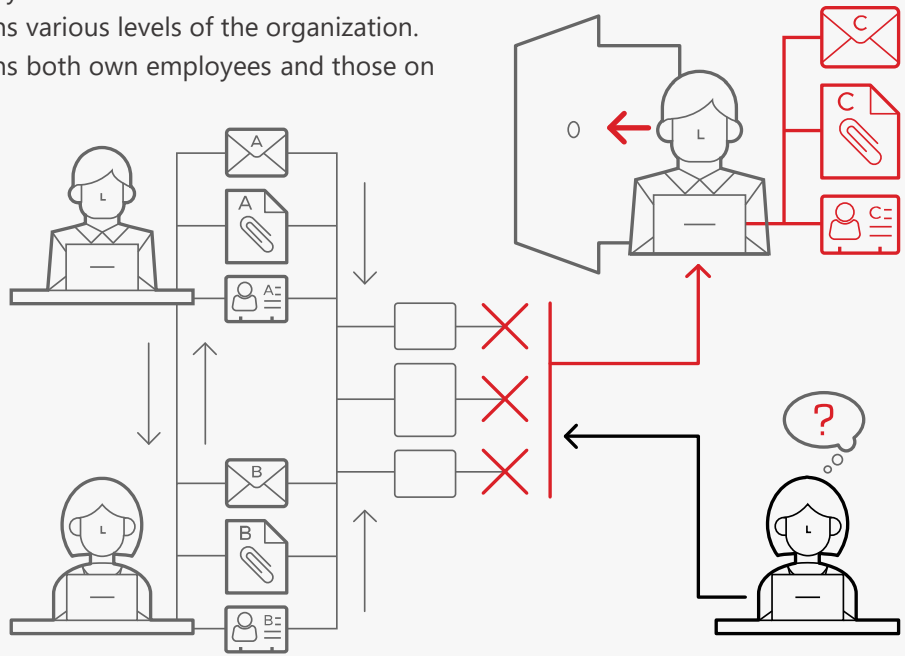
also use a separate program on a daily basis



So what gives Attado?

PROVIDES SAFETY

Currently, one of the most important problems of any organization is employee rotation.
This problem concerns various levels of the organization.
This problem concerns both own employees and those on the contractor's side.



WILL DISAPPEAR WITH AN EMPLOYEE OR PERSON ON THE CUSTOMER SIDE:

CONTENTS AND FINDINGS [e.g. e-mails],

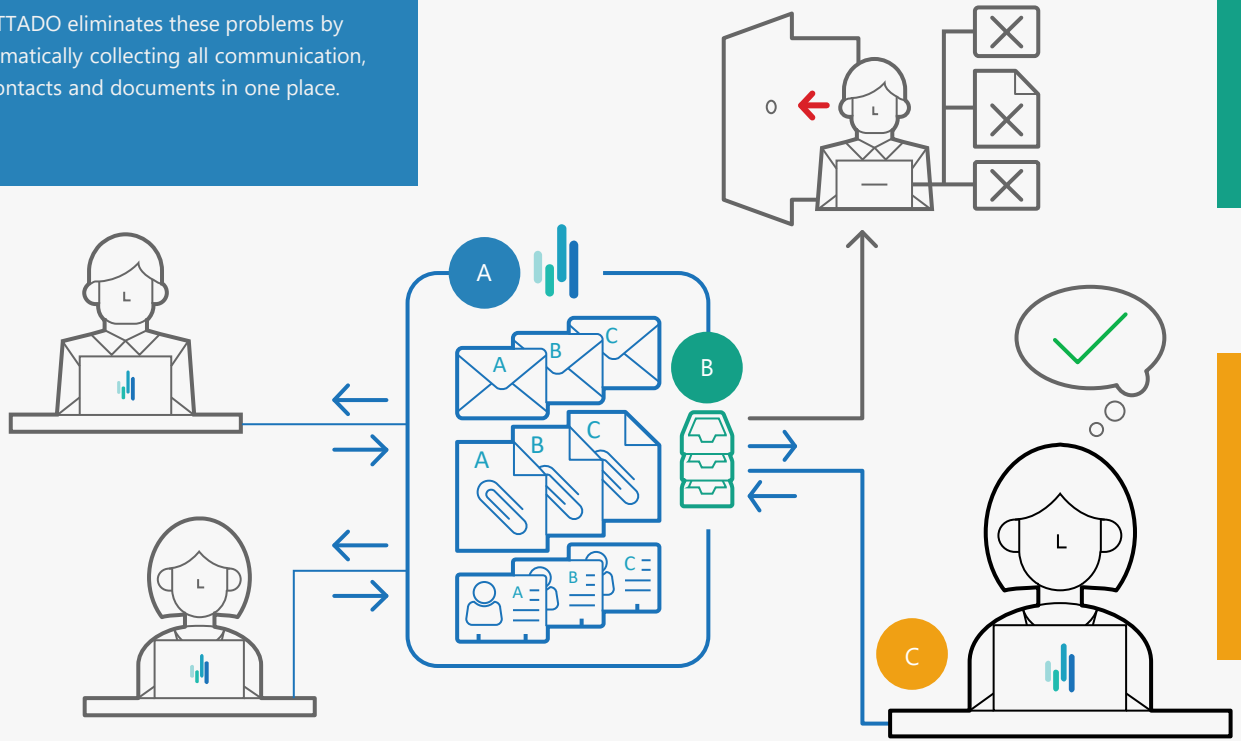
DOCUMENTS [e.g. contract versions]

