

OpsCompass

**CATCH
YOUR**

DRIIFT

*Cloud Security and
Compliance across multi-
cloud and SaaS*

OpsCompass helps protect your public cloud and SaaS environments from:

- Risky Misconfigurations
- Policy and compliance violations
- Costly mistakes

Comprehensive Drift Detection and Cloud-Native Security on:

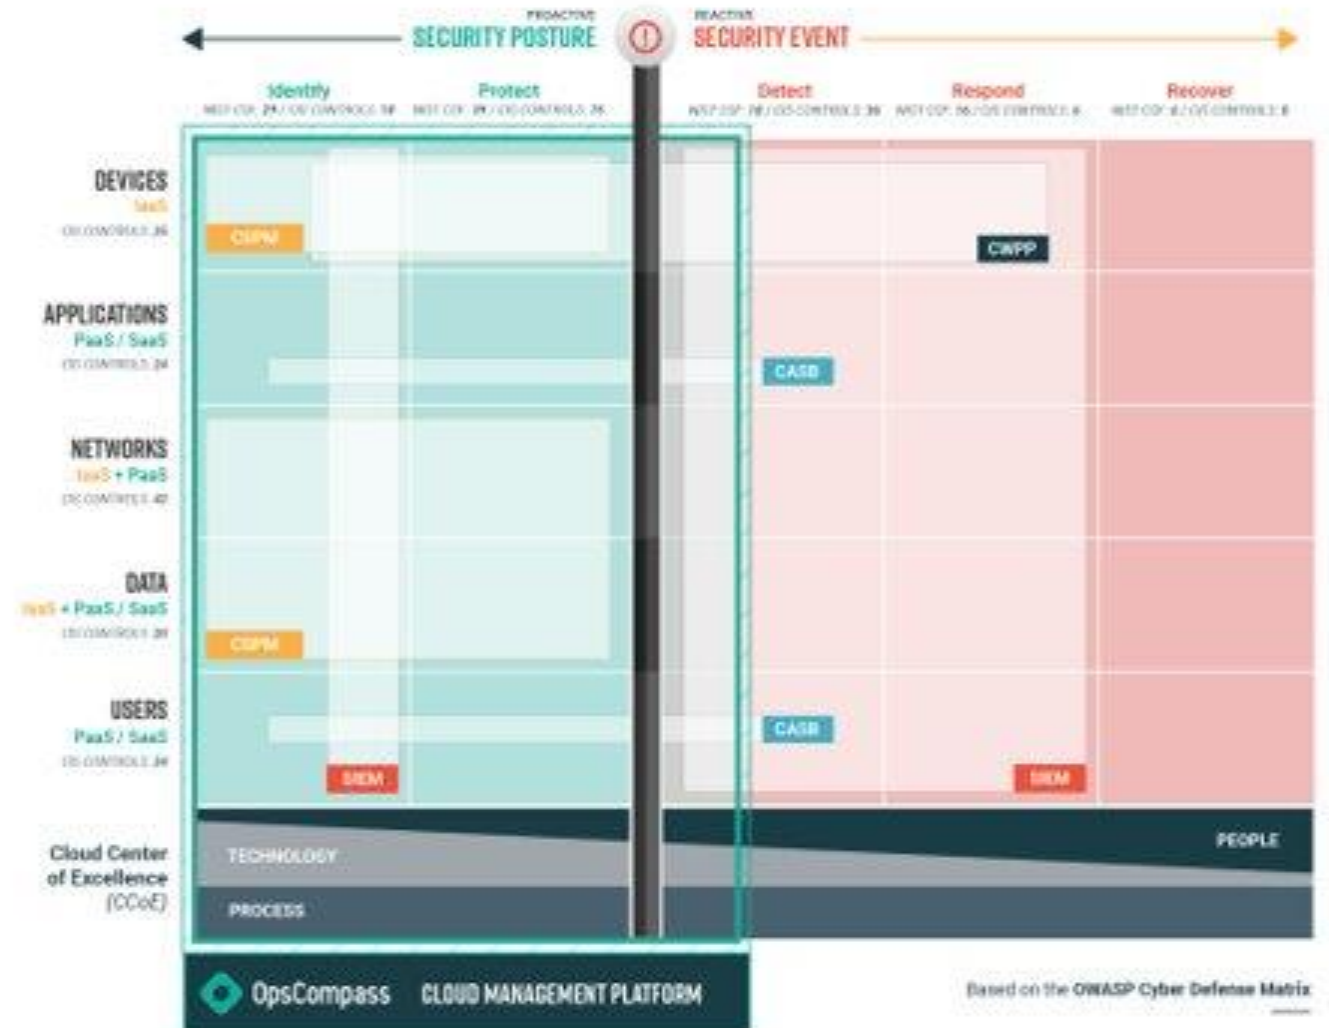

So what makes OpsCompass different from other cloud management and security tools?

1. Drift protection and compliance for SaaS and not just public cloud
2. Built from the ground-up for cloud-native/DevOps
3. Holistic approach to Drift management with workflows that activate more efficient remote CloudOps

Enterprises are navigating a complicated landscape of cloud management and security tools

- Proactive vs Reactive
- IaaS + PaaS + SaaS
- Single source of truth

OpsCompass solves key cloud management and security challenges:

- Difficult to identify risks across multiple clouds and tools
- Lack of communication and collaboration across teams; especially Cloud Ops and Security
- Fragmented cloud governance and security across the major cloud platforms
- New approach to security and visibility of cloud adoption with cloud-native and container-oriented services
