

Codeless Test Automation and Agile Test Management Platform

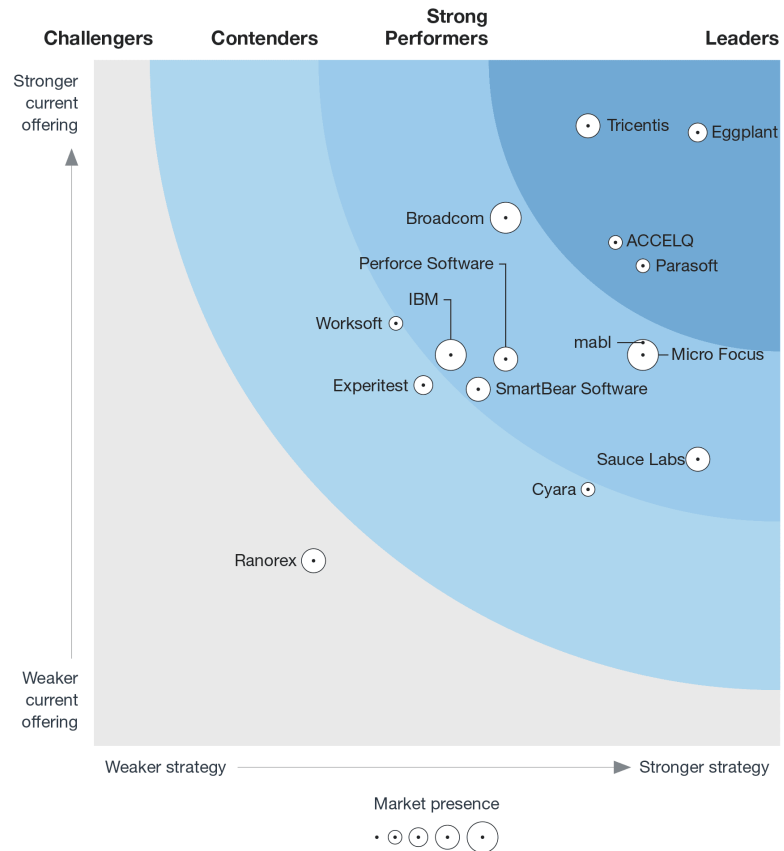

AI based Unified Platform for Continuous Delivery

THE FORRESTER WAVE™

Continuous Functional Test Automation Suites

Q2 2020

ACCELQ is LEADER

in Continuous Functional Test Automation Suites - 2020

“ACCELQ makes its way to the top tier of test automation suites for modern testers.

A suite built on the cloud from the ground up and integrates a seamless test management and codeless automation capability.”

FORRESTER®

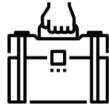

- Client Mentioned

Agile Quality Management with ACCELQ

What we do?

- **Quality Lifecycle Management.**
Next-gen Test Management for Manual & Automation
- **In-Sprint Codeless Automation**
Automate testing without writing a single line of code
- **API & UI End-to-End Validation**
Unified approach to API & Functional automation

How we do?

- Powerful natural language editor allows you to write test automation logic in plain English.
- In-sprint automation with functional virtualization of your test application.
- ACCELQ Universe drives automation across quality lifecycle with business process focus.
- Next-gen approach to manual testing, built to complement its core state-of-the-art Automation capabilities.
- Innovative approach to Quality Lifecycle Automation brings definitive ROI to every phase of test cycle.

Fortune-50 Customers

Customers ranging from startups to world-class enterprises

Rated 5-star consistently on Gartner Verified Reviews

Our Products

Collaborate, Automate, Accelerate

ACCELQ Automate

Model test design, Automate tests, Manage plans and Execute - web, desktop, file and more with Jira & CI Integrations.

ACCELQ Manual

Test Management, Next-gen Manual test designer, test suites, Execution tracking, traceability & tool integrations.

ACCELQ API

Test APIs, Microservices, Database, Message Queues, SSH testing and Mainframe green screen automation.

