

Rapidly Design and Deploy 5G Edge & IoT Azure Applications With ReAccess

- Create 5G connectivity applications using no-code
- Deploy applications to Azure Government cloud (GCC or GCC High)
- Apps pre-configured for AI, ML, Analytics, VR and AR programs
- Recreate legacy applications as 5G Edge & IoT apps within hours
- FedRAMP and FedRAMP High compliant

ReAccess reduces design, development and deployment time of any cloud application by 80%. Azure cloud service provisioning and on-going usage is automated, meaning teams can get on with innovating and deploying applications at speed.

Secure

ReAccess employs Azure Active Directory across all applications

Cost effective

Reduce design and development time with automated Azure Cloud Services

EIM

Ensure data remains part of your Enterprise Information Management solution

Compliant

All applications meet FedRAMP and FedRAMP High compliance

Leading edge

Data optimized for AI / ML / VR and AR programs

Always on

ReAccess was built for the 5G world

Purchasing vehicles and compliance

ReAccess meets FedRAMP and FedRAMP High compliance and is deployable to GCC and GCC High environments.
