TravelNET
DMC software done right

TravelNET saves majority of time spent on administrative work so you can focus on the important things.

# Minimized need for human supervision

TravelNET:

- keeps track of orders **automatically**
- informs about upcoming deadlines
- **notifies** people involved
- even cancels the unconfirmed order before there is a cancellation fee in place

# Simple hotel price configuration

TravelNET easily combines **any hotel price** - per person, per room, combined, or including meal.

You can update the prices with the web interface as well as **import** from other systems or Excel sheets.

They are always up-to-date, so no more last-minute troubles.
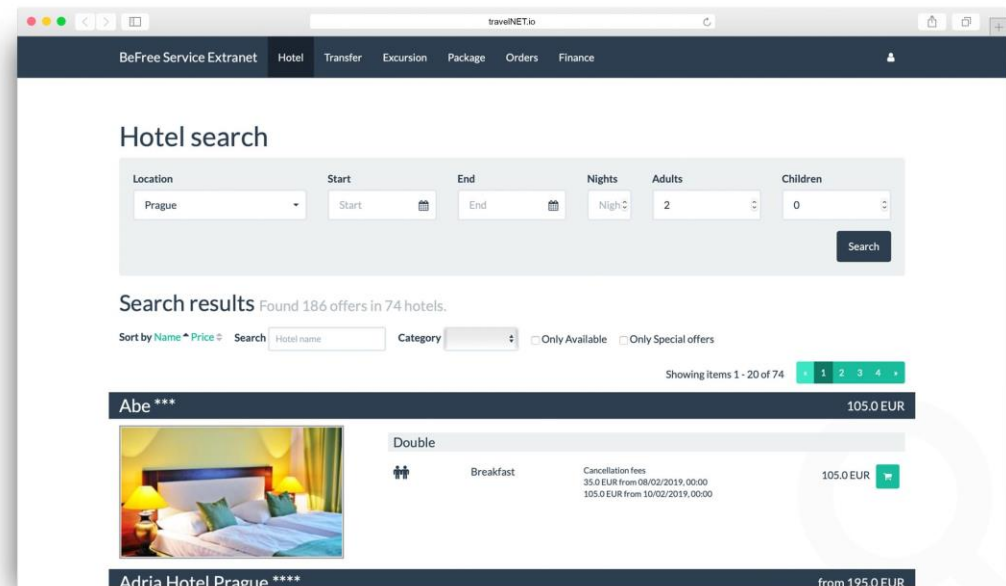

Reliable payment overview and monitoring

TravelNET provides **up-to-date** and **accurate** payment overview, monitors unpaid and paid orders, and gives an overview of individual order performance.
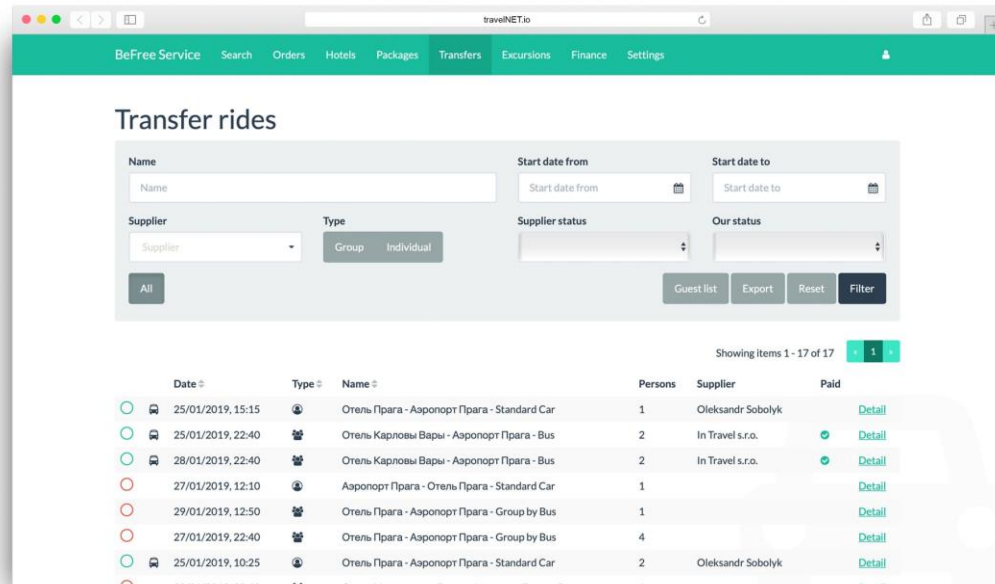

It cannot get easier than this.

Partner cooperation via self-service

In **TravelNET extranet**, which is available 24/7, the partner looks up information, and orders the hotel which is then automatically notified and reacts immediately.

No supervision needed, no money spent.

Transfers and excursions planned easily

TravelNET deals with **plans** and **budgets** of transfers and excursions, automatically creates all **documents** and assigns client orders to journeys, calculates group net prices, and much more.

Data exchange and integration

TravelNET implements **API communication** with several market-leading systems as well as Excel spreadsheet import and export.

We are ready to add other means of integration when needed.

Customers' feedback

- Travel agency BeFree Service significantly increased productivity and revenue thanks to our system.

- Employees of other customers are very satisfied with the way TravelNET helps them with their job and boosts their productivity.
