Latvian language (Latvia) App

Do your employees call for an efficient IT solution?

Provide a user-friendly business platform in Latvian, thus enhancing employee satisfaction and overall productivity.

Use Latvian language (Latvia) App

Overview

Latvian language (Latvia) is a business software solution developed by ELVA for companies that carry out business transactions in Republic of Latvia.

The App Language is fully integrated with Dynamics 365 Business Central by providing translation of its interface and standard reports into the Latvian Language.

Latvian language (Latvia) cannot be considered as translation tool for:

- user entered information in Latvian Language
- reports provided by other software solutions, that are integrated with Dynamics 365 Business Central

Get Started

Role Center

In order to use Latvian language (Latvia), no specific role center is required.

Select Language

All users of Business Central have access to language settings. The following steps should be followed, in order to change language per your user in Business Central:

1. In the app bar upper right corner choose the user name, and then choose My Settings:

2. In the My Settings page, open the list of available languages:

3. In the Available languages page, select the Latvian (Latvia):

4. Afterwards press the **OK** button and wait for the system to reload.

Setup

No additional setup is required after the Latvian language (Latvia) App has been installed.