or CONTACT DATABASE.

So what gives Attado?

AUTOMATIC COMMUNICATION COLLECTION:

ATTADO eliminates these problems by automatically collecting all communication, contacts and documents in one place.



ARCHIVING SYSTEM:

gives additional security, makes database copying difficult

RESTORING THE COURSE OF CORRESPONDENCE:

In addition, it allows you to restore the full database and the course of communication in the event of its deliberate or accidental deletion.

So what gives Attado?

ENSURES ORDER IN DOCUMENTS AND COMMUNICATIONS

Collecting all content along with documents facilitates and organizes communication within the organization and with customers.

ATTADO is an Outlook item. Extra icon. Therefore, it does not cause the confusion caused by new, external software, such as an external CRM system.

The intuitive SEARCH FILTER guarantees easy and effective operation.

Transparency of data and document presentation facilitates and accelerates work when it is necessary to reach for a set of documents related to a given case, project, company or person.

The data collected and archived in this way is an excellent basis for Task management, which is also possible thanks to our system.

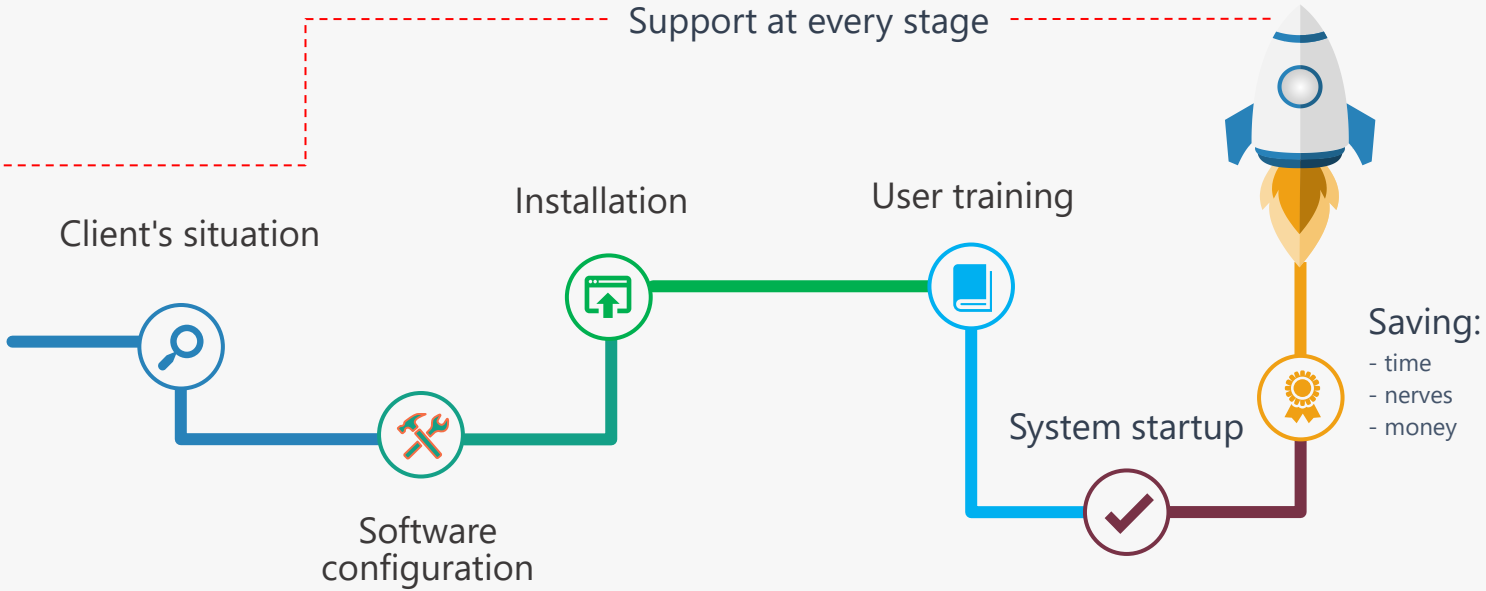
You can plan, delegate and monitor Tasks delegated to other ATTADO users.

