Frequently Asked Questions

Overview

Latvian language (Latvia) is a business software solution developed by Elva Baltic for companies that carry out business transactions in Republic of Latvia. Latvian language (Latvia) is fully integrated with Dynamics 365 Business Central by providing translation of its interface and standard reports into the Latvian language.

Is a specific Role Center required for use of your application?

In order to use Latvian language (Latvia), no specific role center is required.

How can I set Latvian as default language for Dynamics 365 Business Central?

All users of Dynamics 365 Business Central have access to language settings. The following steps should be followed, in order to change language per your user in Dynamics 365 Business Central:

- In the app bar upper right corner choose the user name, and then choose My Settings
- In the My Settings page, open the list of available languages
- In the Available languages page, select the Latvian (Latvia).
- Afterwards press the OK button and wait for the system to reload. For detailed guidance and images please review Help section: How to Use

I have installed the App, is there any additional setup required to get started?

No additional setup is required after the Latvian language (Latvia) App has been installed. You may follow the steps how to change language.

I have installed the App, but my Chart of Accounts is still in English. What can I do?

Latvian language (Latvia) cannot be used as translation tool for user entered information in Dynamics 365 Business Central (Chart of Accounts)

Our Company runs business in the sphere of delivery of goods in Latvia and we are using Dynamics 365 Business Central together with industry specific extension and Latvian language (Latvia) App. When printing out a report Transport Mileage Calculation, it does not come out in Latvian language. What can be the problem?

Latvian language (Latvia) App cannot be used as translation tool for reports provided by other software solutions (Report: Transport Mileage Calculation), that are integrated with Dynamics 365 Business Central.