ACCELQ Unified

Bring quality to the center, by addressing all your testing needs in one single package. Collaborate, Automate & Accelerate. Enterprise plans & full suite

Automate + API + Manual + Next-gen Test Management

Enterprise Customer-base across industry verticals

“

It has been amazing to see our transition to true Continuous Test Automation. ACCELQ has driven this transformation for us by shifting left and enabling in-sprint automation for our Salesforce Implementation.

Sean Magennis

AI at the core for sustainable Automation

Power of AI & ML to enable faster and robust automation

Natural Language Automation

Zero code, but as powerful. Scale up automation enabling manual testers

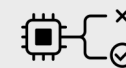

Functional Virtualization & Reconciliation

Enabling In-sprint Automation to align with CI/CD. Get started on Automation along with App Dev

Element handling & Bot healing

Low maintenance and Robust automation. Powerful Element ID for dynamic applications

Auto generation of test cases

Scientific Permutations-based approach for optimum test coverage

Adaptive Change Management

Universe driven with referential integrity analysis drastically reduces time to market & cost

YPO ensures error-free membership renewal drive with accelerated & automated test approach on Salesforce integrated platform

”

It has been amazing to see our transition to true Continuous test automation. ACCELQ has driven this transformation for us by shifting left and enabling in-sprint automation.

ACCELQ fit right into our ecosystem of tools and process to achieve the efficiencies across the lifecycle to align with Continuous delivery.

Sean Magennis

- President & COO YPO

Improved business velocity

40(hours) x 3 (resource)
manual test effort reduced
to under 4 hours for
comprehensive regression run

In-Sprint Automation

Enabled business teams to
design and develop automation
concurrently with new feature
implementation

Modular and scalable automation

Modularity enabling
development of new business
process automation with over
80% re-use

Technical Excellence

Embedded best practices
and design principles
address peripheral concerns
and traceability consistently

United Achieves Continuous Delivery With Continuous Test Automation as a Key Enabler

United Airlines relies on ACCELQ platform for Enterprise wide Test Automation & Continuous Testing

”

ACCELQ is proving out to be a great investment for our organization as it is playing an important role in achieving our goals in area of continuous delivery. It helped us accelerate the pace at which we automate our functional tests leveraging powerful Machine Learning and Predictive Analytics engine. It drastically cut down the time it takes to complete execution of automated tests.

- Director, Enterprise Quality & Release Management

2x

Faster Releases at higher Quality

Multi-day manual test effort reduced to few hours of automated regression

67%

Significant Cost & Effort Reduction

In-built modularity enabling quicker development of new business process automation; over 80% re-use.

Business process focused approach

Enabled testing teams to design and develop automation concurrently with new feature implementation

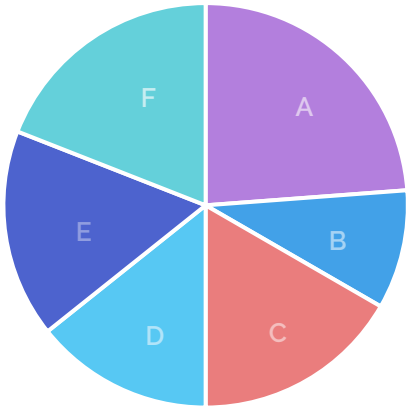

Technical Excellence with sustainable benefit

Embedded best practices and design principles address peripheral concerns and traceability consistently

ROI coupled with benefits of Continuous Automation

Effort Reduction

A ■ **100%** ↓

Framework Development

- Design-first approach with zero setup time
- Out-of-the-box framework with best practices

B ■ **40%** ↓

Script Development

- Codeless, natural language editor
- Predictive test scenario builder

C ■ **100%** ↓

Element ID setup

- Element explorer for advanced UI frameworks
- Dynamic element handling and reconciliation

D ■ **60%** ↓

Change Management

- Natural traceability across test assets
- Automated alerts management

E ■ **70%** ↓

Reliable test executions

- Automated test planning and self-healing
- Cross browser & OS executions on cloud

F ■ **80%** ↓

Data & test case design

- Data designer with test case generation
- Multi app environment support

Accelerated Quality
