# Automated Medical Appointment Portal

Powered by Microsoft Power Platform

KAISPE Automated Medical Appointment Portal App helps Patients book appointments with ease and stay on top of appointment booking through medical check up.

What is Automated Medical Appointment app?

The app provides an intuitive web interface to patients and attendants to book appointments with doctors for both onsite and online consultation. Attendants can also register patients, view registered patients, view past appointments, cancel appointments.

Bills are automatically generated for confirmed appointments and relevant notifications are sent out to patient and doctor. Patients can pay the bills using different payment methods including Paypal, Amazon Pay, Credit Card or as walk-in patients to the medical center. Partial payments, refund and insurance payments are also covered.

Why customers use Automated Medical Appointment

- Single place to book appointments, pay bills and collaborate with doctors

- Seamless collaboration with medical center and doctors

- Web portal available on multiple devices including mobile and tablets

- Multiple payment options including Paypal, Amazon Pay etc.

Our Solution

- Leverage the power of Microsoft Power Platform (cloud based services)

- Highly flexible application architecture

- Integration with other applications

- Help saving Patient and Medical Center time and related costs