360-degree view

The ability to view all registered information about a contact, document or case.

Thanks to the possibility of freely associating various elements of the ATTADO system, the user, when finding one object, can always reach all related objects, e.g. eDocument was searched, one can search for eCases with which the document is associated, with eCases we can reach the clients (eKontakta) involved in a given eCase. When reaching eKontakt, we can check which e-mails have been exchanged with him, which Activities (phone calls, meetings) have been performed in relation to this Contractor.

Integration in one week!



Very simple and quick implementation

ATTADO every day

The eCase form contains a tab with a full history of e-mail correspondence related to a given eCase

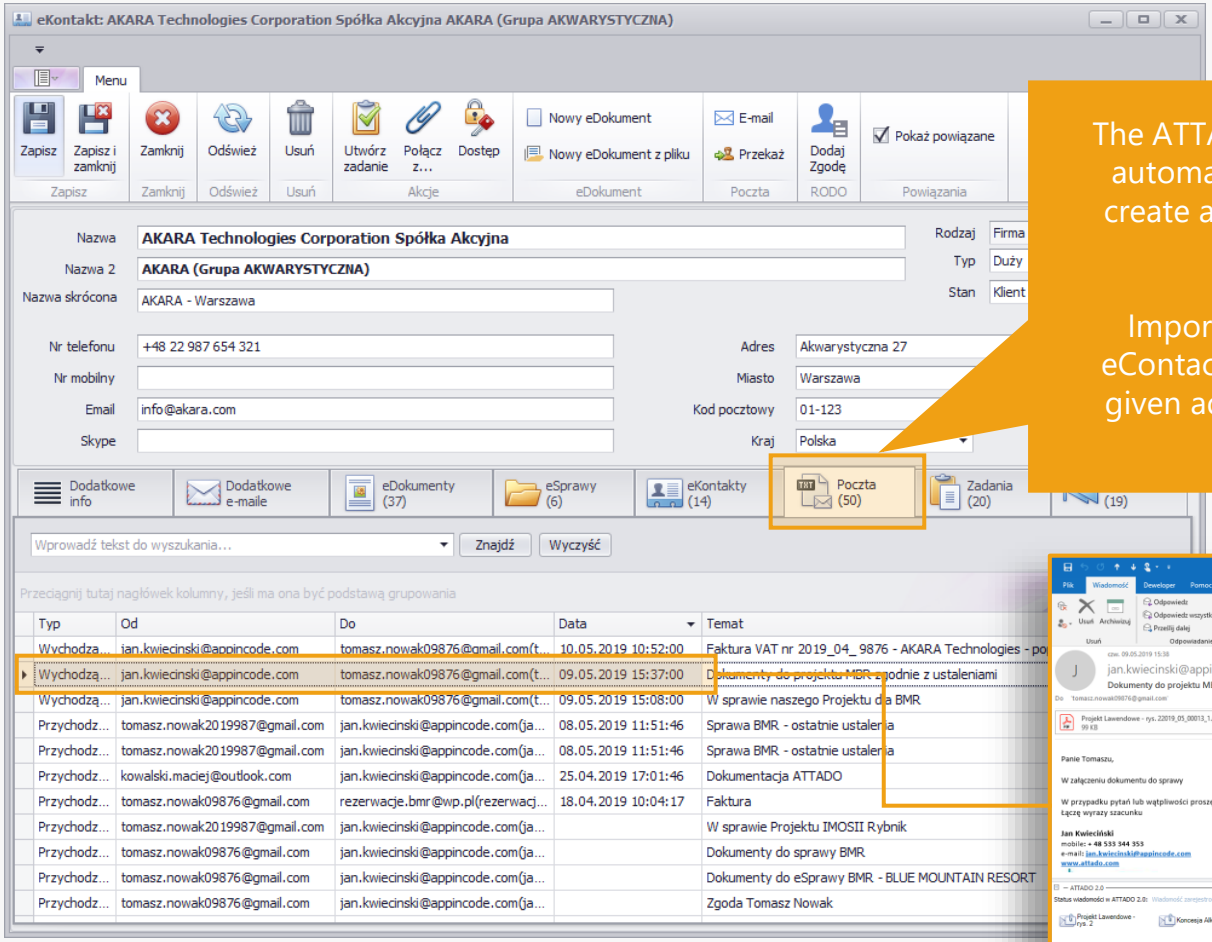
ATTADO every day

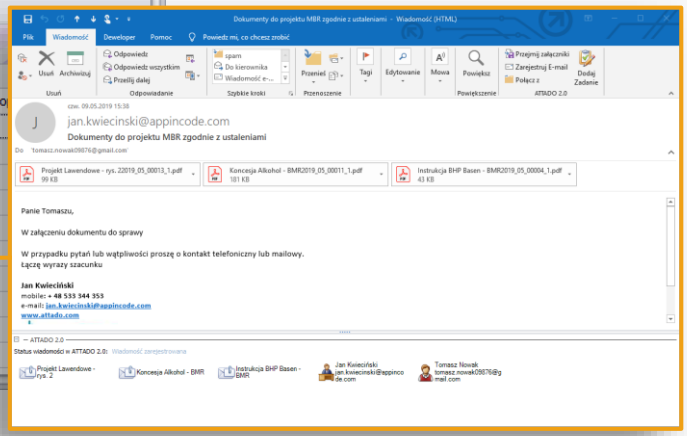
LET'S TAKE A CLOSER LOOK:

Problem -
each employee creates his own contacts database

The ATTADO add-on for MS Outlook allows you to automatically or manually (at the user's request) create a history of correspondence with eContact registered in the central database.

Importantly, users who have access to a given eContacts can view not only "their" e-mails with a given address, but also those registered by other users.

