

# Simple, Compliant, Secure

## Speed Up File Transfers and Stay GDPR Compliant

When receiving files containing confidential client information, it's vital to make sure you're operating within the bounds of GDPR. But it's not always easy.

### What is Secure File Transfer?

Secure File Transfer from MBM Ltd is a secure, auditable file transfer service that is fully GDPR compliant, highly scalable and simple to use.

### Why customers use Secure File Transfer

- A GDPR compliant way to receive files that requires no additional downloads or apps
- Reduces the need to split large files associated with server limits
- Removes the security and duplication issues involved in transferring confidential files via email
- Limitless usage and capacity

### Protect confidential data

- Clients access a unique link
- No duplicate documents sitting on email servers
- Perfect for financial services organisations who must meet Anti-Money Laundering regulations

### Simplify document sharing

- Works on any device
- Requires no downloads
- Significantly reduces the time involved in sharing files
- Removes the need for your clients to register their details

### Comply with GDPR

- Full audit logs
- Automated inactive account deletion
- Hosted in Microsoft's GDPR-compliant data centres
- De-risks file transfer

### Delivering excellent investor returns

*"SFT freed up our server traffic – we don't have large files sat in our email system and we don't have to worry that they won't make it past our investors' firewalls.*

*We simply upload our reports via SFT and the investors receive a link to a secure UK-hosted site where they can download what they need."*

# Rapidly, Securely Share Files with Your Clients

## Reliable and always available

- Built on Azure and hosted in Microsoft data centres
- Microsoft guarantees at least 99.9% service availability for Azure

## Infinitely scalable

- Enjoy unrestricted file size and share an unlimited number of files thanks to Azure's elastic capacity

## Your data jurisdiction

- Can be hosted in any of Microsoft's worldwide data centres
- Stay in control of where your confidential data client data needs to reside

## Your Free 14-Day Trial

Discover how simple Secure File Transfer is to use with a 14-day free trial via these simple steps:

- Visit <http://sft.mbmltd.co.uk/Trial>
- Choose where in the world you'd like to store your data
- Sign-in using your favourite service such as Microsoft Office 365 or simply choose a local password
- You can then use the full service as much as you want for 14-days

At the end of 14 days, you can choose to continue or simply end your trial.

## The right move

*"Some secure file transfer services require clients to download a programme or register their details – the beauty of SFT is that you don't need to do this.*

*What MBM has provided my business with is very, very simple and completely secure. It's ideal."*

Advice

## A simple way to meet complex legislation

Secure File Transfer has been designed to be simple for organisations and their customers to use yet secure enough to comply with legislation including GDPR. This makes it perfect for Financial Services organisations who receive confidential data from their clients (for example bank statements and payslips) or have to handle information in line with Anti-Money Laundering regulations.

## Why MBM Ltd?

When MBM Ltd was founded in 1990 we decided to go beyond traditional break/fix IT by delivering a service that was holistic, affordable and driven by customer need. We created Secure File Transfer as a direct response to challenges faced by our financial services customers – demonstrating that solving complex problems needn't mean a complicated solution.