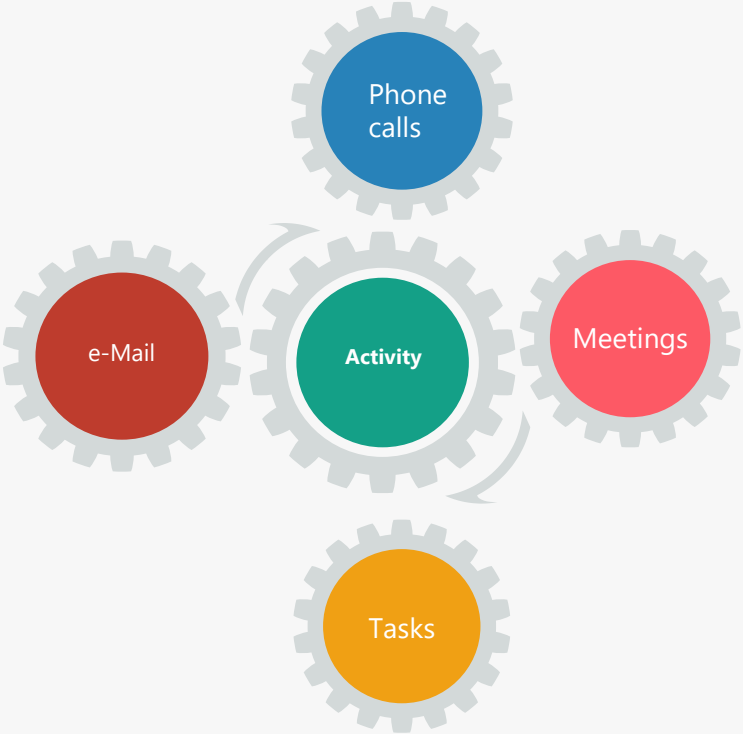




Tasks

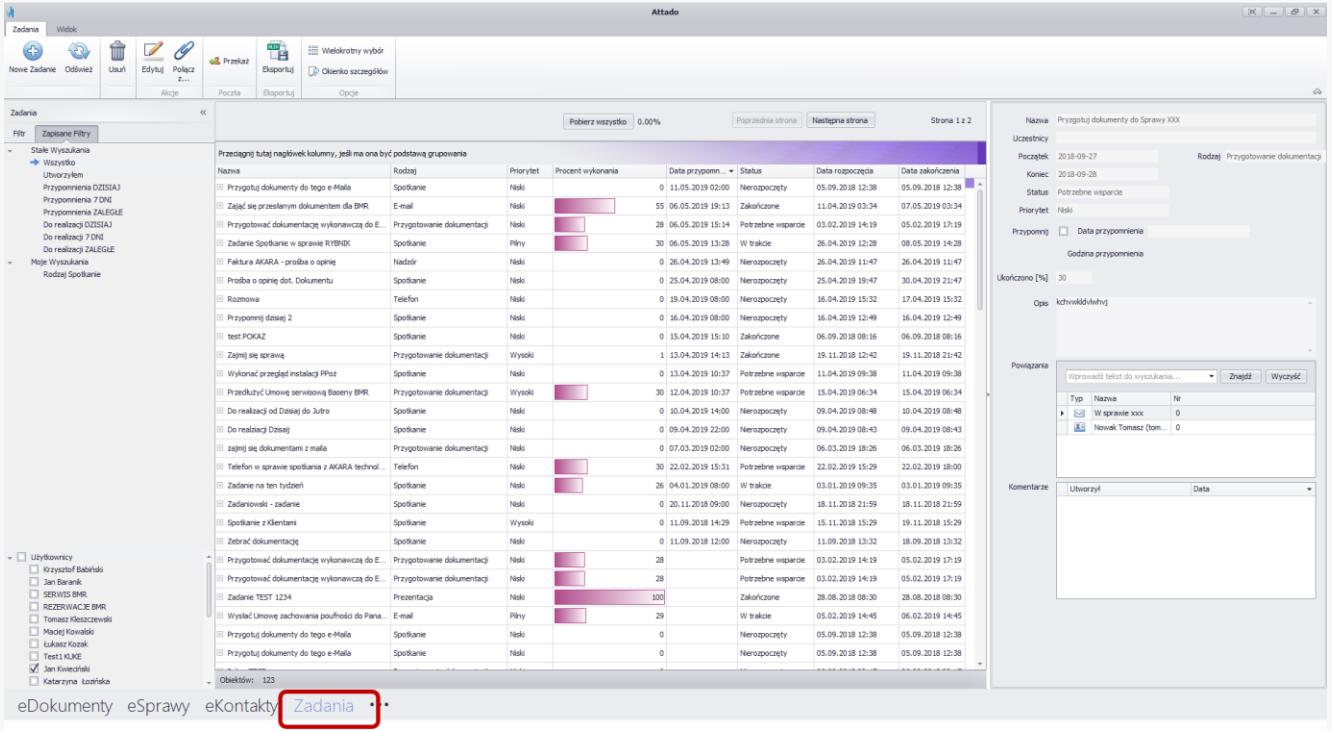
the company's Task database enables:

- Creation
- Planning
- Reminding
- Record keeping



any tasks, activities such as: telephone, meeting, e-mail, etc. regarding eContact, eCase or eDocument.

The ATTADO software allows you to manage Tasks and activities throughout the company. It creates a central, corporate database of Tasks and Activities for all users.



They trusted us:

Thank you!
